

300-745 Reliable Practice Materials - 300-745 Valid Test Registration

2026 Latest PracticeMaterial 300-745 PDF Dumps and 300-745 Exam Engine Free Share: https://drive.google.com/open?id=1_PMPLIISJss58WbhP_IBVVG2hPe_OkIa

All Of Cisco staff knows it is very difficult to get Cisco certificate. But taking Cisco certification exam and getting the certificate are a way to upgrade your ability and prove self-worth, so you have to choose to get the certificate. Isn't there an easy way to help all candidates pass their exam successfully? Of course there is. 300-745 Exam Dumps are the best way. PracticeMaterial has everything you need and can absolutely satisfy your demands. You can visit PracticeMaterial.com to know more details and find the exam materials you want to.

Cisco 300-745 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Secure Infrastructure: Covers selecting security approaches for endpoints, identities, email, and modern environments like hybrid work, IoT, SaaS, and multi-cloud. Includes choosing VPN tunneling solutions, securing management planes, and selecting the appropriate firewall architecture based on business needs.
Topic 2	<ul style="list-style-type: none"> Artificial Intelligence, Automation, and DevSecOps: Explores AI's role in securing network infrastructure, selecting tools for automated security architectures such as SOAR, IaC, and API tooling, and integrating security into DevSecOps workflows and pipelines to minimize deployment risk.
Topic 3	<ul style="list-style-type: none"> Risk, Events, and Requirements: Covers SOC incident handling and response tools, modifying security designs to mitigate or respond to incidents, and applying frameworks like MITRE CAPEC, NIST SP 800-37, and SAFE. Includes matching regulatory and compliance requirements to business scenarios.
Topic 4	<ul style="list-style-type: none"> Applications: Focuses on selecting security solutions to protect applications and designing secure architectures for cloud-native, containerized, and serverless environments using segmentation. Also addresses security design impacts of emerging technologies like AI, ML, and quantum computing.

Cisco 300-745 Dumps [2026] - To Acquire Very Best Final Results

No matter how good the product is users will encounter some difficult problems in the process of use, and how to deal with these problems quickly becomes a standard to test the level of product service. Our 300-745 study materials are not exceptional also, in order to enjoy the best product experience, as long as the user is in use process found any problem, can timely feedback to us, for the first time you check our 300-745 Study Materials performance, professional maintenance staff to help users solve problems.

Cisco Designing Cisco Security Infrastructure Sample Questions (Q13-Q18):

NEW QUESTION # 13

A security engineer on an application design team must choose a framework of attack patterns to evaluate during threat modeling. Which framework provides the common set of attacks?

- A. SOC2
- B. Cisco SAFE
- C. GDPR
- **D. MITRE CAPEC**

Answer: D

Explanation:

In the "Risk, Events, and Requirements" domain of the Cisco SDSI curriculum, understanding how to systematically identify and mitigate threats is essential. MITRE CAPEC (Common Attack Pattern Enumeration and Classification) is a comprehensive dictionary and classification scheme for known attack patterns used by adversaries. It is specifically designed to help security engineers, developers, and designers understand how an attacker might exploit a system. By using CAPEC during the threat modeling phase, an engineer can look at specific "attack patterns"-such as SQL injection, Cross-Site Scripting (XSS), or Man-in-the-Middle-to see if the application's architecture is resilient against them.

Unlike Cisco SAFE (Option A), which is an architectural guide providing best practices for designing secure networks, or GDPR (Option B) and SOC2 (Option D), which are regulatory and compliance frameworks focused on privacy and operational auditing, CAPEC is purely technical and focused on the "how" of an attack. It provides the granular data necessary to simulate attacks and build robust defenses into the application design. Integrating CAPEC into the development lifecycle allows teams to move beyond broad risks and address the specific methods attackers use to bypass security controls. This alignment with the MITRE knowledge base ensures that the security infrastructure is designed with a realistic understanding of modern adversarial tactics, which is a core objective for Cisco security professionals.

NEW QUESTION # 14

Which function does a DLP system perform when protecting application data?

- A. Redirects packets to edge firewalls
- B. Inspects routing tables
- **C. Enforces policy compliance by inspecting data in transit**
- D. Provides segmentation using VLANs

Answer: C

Explanation:

A Data Loss Prevention (DLP) system inspects data in transit (and at rest or in use) to ensure sensitive information is handled according to security policies.

NEW QUESTION # 15

Which Cisco product provides automated incident response workflows integrated with SIEM and SOAR platforms?

- A. Cisco AnyConnect
- **B. Cisco SecureX**
- C. Cisco DNA Center
- D. Cisco Catalyst

Answer: B

Explanation:

Cisco SecureX integrates multiple security tools with SIEM and SOAR platforms and provides automated incident response workflows to speed up detection, investigation, and remediation.

NEW QUESTION # 16

A global marketing firm, based in California with customers on every continent, suffered a data breach that exposed employee and customer PII. Which regulations is the company in danger of violating?

- A. ISO SP800-53
- **B. GDPR**
- C. ISO27001
- D. FedRamp

Answer: B

Explanation:

The General Data Protection Regulation (GDPR) is a comprehensive data privacy law in the European Union (EU) that has a significant global reach. For a California-based marketing firm with customers on every continent, any breach involving the Personally Identifiable Information (PII) of European residents triggers immediate and severe legal exposure under GDPR. This regulation is unique because of its extraterritorial application; it mandates that any entity-regardless of its physical headquarters-must comply if they offer goods or services to, or monitor the behavior of, individuals located within the EU.

In the event of a data breach, GDPR requires organizations to notify the relevant supervisory authority within 72 hours and, in cases of high risk, notify the affected individuals without undue delay. Failure to implement adequate technical and organizational measures to protect data can result in astronomical fines of up to €20 million or 4% of annual global turnover, whichever is higher. While other frameworks like NIST SP 800-53 (often confused with ISO in Option A) or ISO 27001 (Option D) provide the architectural standards and controls to prevent such incidents, they are voluntary standards or frameworks, not legally binding regulations that a company "violates" in the same sense as GDPR. FedRAMP (Option B) is specific to US federal government cloud service providers and would not typically apply to a private marketing firm's global operations. Thus, GDPR represents the primary regulatory threat for a global firm handling international PII.

NEW QUESTION # 17

How does a SOC leverage flow collectors?

- **A. It provides data for analysis in threat detection and response system.**
- B. It performs load balancing capabilities across systems to optimize performance.
- C. It performs data backup and recovery.
- D. It provides real time content filtering.

Answer: A

Explanation:

A flow collector gathers metadata about network traffic (such as NetFlow or IPFIX), which SOC analysts use to analyze communication patterns. This data is critical for threat detection and response, helping identify anomalies, lateral movement, or potential attacks.

NEW QUESTION # 18

.....

As the talent competition increases in the labor market, it has become an accepted fact that the 300-745 certification has become an essential part for a lot of people, especial these people who are looking for a good job, because the certification can help more and more people receive the renewed attention from the leaders of many big companies. So it is very important for a lot of people to gain the 300-745 Certification. We must pay more attention to the certification and try our best to gain the 300-745 certification.
