

最有效的FCSS_SASE_AD-24測試題庫 &實用的Fortinet FCSS_SASE_AD-24認證資料：FCSS - FortiSASE 24 Administrator

P.S. KaoGuTi在Google Drive上分享了免費的2026 Fortinet FCSS_SASE_AD-24考試題庫：<https://drive.google.com/open?id=11AJMhv03MRJPaMVapHeUOVCI6dIs9L5T>

許多考生花費了大量的時間和精力學習Fortinet FCSS_SASE_AD-24考試相關知識，但是到最後卻沒有成功，分析他們失敗的原因，我們得出結論是沒有針對性的復習。現在，KaoGuTi專門針對認證考試研發出有針對性的Fortinet FCSS_SASE_AD-24考古題，為考生獲得認證節約更多的時間和金錢。FCSS_SASE_AD-24題庫的高效率和準確性兩大特點讓我們收到廣大考生的好評，獲得如此有價值的認證方案對您來說是非常划算的。

Fortinet FCSS_SASE_AD-24 考試大綱：

主題	簡介
主題 1	<ul style="list-style-type: none">• SASE Deployment: This domain assesses the capabilities of Cloud Security Architects in deploying SASE solutions. It includes implementing various user onboarding methods, configuring administration settings, and applying security posture checks and compliance rules to ensure a secure environment.
主題 2	<ul style="list-style-type: none">• Analytics: This domain evaluates the skills of Data Analysts in utilizing analytics within FortiSASE. It involves identifying potential security threats using traffic logs, configuring dashboards and logging settings, and analyzing reports for user traffic and security issues to enhance overall security posture.
主題 3	<ul style="list-style-type: none">• SIA, SSA, and SPA" This section focuses on the skills of Security Administrators in designing security profiles for content inspection and deploying SD-WAN and Zero Trust Network Access (ZTNA) using SASE. Understanding these concepts is crucial for securing access to applications and data across the network.

主題 4	<ul style="list-style-type: none">• SASE Architecture and Components: This section measures the skills of Network Security Engineers and covers the architecture and components of FortiSASE. It includes integrating FortiSASE into a hybrid network, identifying its components, and constructing deployment cases to effectively implement SASE solutions.

高質量的FCSS_SASE_AD-24測試題庫和準確的Fortinet認證培訓 - 通過無憂Fortinet FCSS - FortiSASE 24 Administrator

KaoGuTi網站在通過FCSS_SASE_AD-24資格認證考試的考生中有著良好的口碑。這是大家都能看得到的事實。KaoGuTi以它強大的考古題得到人們的認可，只要你選擇它作為你的考前復習工具，就會在FCSS_SASE_AD-24資格考試中有非常滿意的收穫，這也是大家有目共睹的。現在馬上去網站下載免費試用版本，你就會相信自己的選擇不會錯。

最新的 Fortinet Certified Solution Specialist FCSS_SASE_AD-24 免費考試真題 (Q30-Q35):

問題 #30

Which security profiles can be applied within FortiSASE for content inspection?

(Select all that apply)

Response:

- A. Data Loss Prevention (DLP) profiles
- B. Load balancing profiles
- C. Antivirus profiles
- D. Web filtering profiles

答案: A,C,D

問題 #31

An organization needs to resolve internal hostnames using its internal rather than public DNS servers for remotely connected endpoints. Which two components must be configured on FortiSASE to achieve this?

(Choose two.)

- A. SSL deep inspection
- B. Split DNS rules
- C. Split tunnelling destinations
- D. DNS filter

答案: A,B

解題說明:

To resolve internal hostnames using internal DNS servers for remotely connected endpoints, the following two components must be configured on FortiSASE:

* Split DNS Rules:

* Split DNS allows the configuration of specific DNS queries to be directed to internal DNS servers instead of public DNS servers.

* This ensures that internal hostnames are resolved using the organization's internal DNS infrastructure, maintaining privacy and accuracy for internal network resources.

* Split Tunneling Destinations:

* Split tunneling allows specific traffic (such as DNS queries for internal domains) to be routed through the VPN tunnel while other traffic is sent directly to the internet.

