2026 Fortinet FCP_FAZ_AN-7.4: Newest FCP - FortiAnalyzer 7.4 Analyst Exam Collection
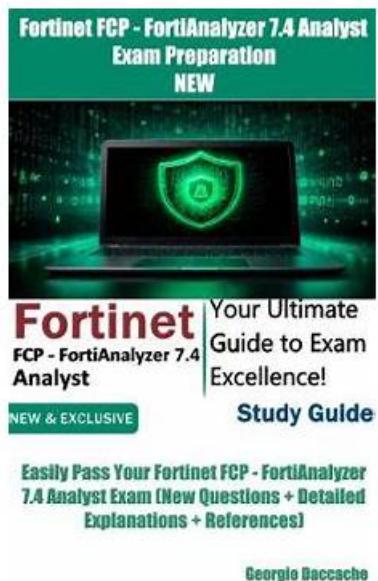

Once you decide to pass the FCP_FAZ_AN-7.4 exam and get the certification, you may encounter many handicaps that you don't know how to deal with, so, you may think that it is difficult to pass the FCP_FAZ_AN-7.4 exam and get the certification. In order to help you solve these problem and help you pass the exam easy, we complied such a FCP_FAZ_AN-7.4 Exam Torrent. We can promise that you will have no regret buying our FCP_FAZ_AN-7.4 exam dumps. Our FCP_FAZ_AN-7.4 exam questions have a high pass rate as 99% to 100%, you will pass with it for sure.

To avoid this situation, we recommend you FCP_FAZ_AN-7.4 real dumps. This product contains everything you need to crack the FCP_FAZ_AN-7.4 certification exam on the first attempt. By choosing PrepAwayTest's updated dumps, you don't have to worry about appearing in the FCP - FortiAnalyzer 7.4 Analyst (FCP_FAZ_AN-7.4) certification exam. PrepAwayTest Fortinet FCP_FAZ_AN-7.4 Dumps are enough to get you through the FCP - FortiAnalyzer 7.4 Analyst (FCP_FAZ_AN-7.4) actual exam on the first try.

FCP_FAZ_AN-7.4 Vce Test Simulator, Dumps FCP_FAZ_AN-7.4 Free

Getting the FCP - FortiAnalyzer 7.4 Analyst (FCP_FAZ_AN-7.4) certification exam is necessary in order to get a job in your desired tech company. Success in the FCP - FortiAnalyzer 7.4 Analyst certification exam gives you an edge over the others because you will have certified skills. The FCP - FortiAnalyzer 7.4 Analyst (FCP_FAZ_AN-7.4) certification exam badge will make a good impression on the interviewer. Most of the people planning to attempt the FCP - FortiAnalyzer 7.4 Analyst (FCP_FAZ_AN-7.4) exam are confused that how will they prepare and pass FCP - FortiAnalyzer 7.4 Analyst (FCP_FAZ_AN-7.4) exam with good grades.

Fortinet FCP_FAZ_AN-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	• Playbooks: This domain measures the skills of Fortinet Network Analysts in creating and managing playbooks. Candidates will explain playbook components and develop workflows that automate responses to security incidents, improving operational efficiency in SOC environments.
Topic 2	• Logging: Candidates will learn about logging mechanisms, log analysis, and gathering log statistics to effectively monitor security events and incidents.
Topic 3	• Reports: This section evaluates the skills of Fortinet Security Analysts in managing reports within FortiAnalyzer. Candidates will learn to create, troubleshoot, and optimize reports to ensure accurate data presentation and insights for security analysis.
Topic 4	• Features and Concepts: This section of the exam measures the skills of Fortinet Security Analysts and covers the fundamental concepts of FortiAnalyzer.
Topic 5	• SOC Events and Incident Management: This domain targets Fortinet Network Analysts and focuses on managing security operations center (SOC) events. Candidates will explain SOC features on FortiAnalyzer, manage events and incidents, and understand the incident lifecycle to enhance incident response capabilities.

