So just start your journey with ITexamReview and prepare for the Health-Cloud-Accredited-Professional exam instantly.

Salesforce Health Cloud Accredited Professional Sample Questions (Q34-

Q39):

NEW QUESTION # 34

Bloomington Caregivers would like to send patient clinical data to an external payer. How should a consultant advise Bloomington Caregivers to make this information available to the payer using the most cost-effective method in out-of-the-box Health Cloud?

- A. Build a custom remote call-in API into Salesforce.
- B. Use MuleSoft Accelerator with H 7 APL
- **C. Leverage the FHIR R4 Patient API**
- D. Use a third-party tool from AppExchange.

Answer: C

Explanation:

The FHIR R4 Patient API is a Health Cloud feature that allows users to create, update, and query patient data in Salesforce using the Fast Healthcare Interoperability Resources (FHIR) standard¹. FHIR is a widely adopted standard for exchanging healthcare information electronically². By using the FHIR R4 Patient API, Bloomington Caregivers can make their patient clinical data available to the external payer in a cost-effective and interoperable way, without requiring any custom development or third-party tools. The FHIR R4 Patient API supports the US Core Patient profile, which defines the minimum set of data elements for exchanging patient information³.

NEW QUESTION # 35

Bloomington Caregivers is implementing Home Health scheduling with Health Cloud. It must ensure that those who need to schedule the visits have the right permission set license.

Which permission set license should a consultant assign in this scenario?

- A. Manage Home Health
- B. Healthcare visit Manager
- **C. Field Dispatch Scheduler**
- D. Execute Health Scheduling

Answer: C

Explanation:

Implementing Home Health scheduling in Salesforce Health Cloud requires assigning appropriate permission set licenses to users responsible for scheduling patient visits.

Field Dispatch Scheduler Permission Set License:

The Field Dispatch Scheduler permission set license is designed for users who manage and schedule field service operations, including home health visits. Assigning this license grants schedulers access to functionalities necessary for coordinating and dispatching healthcare providers to patient locations. This includes capabilities such as:

* **Scheduling Visits:** Schedulers can create and manage appointments for initial assessments and recurring visits, ensuring that patients receive timely care.

Salesforce

* **Resource Management:** Effectively allocate healthcare providers based on availability, location, and required skills to meet patient needs.

* **Access to Field Service Tools:** Utilize tools within Salesforce to optimize routing, manage workloads, and monitor service delivery.

By assigning the Field Dispatch Scheduler permission set license, Bloomington Caregivers ensures that their scheduling personnel have the necessary access to efficiently coordinate home health services, thereby enhancing operational efficiency and patient satisfaction.

NEW QUESTION # 36

Bloomington Caregivers wants to use patient or member lists for its care coordinators in its current implementation.

What is an important consideration when implementing this in Health Cloud?

- A. If a user cannot access a field used in a filter on a patient or member list, they will not be able to see the list.
- B. An administrator can create lists or add records to existing lists from the Campaign object.
- C. An administrator can create an override filter field on the person account.
- D. Filter logic for patient or member lists is controlled by formula fields on records.

Answer: A

Explanation:

* Access to Filtered Fields:

Exact Extract:

"If a user does not have access to a field that is used in a filter on a patient or member list, the list will not be displayed to that user."

Reference:

* Other Options:

Filter logic is not controlled by formula fields.

There's no official "override filter field" on the person account for lists.

Lists are not created or managed from the Campaign object in Health Cloud.

NEW QUESTION # 37

An Health Cloud administrator has a requirement to display a custom field from the HealthCondition object that categorizes High Risk Conditions on the Patient Card. Which two are steps required to achieve this? (Choose two.)

- A. Create a custom formula field on the Custom HealthCondition object.
- B. Create a custom formula the Account object.
- C. Add the newly created custom formula field on the Patient Card referencing the HealthCondition object.
- D. Create an APEX Trigger to categorize the High Risk Conditions.

Answer: A,C

NEW QUESTION # 38

How would a Health Cloud administrator indicate which tab should appear when a patient record is opened in the Patient Console?

- A. In the CardView dropdown custom setting for that tab, enter Default for Category Name.
- B. In the CardView dropdown custom setting for that tab, enable Default subtab.
- C. In the CardView dropdown custom setting for that tab, select Subtab for Tab Type.
- D. Edit the Patient Card configuration for the tab and enable Default Subtab

Answer: B
