ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q10-Q15):

NEW QUESTION # 10

If a lens has four entities, which entity within the lens structure would not have a parent reference?

- A. Second-level entity
- B. Top-level entity
- C. Bottom entity
- D. Third-level entity

Answer: B

Explanation:

According to the ServiceNow documentation¹, a lens is a hierarchical structure that consists of entities and relationships. An entity is a data object that represents a business concept, such as a project, a demand, or a resource. A relationship is a link between two entities that defines how they are connected. A lens can have up to four levels of entities, each with a parent reference to the entity above it, except for the top-level entity, which has no parent reference. The top-level entity is the root of the lens and defines its scope and type. For example, a project lens has a project as the top-level entity, and a demand lens has a demand as the top-level entity.

NEW QUESTION # 11

What features are not included in a teamspace application but can be added in teamspace settings? Choose 2 answers

- A. Demand Assessments
- B. Workbench configuration
- C. Project
- D. Idea

Answer: A,D

Explanation:

According to the Teamspaces document, features such as idea and demand assessments are not included in a teamspace application by default, but can be added in teamspace settings. Idea is a feature that allows users to submit and vote on ideas for new or improved products, services, or processes. Demand assessments are a feature that allows users to evaluate the demands based on various criteria, such as strategic alignment, risk, and return on investment. The other options are not correct, as they are features that are included in a teamspace application by default. Workbench configuration is a feature that allows users to customize the workbench for the teamspace. Project is a feature that allows users to create and manage projects within the teamspace.

NEW QUESTION # 12

If an it_project_manager does not want to equally distribute hours across the resource plan time frame, what allocation spread should be used?

- A. Even.
- B. Back Load.
- C. Front Load.
- D. Any.

Answer: D

Explanation:

If an it_project_manager does not want to equally distribute hours across the resource plan time frame, the allocation spread should be set to Any. This option allows the it_project_manager to manually enter the hours for each month or quarter in the resource plan. The other options (Even, Back Load, and Front Load) automatically distribute the hours evenly, from the end, or from the start of the time frame, respectively. You can find more information about the allocation spread in the Product Documentation for ServiceNow.

NEW QUESTION # 13

A checklist item record provides a name and what other element?

- A. Percent complete field.
- B. Short description field.
- C. Complete field.
- D. Status field.

Answer: C

Explanation:

Explanation

A checklist item record provides a name and a complete field. The name field is the label of the checklist item, and the complete field is a checkbox that indicates whether the checklist item is done or not. You can find more information about checklist items in the Product Documentation for ServiceNow.

NEW QUESTION # 14

A checklist item record provides a name and what other element?

- A. Percent complete field.
- B. Short description field.
- C. Complete field.
- D. Status field.

Answer: C

Explanation:

A checklist item record provides a name and a complete field. The name field is the label of the checklist item, and the complete field is a checkbox that indicates whether the checklist item is done or not. You can find more information about checklist items in the Product Documentation for ServiceNow.

NEW QUESTION # 15

.....
