퍼펙트한 CDFOM 시험대비 덤프 최신버전 인증 공부

DumpTOP는 EXIN CDFOM 시험을 패스할 수 있는 아주 좋은 사이트입니다. DumpTOP는 아주 알맞게 최고의 EXIN CDFOM 시험문제와 답 내용을 만들어 냅니다. 덤프는 기존의 시험문제와 답과 시험문제분석 등입니다. DumpTOP에서 제공하는 EXIN CDFOM 시험자료의 문제와 답은 실제 시험의 문제와 답과 아주 비슷합니다.

EXIN CDFOM 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> • Monitoring • Reporting • Control: Addresses performance oversight through monitoring, escalation procedures, reporting, and trend analysis.
주제 2	<ul style="list-style-type: none"> • Service Level Management: Covers creating and managing service agreements, including SLAs with measurable metrics, service reporting, customer satisfaction measurement, and continuous improvement processes.
주제 3	<ul style="list-style-type: none"> • Environmental Sustainability: Focuses on minimizing environmental impact through power efficiency, waste management, and renewable energy integration.
주제 4	<ul style="list-style-type: none"> • Governance, Risk and Compliance: Covers management framework including compliance, risk management, document control, financial management, and vendor oversight.
주제 5	<ul style="list-style-type: none"> • Facilities Management: Covers infrastructure maintenance including maintenance programs, outsourcing, contracts, scheduling, spare parts, and contamination control.
주제 6	<ul style="list-style-type: none"> • Project Management: Covers project execution including management principles, organizational structures, and project phases.
주제 7	<ul style="list-style-type: none"> • Managing Physical Security: Deals with facility protection through security policies, staff management, incident handling, and security audits.
주제 8	<ul style="list-style-type: none"> • Data Centre Operations: Focuses on daily operational activities and procedures supporting continuous facility functioning.
주제 9	<ul style="list-style-type: none"> • Organizational Resilience: Addresses business continuity, facility redundancy, Business Impact Analysis, and disaster recovery preparedness.
주제 10	<ul style="list-style-type: none"> • Managing Safety & Statutory Requirements: Focuses on workplace safety compliance, including safety policies, training, Permit to Work systems, PPE, emergency preparedness, and safety audits.

최신 EPI Data Centre CDFOM 무료 샘플문제 (Q48-Q53):

질문 # 48

To set up a framework for an effective environmental management system, which standard should be followed?

- A. ISO 5001
- B. EU-COC
- C. LEED
- **D. ISO 14001**

정답: D

설명:

For environmental management systems (EMS), the internationally recognized and adopted standard is:

ISO 14001 - Environmental Management Systems

ISO 14001 provides a framework for:

- * Environmental policy
- * Environmental impact assessment
- * Sustainability objectives
- * Compliance obligations
- * Environmental performance monitoring
- * Continuous improvement

Why the other options are incorrect:

- * A - EU-COC: Energy efficiency best practices for data centers, not a full EMS.
- * B - ISO 50001: Energy management standard, focusing on energy efficiency only.
- * C - LEED: Building sustainability certification, not a management system.

Thus, Dis correct.

EPI DCFOM-Aligned Reference Concepts (Paraphrased)

- * ISO 14001 is the recognized standard for environmental management systems.
- * Supports sustainability, compliance, and environmental performance improvement.

질문 # 49

Customer surveys and complaints provide input for

- A. Needs Analysis
- B. Capability assessment
- C. Service portfolio
- **D. Service Improvement Process**

정답: D

설명:

In Service Level Management (SLM), EPI highlights that customer feedback-such as surveys, complaints, and satisfaction assessments-is a core driver for the Service Improvement Process (SIP).

The SIP is designed to:

- * Identify weaknesses in services
- * Address dissatisfaction
- * Improve service delivery quality
- * Optimize process performance
- * Remove recurring issues

Customer surveys and complaints provide:

- * Direct feedback on service experience
- * Indicators of service quality gaps
- * Evidence of unmet expectations
- * Insights for corrective and preventive actions

These are the primary input sources for generating SIP actions.

Why the other options are not correct:

- * A. Needs Analysis- focuses on understanding customer requirements before service definition, not post-operational feedback.
- * C. Capability Assessment- evaluates internal service delivery capability, not customer perception.
- * D. Service Portfolio- defines available services, not improvements.

Therefore, Service Improvement Process is the correct selection.

EPI DCFOM-Aligned Reference Concepts (Paraphrased)

- * SIP is fueled by customer feedback such as complaints and surveys.
- * SLM uses feedback to drive improvements and maintain SLA quality.

질문 # 50

What is the outcome of a risk evaluation process?

- A. The report advising the board of management to accept all identified risks
- **B. The decision whether risk treatment needs to take place**
- C. The required budget treating the data center risk
- D. The list of all identified risks

정답: B

설명:

In the EPI framework for risk management, after the risk identification and risk analysis steps, the risk evaluation step determines whether the assessed risks are acceptable or require treatment based on the organization's risk appetite, criteria, and the potential impact. The evaluation leads to a decision on whether risk treatment needs to take place.

- * It is not simply compiling all risks (so option C is incorrect).
- * It is not exclusively about budgeting (so option D is incorrect) though budgeting follows treatment decisions.
- * It is not necessarily advising to accept all risks (so option B is incorrect) but rather it supports decision-making on treatment.

- * Therefore, option A is correct: the outcome is the decision whether to treat the risk.
- EPI DCFOM-Aligned Reference Concepts
- * Risk evaluation assesses identified and analysed risks against risk criteria to decide on acceptability or need for treatment.
- * The outcome is a documented decision-making step in the risk management process.

질문 # 51

Of the below, which can be used to optimize succession planning?

- A. Disciplinary program
- **B. Career development program**
- C. External recruitment
- D. Relationship with manager

정답: B

설명:

Succession planning ensures organizational continuity by preparing internal staff to step into key roles when needed.

EPI's organizational management framework emphasizes:

* Structured Skill GrowthA Career Development Program provides:

* targeted training

* competency building

* job rotation

* professional certification pathways

* mentorship and development planning

* Identification of Future LeadersThrough career development planning, individuals are tracked, evaluated, and groomed for future responsibilities.

* Internal Capability StrengtheningSuccession planning focuses on internal development first, before external hiring options.

Why the other options are not correct:

* B. Disciplinary programUsed for performance or behavioral issues; it does not contribute to succession planning.

* C. Relationship with managerWhile helpful, it is not a formal tool for succession planning and is not an EPI-recognized structural process.

* D. External recruitmentThis is a remedy when internal succession strength is insufficient-not a tool for optimizing succession planning.

Thus,A - Career development programis the correct choice.

EPI DCFOM-Aligned Reference Concepts (Paraphrased, Not Verbatim)

* Succession planning depends on structured skill development.

* Training, assessment, and career development form the foundation of succession pipelines.

* Job rotation and development programs are integral to organizational continuity.

질문 # 52

Data center operators complain about receiving too many non-alarm conditions.

What is the best response?

- A. Upgrade the monitoring system software to the latest version
- **B. Conduct a review of alarm information**
- C. Retrain staff on how to monitor the data center equipment
- D. Instruct data center operators to ignore the non-alarm notifications

정답: B

설명:

When operators receive excessivenon-alarm notifications, this indicates that:

* Thresholds are not well-configured

* Events are misclassified

* Alarm definitions are incorrect

* Monitoring profiles require tuning

EPI's monitoring best practices state that the correct response is to:

Review alarm information and adjust definitions, thresholds, and filtering.

This ensures that:
