Advanced ISTQB-CTAL-TA Testing Engine | ISTQB-CTAL-TA New Dumps Ebook

Our ISTQB-CTAL-TA study materials can help you achieve your original goal and help your work career to be smoother and your family life quality to be better and better. There is no exaggeration to say that you will be confident to take part in your exam with only studying our ISTQB-CTAL-TA practice dumps for 20 to 30 hours. And thousands of candidates have achieved their dreams and ambitions with the help of our outstanding ISTQB-CTAL-TA training materials.

ISTQB (ISTQB CTAL-TA) ISTQB Certified Tester Advanced Level - Test Analyst (Syllabus 2012) Sample Questions (Q82-Q87):

NEW QUESTION # 82

As a Test Analyst, you have been given a set of requirements that have been defined for the payment module of a new public transport system. The set includes the following requirements:

P101 The product shall calculate the lowest fare for the destination considering day of week and time, (priority: medium) P102 The product shall compare the traveler's payment with the calculated payment (priority: high) P103 The product shall provide feedback if the payment is not sufficient (priority: high) P104 The product will process payments within 20 seconds at all priority 1 stations during peak hours (priority: high) Which set of requirements will typically be tested by a Test Analyst?

- A. P101, P102, P104
- **B. P101, P102, P103**
- C. P102, P103, P104

- D. P101, P103, P104

Answer: B

NEW QUESTION # 83

You are a Test Analyst in the banking domain. You have received the following requirement: "The system shall allow cash advances of at least 200 Euros for all supported credit cards. The following credit cards are supported: American Express, Diners, Visa, Mastercard and Eurocard.

Which one of the findings described below is true regarding this requirement?

- A. The requirement indicates potential usability problems
- B. The requirement indicates potential performance problems.
- C. The requirement is ambiguous in terms of supported cards.
- D. The requirement is unclear in terms of advance limits.

Answer: D

Explanation:

The finding that is true regarding this requirement is that it is unclear in terms of advance limits. The requirement states that the system shall allow cash advances of at least 200 Euros, but it does not specify what is the maximum amount or if there are any other restrictions or conditions for the cash advances. This makes the requirement ambiguous and incomplete, as it does not provide enough information for testing or implementation. NEW QUESTION # 84

A car navigation system needs to be integrated in the overall car software. It is important to verify that the car navigation is functioning correctly once integrated. Thus functional correctness is considered to be important.

Which of the following techniques is most likely to support the required functional correctness testing?

- A. Multiple condition testing
- B. Heuristic evaluation
- C. Vulnerability scan
- D. State transition testing

Answer: D

Explanation:

The technique that is most likely to support the required functional correctness testing is state transition testing. State transition testing is a technique that tests the behavior of a system or component based on its states and transitions between them. This technique is suitable for testing a system that has different modes or states depending on the input values or events, such as a car navigation system. Verified References:

NEW QUESTION # 85

You work for a company that is a pioneer in smart energy technology. The company is planning to launch a new application for smartphones and tablets that will allow customers to view their energy readings remotely. The application must support customers with disabilities.

The application is being delivered using a hybrid mix of agile and V-model methodologies over three iterations:

- * Iteration 1: Development of the application for the iOS operating system
- * Iteration 2: Enhancement to support the Android operating system
- * Iteration 3: Enhancement to provide daily budget usage

You have been asked to review the risk register and design test conditions for the highest priority product risks that fall into your area of responsibility, relating to Iterations 1 and 2 only.

□ SELECT ONE OPTION

- A. R03
- B. R04

- C. R02
- D. R01

Answer: A

Explanation:

Comprehensive and Detailed in Depth Explanation:

Since the question focuses on Iterations 1 and 2 only, we must prioritize risks related to these iterations.

- * R01(Accessibility): Low likelihood, medium impact - not a priority for initial iterations.
- * R02(Budget calculation): Related to Iteration 3, so it is not relevant to the current test design.
- * R03(Installation issues on iOS and Android): High impact, medium likelihood - relevant for both Iterations 1 and 2. Installation is crucial for ensuring the application works on both platforms.
- * R04(Insufficient testing time): Medium impact and likelihood - important, but R03 is more critical.

Hence, the highest priority risk to address first is R03 (The application may be incorrectly installed on some iOS and Android devices).

NEW QUESTION # 86

Consider the following decision table:

This decision table has been created to test the following specification: Persons that study at a university (C1) and have parents whose total annual income is less than € 30,000 (C2), receive a scholarship. In addition to these qualifications, if they also live away from home (C3), they receive an addition to their scholarship (A2). How many cases are left when this decision table is collapsed?

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

Explanation:

Two cases are left when this decision table is collapsed. A decision table is a technique that shows the combinations of conditions and actions for a given scenario. A decision table that is collapsed eliminates the combinations that are invalid or impossible, such as having a scholarship without meeting the qualifications.

The two valid cases for this scenario are:

- * C1 = Y, C2 = Y, C3 = Y, A1 = Y, A2 = Y
- * C1 = Y, C2 = Y, C3 = N, A1 = Y, A2 = N
