As it takes no place so that you can bring with you wherever you go.

Salesforce Certified Experience Cloud Consultant Sample Questions (Q79-Q84):

NEW QUESTION # 79
To which three objects can the Partner Super User access be applied?
Choose 3 answers

- A. Custom Objects
- B. Accounts
- C. Campaigns
- D. Cases
- E. Opportunities

Answer: A,B,E

Explanation:
Partner Super User access is a feature that allows you to grant access to records owned by other partner users who have the same role or a role below them in the role hierarchy. You can apply Partner Super User access to three objects: Opportunities, Accounts, and Custom Objects.

NEW QUESTION # 80
hat are three best practices when configuring self-registration for an Experience Cloud site? Choose 3 answers

- A. Use a restrictive default profile to begin with.
- B. Assign the standard site profile as the default for self-registration.
- C. Create a separate profile for your self-service site and your partner portal.
- D. Use the same profile for your self-service site and your partner portal.
- E. Assign a cloned standard site profile as the default for self-registration.

Answer: A,C,E

Explanation:
Three best practices when configuring self-registration for an Experience Cloud site are A, B, and C. Self-registration is a feature that allows users to create their own accounts on your Experience Cloud site without an invitation. To configure self-registration, you need to assign a default profile for self-registered users, which determines their access level and permissions on your site. A best practice is to assign a cloned standard site profile as the default, which gives you more control over the settings and customization of the profile. Another best practice is to use a restrictive default profile to begin with, which limits the access and visibility of self-registered users until they are verified or approved by an administrator. A third best practice is to create a separate profile for your self-service site and your partner portal, which allows you to differentiate the access and functionality of different types of users on your sites.

NEW QUESTION # 81
What accurately sequences the necessary steps to create a partner user from an enabled partner account?

- A. 1) View the partner account contact.
  2) Select Manage External User. Multiple Books
  3) Select Enable Partner Account.
  4) Edit the user record to assign the correct role and profile.
  5) Save.
- B. 1) Edit the user record to assign the correct role/profile.
  2) View the partner account contact.
  3) Select Manage External User.
  4) Select Enable Partner Account.
  5) Save.
- C. 1) View the partner account contact.
  2) Select Manage External User.
  3) Select Enable Partner User.
  4) Edit the user record to assign the correct role/profile.
  5) Save.
- D. 1) Edit the user record to assign the correct role/profile. ee
  2) View the partner account contact. Single Book
  3) Select Manage External User.
  4) Select Enable Partner User.
  5) Save.

Answer: C

NEW QUESTION # 82
Which two statements regarding data categories are true?
Choose 2 answers

- A. Customer Portal users and partner portal users inherit data category visibility settings of the role assigned to their account (owner) managers by default.
- B. Translated articles will not follow the master article data category. Therefore, translated articles can be assigned to a different data category.
- C. When a category is made visible to a user through custom settings or is made visible by default, its child and parent categories are not included.
- D. Child roles cannot see more data categories than their parent role. If the parent role's visibility changes, the child role's category visibility is reset to its parent's category visibility.

Answer: A,D

Explanation:
Two statements regarding data categories that are true are A and B. Data category visibility is controlled by roles, permission sets, or profiles. Child roles cannot see more data categories than their parent role, and if the parent role's visibility changes, the child role's category visibility is reset to match the parent's. Customer Portal users and partner portal users inherit data category visibility settings of the role assigned to their account (owner) managers by default, unless they have a custom profile that overrides the role settings.

NEW QUESTION # 83
Ursa Major Solar (UMS) recently went through a major rebranding effort that resulted in a new company logo along with new brand colors. UMS wants to update brand colors across all of its sites. The sites are built with Lightning templates.
Which tool should the Experience Cloud consultant recommend to make these changes?

- A. Site Builder
- B. ExperienceBundle
- C. Experience Cloud Script Master
- D. Lightning Builder

Answer: A

Explanation:
To update brand colors across all of its sites, UMS should use the Site Builder tool. Site Builder is a tool that allows you to edit the look and feel of your Experience Cloud sites using a drag-and-drop interface. You can change the theme, layout, components, and branding of your sites without coding. Site Builder also supports Lightning templates, which are responsive and modern templates for Experience Cloud sites.
