Latest JN0-481 Test Preparation & Latest JN0-481 Test Cram

The desktop practice test format comes with all features of the web-based practice exam. Prep4sures has made all of the different formats so the exam applicants won't face any additional issues and prepare themselves with the real questions and crack Juniper JN0-481 Certification test for the betterment of their futures. One can set the time and questions numbers of practice exams (desktop and web-based) according to their needs. Prep4sures is giving multiple mock exams to the customers so they can practice and make themselves perfect.

Juniper Data Center, Specialist (JNCIS-DC) Sample Questions (Q43-Q48):

NEW QUESTION # 43

You are adding a new switch to Juniper Apstra software. The Managed Devices page shows the "0 OS- Quarantined" status. What is the proper next step to make the device ready for use in a blueprint?

- A. Take the device out of maintenance mode.
- B. Install the agent for the device.
- C. Take the device out of drain state.
- D. Acknowledge the device.

Answer: D

Explanation:

When a new switch is added to Juniper Apstra software, it initially shows the "0 OS-Quarantined" status, which means that the device is not yet managed by Apstra and has not been assigned to any blueprint. The proper next step to make the device ready for use in a blueprint is to acknowledge the device, which is a manual action that confirms the device identity and ownership. Acknowledging the device changes its status to "OOS-Ready", which means that the device is ready to be assigned to a blueprint and deployed.

NEW QUESTION # 44

Which two statements are correct about probes? (Choose two.)

- A. Default probes are enabled, based on the intent for a blueprint.
- B. Only the variable parameters for default probes can be edited and saved.
- C. All default probes are enabled for all blueprints.
- D. Default probes can be cloned, modified, and saved.

Answer: A,D

Explanation:

Probes are the basic unit of abstraction in Intent-Based Analytics (IBA). They are used to collect, process, and analyze data from the network and raise anomalies based on specified conditions.

Probes are composed of processors and stages that form a directed acyclic graph (DAG) of data flow.

NEW QUESTION # 45

In the Juniper Apstra UI, You are creating a VNI pool for virtual networks.

In this scenario, which VNI range is acceptable?

- A. The valid VNI range is 4096 through 16777214.
- B. Any range is acceptable for the VNI pool.
- C. The valid VNI range is 1 through 10000.
- D. The valid VNI range is 2 through 4096.

Answer: A

Explanation:

In the Juniper Apstra UI, you can create VNI pools for virtual networks that use VXLAN encapsulation in the overlay network. A VNI pool is a resource pool that contains a range of VNIs that can be assigned to the virtual networks. The valid VNI range for a VNI pool is 4096 through

16777214, according to the VXLAN standard. Therefore, the statement B is correct in this scenario. The following three statements are incorrect in this scenario:

Any range is acceptable for the VNI pool. This is not true, because the VNI range has a lower and upper limit defined by the VXLAN standard. The lower limit is 4096, and the upper limit is

16777214. Any VNI outside this range is invalid and cannot be used for VXLAN encapsulation.

The valid VNI range is 2 through 4096. This is not true, because the VNI range does not start from 2, but from 4096. The VNIs from 2 to 4095 are reserved and cannot be used for VXLAN encapsulation. The valid VNI range is 1 through 10000. This is not true, because the VNI range does not include 1, which is also reserved and cannot be used for VXLAN encapsulation. The VNI range also does not end at 10000, but at 16777214, which is the maximum possible value for a 24-bit VNI field.

NEW QUESTION # 46

Multitenancy for applications is achieved by creating virtual networks (VNs) within which construct?

- A. connectivity template
- B. routing table
- C. security policy
- D. routing zone

Answer: D

Explanation:

A routing zone is an L3 domain, the unit of tenancy in multi-tenant networks. You create routing zones for tenants to isolate their IP traffic from one another, thus enabling tenants to re-use IP subnets. In addition to being in its own VRF, each routing zone can be assigned its own DHCP relay server and external system connections. You can create one or more virtual networks within a routing zone, which means a tenant can stretch its L2 applications across multiple racks within its routing zone.

NEW QUESTION # 47

A member of your organization made changes to a predefined interface map using Juniper Apstra. Which two statements are correct in this scenario? (Choose two.)

- A. Changes made to predefined interface maps will not have an impact on the Apstra software.
- **B. Any changes made to predefined interface maps are discarded when Apstra is upgraded.**
- C. Changes to interface maps in the global catalog will raise anomalies that may need to be addressed at the next commit.
- **D. Changes to interface maps in the global catalog do not affect interface maps that have already been imported into blueprint catalogs**

Answer: B,D

Explanation:

An interface map is a configuration template that maps interfaces between logical devices and physical hardware devices (represented with device profiles) while adhering to vendor specifications. An interface map can be either predefined or custom. A predefined interface map is one that ships with Apstra software and supports most qualified Juniper devices. A custom interface map is one that is created by the user to meet specific requirements. An interface map can be stored in either the global catalog or the blueprint catalog. The global catalog contains all the interface maps that are available for use in any blueprint. The blueprint catalog contains the interface maps that are imported from the global catalog and used in a specific blueprint.

NEW QUESTION # 48

.....

Prep4sures is a leading provider of top-quality Data Center, Specialist (JNCIS-DC) (JN0-481) preparation material for the JN0-481 test. Our Data Center, Specialist (JNCIS-DC) (JN0-481) exam questions are designed to help customers get success on the first try. These latest Juniper JN0-481 Questions are the result of extensive research by a team of professionals with years of experience.

Latest JN0-481 Test Preparation: <https://www.prep4sures.top/JN0-481-exam-dumps-torrent.html>

Juniper JN0-481 Accurate Study Material And keeping the overall situation in mind and considering the competition among sellers, we offer you 100% refund policy, JN0-481 practice exam enables applicants to practice time management, answer strategies, and all other elements of the final Data Center, Specialist (JNCIS-DC) (JN0-481) certification exam and can check their scores, After doing detailed self-assessment, it will become a lot easier for you to clear Juniper JN0-481 exam on the first attempt.

How Do I Use Lighting to Help Me Accomplish the Aforementioned JN0-481 Things, As bad as malware is, being fed a bunch of irrelevant ads or worse) can be more than just annoying.

And keeping the overall situation in mind and considering the competition among sellers, we offer you 100% refund policy, JN0-481 Practice Exam enables applicants to practice time management, answer strategies, and all other elements of the final Data Center, Specialist (JNCIS-DC) (JN0-481) certification exam and can check their scores.

Pass-Sure JN0-481 Accurate Study Material offer you accurate Latest Test Preparation | Juniper Data Center, Specialist (JNCIS-DC)

After doing detailed self-assessment, it will become a lot easier for you to clear Juniper JN0-481 exam on the first attempt, Dedication to providing the accurate Data Center, Specialist (JNCIS-DC) test questions and answers, along with brief descriptions.

We offer you free update for one year for JN0-481 training materials, and the update version will be sent to your email address automatically.
