

H19-338-ENU Online Version, Valid H19-338-ENU Test Book

BONUS!!! Download part of ExamsLabs H19-338-ENU dumps for free: <https://drive.google.com/open?id=1Wupc7WV1kqxDP0eQujdwGHdYGPYSAXd>

The Huawei H19-338-ENU practice test by ExamsLabs can be accessed online on different web browsers like Chrome, IE, Firefox, Opera, and Safari without any plugins. You also have the flexibility to open the pdf file of the HCSP-Presales-Storage H19-338-ENU Practice Test on mobile devices and tablets. The Huawei H19-338-ENU pdf dumps version allows you to print the Huawei H19-338-ENU exam questions easily and access it everywhere.

The HCSP-Storage exam is a comprehensive exam that covers a wide range of topics related to storage technology. It covers topics such as storage architecture, storage networking, storage virtualization, and storage management. H19-338-ENU Exam is designed to test the candidate's ability to design, implement, and manage storage solutions in a complex environment. It also evaluates the candidate's ability to troubleshoot any issues that may arise in the storage system.

Valid H19-338-ENU Test Book - H19-338-ENU Exam Pattern

Our H19-338-ENU exam braindumps provide you with a reliable, rewarding and easy way to know and grasp what your actual exam really requires. Our professionals regard them as the top H19-338-ENU preparation questions for their accuracy, precision and superbly informative content. If you choose our H19-338-ENU Practice Engine, you will find it is the best tool ever for you to clear the exam and get the certification.

Huawei HCSP-Presales-Storage Sample Questions (Q40-Q45):

NEW QUESTION # 40

Which technology does FusionStorage HyperSnap run on?

- A. ROW
- B. COW

Answer: A

NEW QUESTION # 41

Huawei partners should establish a cyber security assurance system to ensure the cyber security of customers

- A. False
- B. True

Answer: B

Explanation:

Explanation

Huawei partners should establish a cyber security assurance system to ensure the cyber security of customers.

According to the Huawei Cyber Security Assurance System White Paper, Huawei partners are required to comply with Huawei's cyber security requirements and standards, implement cyber security management processes and controls, conduct cyber security audits and assessments, and report cyber security incidents.

NEW QUESTION # 42

In Europe, Customer A is using SmartIDC for discovery and Assessment (DNA).

Which SmartIDC platforms can be used for analysis? (Multiple choice)

- A. Upload data to the SmartIDC China site for analysis
- B. Deploy SmartIDC Analyzer for analysis.
- C. Upload data to the SmartIDC Germany site for analysis.

Answer: B,C

NEW QUESTION # 43

Which of the following is a feature of iMasler NCE-FabricInsight?

- A. 1-3-5 intelligent O&M
- B. Capacity/traffic risk prediction
- C. Network health check
- D. AI-scenario data visualization
- E. Flow analysis

Answer: A,B,C,D,E

Explanation:

Explanation

iMaster NCE-FabricInsight is a network analysis platform that provides intelligent O&M for data center networks . It has the following features:

1-3-5 intelligent O&M: This is a methodology that enables network administrators to locate faults within 1 minute, identify root causes within 3 minutes, and rectify faults within 5 minutes . It uses AI algorithms and big data analysis to provide proactive fault prevention, rapid fault location, and intelligent fault recovery .

Network health check: This is a function that monitors the network status and performance in real time, and provides comprehensive network health reports and suggestions for improvement . It uses various indicators such as availability, reliability, latency, jitter, packet loss, and bandwidth utilization to evaluate the network health .

Flow analysis: This is a function that collects and analyzes the network traffic data, and provides granular visibility into the network flows and applications . It uses technologies such as sFlow, NetStream, and Telemetry to obtain the flow information, and supports features such as flow path tracing, flow quality analysis, flow anomaly detection, and flow optimization .

AI-scenario data visualization: This is a function that displays the network data in a visual and interactive way, and provides insights into the network behavior and trends . It uses technologies such as graph databases, natural language processing, and machine learning to present the network data in various scenarios, such as topology views, service views, device views, alarm views, and report views .

Capacity/traffic risk prediction: This is a function that predicts the future network capacity and traffic demand based on historical data and trend analysis, and provides suggestions for network planning and optimization . It uses technologies such as time series analysis, regression analysis, and neural networks to forecast the network growth and identify potential risks .

NEW QUESTION # 44

Which technique is used to protect end-to-end data integrity?

- A. CRC

- Answer: C**
