Up to now, we have more than tens of thousands of customers around the world supporting our 800-150 training prep. So our 800-150 study materials are elemental materials you cannot miss. In your review duration, you can contact with our after-sales section if there are any problems with our 800-150 Practice Braindumps. They will help you 24/7 all the time. These services assure your avoid any loss.

The experts in our company are always keeping a close eye on even the slightest change on the 800-150 exam questions in the field. Therefore, we can assure that you will miss nothing needed for the 800-150 exam. What's more, the latest version of our 800-150 Study Materials will be a good way for you to broaden your horizons as well as improve your skills. You will certainly obtain a great chance to get a promotion in your company.

Considering current situation, we made a survey and find that most of the customers are worried about their privacy disclosure. Here

our 800-150 exam prep has commitment to protect every customer's personal information. About customers' privacy, we firmly safeguard their rights and oppose any illegal criminal activity with our 800-150 Exam Prep. We promise to keep your privacy secure with effective protection measures if you choose our 800-150 exam question. Given that there is any trouble with you, please do not hesitate to leave us a message or send us an email; we sincerely hope that our 800-150 test torrent can live up to your expectation.

Cisco Supporting Cisco Devices for Field Technicians Sample Questions (Q74-Q79):

NEW QUESTION # 74

Drag and drop the actions that must be taken after installing an E-Series server from the left into order on the right.

Answer:

Explanation:

Explanation:

In the FLDTEC course, under Maintenance and RMA Procedures, Cisco outlines a specific sequence for bringing up an E-Series server module in an ISR router. The sequence ensures proper recognition, IOS compatibility, and network readiness:

- * Power up the router and server: Ensures both components are initialized and POST begins.
 - * Verify that the router recognized the server: Use service-module commands or show platform to confirm server visibility.
 - * Load a compatible Cisco IOS image onto the ISR: The IOS must support the E-Series module to provide integration and configuration functionality.
 - * Connect the server to the network: Establish network connectivity for services, remote access, or deployment.
- This structured approach is essential for minimizing errors during modular hardware upgrades or RMAs in the field.

NEW QUESTION # 75

Why is the midplane-free design of the X9508 Modular Chassis significant in the context of Cisco UCS X-Series compute node replacement?

- A. It enables direct front-to-rear airflow, improving cooling efficiency during node replacement.
- B. It allows for easier future upgrades to faster connectivity standards.
- C. It reduces the overall power consumption of the chassis.
- D. It enables hot-swapping of compute nodes without powering down the chassis.

Answer: A

Explanation:

The Cisco UCS X9508 Modular Chassis, part of the UCS X-Series architecture, is designed without a midplane, which marks a major shift from previous UCS models. The midplane-free design is critical because:

Direct front-to-rear airflow is made possible without obstruction.

This airflow architecture enhances thermal efficiency, especially important during compute node replacements or upgrades.

It allows modules to communicate via side-plane connectors, which are located on the sides rather than a fixed midplane.

This architecture:

- * Simplifies mechanical design
- * Reduces cooling complexity
- * Improves modularity and accessibility

Why the other options are incorrect:

- * A. Hot-swapping is supported, but not because of midplane-free design—it's a UCS standard feature.
- * C. Upgrades to faster interconnects are enabled by side-plane I/O, not by midplane absence alone.
- * D. Power efficiency is a broader chassis feature, not specifically driven by the midplane design.

NEW QUESTION # 76

Which step must be taken to minimize data traffic impact when replacing a fabric interconnect?

- A. Disable high availability before replacement.
- B. Power down both fabric interconnects simultaneously.
- C. Use the fabric evacuation procedure on the subordinate fabric interconnect.
- D. Remove all cable connections at once.

Answer: C

Explanation:

When replacing a fabric interconnect in a Cisco Unified Computing System (UCS), the recommended procedure to minimize traffic disruption is to use the fabric evacuation procedure on the subordinate fabric interconnect. This ensures that traffic is redirected to the other (active) fabric interconnect, allowing the system to maintain connectivity while one interconnect is replaced.

- * High availability should remain enabled to preserve redundancy.
- * Powering down both interconnects would cause a complete outage.
- * Disconnecting cables without graceful evacuation can result in traffic loss.

NEW QUESTION # 77

Drag and drop the TFTP statements from the left onto the corresponding categories on the right.

Answer:

NEW QUESTION # 78

Drag and drop the safety actions that must be taken prior to beginning work into order on the right for working with electrical equipment.

Answer:

Explanation:

Explanation:

In the FLDTEC course, under Safety and ESD Procedures, Cisco outlines the following safety workflow before working on any network hardware:

- * Locate Emergency Power-Off Switch: Identifying how to cut power quickly is essential in case of an electrical fault or emergency.
- * Disconnect Power: Always ensure the power source is turned off and disconnected before handling any components.
- * Verify with Multimeter: Use a multimeter to confirm that no voltage is present before proceeding.
- * Connect ESD Strap: Once confirmed safe, attach your ESD strap to a grounded point to prevent electrostatic damage to sensitive components.

Following this process is critical not only for personal safety but also for equipment protection, especially during hardware installation, maintenance, or RMA replacements.

NEW QUESTION # 79

.....

In this information-dominated society, boosting plenty stocks of knowledge and being competent in some certain area can establish yourself in society and help you get a high social status. Passing 800-150 certification can help you realize these goals and find a good job with high income. If you buy our 800-150 Practice Test you can pass the 800-150 exam successfully and easily. And if you study with our 800-150 exam questions for only 20 to 30 hours, you will pass the 800-150 exam easily.