Fortinet FCP - FortiAnalyzer 7.4 Analyst Sample Questions (Q32-Q37):

NEW QUESTION # 32
Which two statements are correct regarding the export and import of playbooks? (Choose two.)

- A. You can export only one playbook at a time.
- B. You can import a playbook even if there is another one with the same name in the destination.
- C. A playbook that was disabled when it was exported, will be disabled when it is imported.
- D. Playbooks can be exported and imported only within the same FortiAnalyzer.

Answer: B,C

NEW QUESTION # 33
By default, what happens when a log file reaches its maximum file size?

- A. FortiAnalyzer stops logging.
- B. FortiAnalyzer rolls the active log by renaming the file.
- C. FortiAnalyzer forwards logs to syslog.
- D. FortiAnalyzer overwrites the log files.

Answer: B

NEW QUESTION # 34

When is the execution of a playbook considered as failed?

- A. When the playbook is imported from another ADOM
- B. When at least one of the tasks fails
- C. When the playbook is disabled
- D. When all the tasks fail

Answer: B

NEW QUESTION # 35

Which log will generate an event with the status Contained?

- A. An AppControl log with action=blocked.
- B. An IPS log with action=pass.
- C. An AV log with action=quarantine.
- D. A WebFilter log with action=dropped.

Answer: C

NEW QUESTION # 36

Which two actions should an administrator take to vide Compromised Hosts on FortiAnalyzer? (Choose two.)

- A. Subscribe FortiAnalyzer to FortiGuard to keep its local threat database up to date.
- B. Enable web filtering in firewall policies on FortiGate devices, and make sure these logs are sent to fortiAnalyzer.
- C. Make sure all endpoints are reachable by FortiAnalyzer.
- D. Enable device detection on the FotiGate device that are sending logs to FortiAnalyzer.

Answer: B,D

Explanation:

To viewCompromised Hostson FortiAnalyzer, certain configurations need to be in place on both FortiGate and FortiAnalyzer. Compromised Host data on FortiAnalyzer relies on log information fromFortiGate to analyze threats and compromised activities effectively. Here's why the selected answers are correct:

* Option A: Enable device detection on the FortiGate devices that are sending logs to FortiAnalyzer

* Enabling device detection on FortiGate allows it to recognize and log devices within the network, sending critical information about hosts that could be compromised. This is essential because FortiAnalyzer relies on these logs to determine which hosts may be at risk based on suspicious activities observed by FortiGate. This setting enables FortiGate to provide device-level insights, which FortiAnalyzer uses to populate the Compromised Hosts view.

* Option B: Enable web filtering in firewall policies on FortiGate devices, and make sure these logs are sent to FortiAnalyzer

* Web filtering is crucial in identifying potentially compromised hosts since it logs any access to malicious sites or blocked categories. FortiAnalyzer uses these web filter logs to detect suspicious or malicious web activity, which can indicate compromised hosts. By ensuring that FortiGate sends these web filtering logs to FortiAnalyzer, the administrator enables FortiAnalyzer to analyze and identify hosts engaging in risky behavior.

Let's review the other options for clarity:

* Option C: Make sure all endpoints are reachable by FortiAnalyzer

* This is incorrect. FortiAnalyzer does not need direct access to all endpoints. Instead, it collects data indirectly from FortiGate logs. FortiGate devices are the ones that interact with endpoints and then forward relevant logs to FortiAnalyzer for analysis.

* Option D: Subscribe FortiAnalyzer to FortiGuard to keep its local threat database up to date

* Although subscribing to FortiGuard helps keep threat intelligence updated, it is not a requirement specifically to view compromised hosts. FortiAnalyzer primarily uses logs from FortiGate (such as web filtering and device detection) to detect compromised hosts.

References: According to FortiOS and FortiAnalyzer documentation, device detection on FortiGate and enabling web filtering logs are both recommended steps for populating the Compromised Hosts view on FortiAnalyzer. These logs provide insights into device behaviors and web activity, which are essential for identifying and tracking potentially compromised hosts.

NEW QUESTION # 37