* By configuring split tunneling destinations, you can ensure that DNS queries for internal hostnames are directed through the VPN to the internal DNS servers.

References:

FortiOS 7.2 Administration Guide: Provides details on configuring split DNS and split tunneling for VPN clients.

FortiSASE 23.2 Documentation: Explains the implementation and configuration of split DNS and split tunneling for securely resolving internal hostnames.

問題 #32

Refer to the exhibits.

The screenshot shows two tables from the FortiSASE interface. The top table, 'Managed Endpoints', lists two endpoints: Win10-Pro and Win7-Pro. Win10-Pro is compliant with 140 vulnerabilities detected, while Win7-Pro is non-compliant with 176 vulnerabilities detected. The bottom table, 'Secure Internet Access Policy', shows a policy named 'Botnet Deny' that denies traffic from Botnet-C&C Servers to all VPN users. Other policies like 'Non-Compliant', 'Web Traffic', 'Allow-All', and 'Implicit Deny' are also listed with their respective actions.

Endpoint	VPN Username	Management Connection	ZTNA Tags (Simple)	FortiClient Version	Vulnerabilities Detected
Win10-Pro	use2@fortinettraining.lab	Online	FortiSASE-Compliant	7.0.200538	140
Win7-Pro	use1@fortinettraining.lab	Online	FortiSASE-Non-Compliant, FortiSASE-Compliant	7.0.8-2437	176

Name	Profile Group	Source	User	Action
Botnet Deny		Botnet-C&C.Server	All VPN Users	Deny
Non-Compliant	FortiSASE-Non-Compliant		All VPN Users	Deny
Web Traffic	SIA	FortiSASE-Compliant	VPN_Users	Accept
Allow-All	Default		All VPN Users	Accept
Implicit Deny			All VPN Users	Deny

Win10-Pro and Win7-Pro are endpoints from the same remote location. Win10-Pro can access the internet through FortiSASE, while Win7-Pro can no longer access the internet. Given the exhibits, which reason explains the outage on Win7-Pro?

- A. Win-7 Pro has exceeded the total vulnerability detected threshold.
- B. The Win7-Pro FortiClient version does not match the FortiSASE endpoint requirement.
- C. The Win7-Pro device posture has changed.
- D. Win7-Pro cannot reach the FortiSASE SSL VPN gateway

答案： A

解題說明：

Based on the provided exhibits, the reason why the Win7-Pro endpoint can no longer access the internet through FortiSASE is due to exceeding the total vulnerability detected threshold. This threshold is used to determine if a device is compliant with the security requirements to access the network.

* Endpoint Compliance:

* FortiSASE monitors endpoint compliance by assessing various security parameters, including the number of vulnerabilities detected on the device.

* The compliance status is indicated by the ZTNA tags and the vulnerabilities detected.

* Vulnerability Threshold:

* The exhibit shows that Win7-Pro has 176 vulnerabilities detected, whereas Win10-Pro has 140 vulnerabilities.

* If the endpoint exceeds a predefined vulnerability threshold, it may be restricted from accessing the network to ensure overall network security.

* Impact on Network Access:

* Since Win7-Pro has exceeded the vulnerability threshold, it is marked as non-compliant and subsequently loses internet access through FortiSASE.

* The FortiSASE endpoint profile enforces this compliance check to prevent potentially vulnerable devices from accessing the internet.

References:

FortiOS 7.2 Administration Guide: Provides information on endpoint compliance and vulnerability management.

FortiSASE 23.2 Documentation: Explains how vulnerability thresholds are used to determine endpoint compliance and access control.

問題 #33

Which command is used in FortiOS to generate a report on real-time security events in FortiSASE?

Response:

- A. get system status

- B. execute report generate
- C. get security-event report
- D. diagnose sys security-event report

答案： D

問題 #34

What access point communication protocol does FortiAP use to communicate with FortiSASE in a micro branch deployment?

- A. Inter-Access Point Protocol (IAPP)
- B. Lightweight Access Point Protocol (LWAPP)
- C. Wireless Application Protocol (WAP)
- D. Control and Provisioning of Wireless Access Points (CAPWAP)

答案： D

問題 #35
