So our Salesforce-Data-Cloud Study Guide is efficient, high-quality for you. Such high quality and low price traits of our Salesforce-Data-Cloud guide materials make exam candidates reassured.

### Salesforce Data Cloud Accredited Professional Exam Sample Questions (Q81-Q86):

#### NEW QUESTION # 81

When can the data types be changed during ingestion?

- A. Data type can never be changed
- B. Data type can be changed at any time
- C. After the DSO is created
- D. Before DSO is created

**Answer: D**

Explanation:

The data types can be changed during ingestion before the Data Source Object (DSO) is created. A DSO is a container for ingested data that defines the schema, format, and metadata of the data. Data types can be changed in the Data Explorer before creating a DSO by using the Edit Schema option. Once a DSO is created, the data types cannot be changed. Reference: Create a Data Source Object

#### NEW QUESTION # 82

Which two statements are true about using consent API and exercising right to be forgotten?

- A. Data Deletion requests are submitted for Individual profiles
- B. Data Deletion requests are processed within 1 hour
- C. Data deletion requests submitted to DataCloud are passed to all connected Salesforce Clouds
- D. Data Deletion requests are reprocessed at 30, 60, and 90 days

**Answer: A,D**

Explanation:

These two statements are true about using consent API and exercising right to be forgotten. Data deletion requests are reprocessed at regular intervals to ensure that any new data related to the individual is deleted.

Data deletion requests are submitted for individual profiles that represent unique identities in Data

Cloud. References: [https://help.salesforce.com/s/articleView?id=sf.c360\\_a\\_data\\_cloud\\_consent\\_api.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.c360_a_data_cloud_consent_api.htm&type=5)

#### NEW QUESTION # 83

What should a user do to pause a segment activation with the intent of using that segment again?

- A. Skip the activation.
- B. Stop the publish schedule.
- C. Delete the segment.
- D. Deactivate the segment.

**Answer: D**

Explanation:

The correct answer is A. Deactivate the segment. If a segment is no longer needed, it can be deactivated through Data Cloud and applies to all chosen targets. A deactivated segment no longer publishes, but it can be reactivated at any time<sup>1</sup>. This option allows the user to pause a segment activation with the intent of using that segment again.

The other options are incorrect for the following reasons:

B). Delete the segment. This option permanently removes the segment from Data Cloud and cannot be undone<sup>2</sup>. This option does

not allow the user to use the segment again.

C). Skip the activation. This option skips the current activation cycle for the segment, but does not affect the future activation cycles<sup>3</sup>. This option does not pause the segment activation indefinitely.

D). Stop the publish schedule. This option stops the segment from publishing to the chosen targets, but does not deactivate the segment<sup>4</sup>. This option does not pause the segment activation completely.

1: Deactivated Segment article on Salesforce Help

2: Delete a Segment article on Salesforce Help

3: Skip an Activation article on Salesforce Help

4: Stop a Publish Schedule article on Salesforce Help

#### NEW QUESTION # 84

Which tool allows users to visualize and analyze unified customer data in Data Cloud?

- A. Salesforce CLI
- B. Einstein Analytics
- C. Tableau
- D. Heroku

**Answer: C**

Explanation:

Salesforce Data Cloud Overview: Salesforce Data Cloud enables organizations to unify and manage customer data from multiple sources, providing a comprehensive view of customer interactions and behaviors.

Visualization and Analysis: For visualizing and analyzing this unified data, Salesforce provides multiple tools, each serving different purposes. Tableau is particularly noted for its advanced analytics and visualization capabilities.

Tableau Integration: Tableau is integrated with Salesforce, allowing users to create detailed and interactive visualizations. It can connect directly to Salesforce Data Cloud, pulling in unified data for comprehensive analysis.

Capabilities: Tableau supports a wide range of data sources and formats, offering drag-and-drop features to create complex charts and dashboards. This makes it an ideal tool for analyzing the rich datasets managed within Salesforce Data Cloud.

Salesforce Data Cloud Overview

#### NEW QUESTION # 85

A customer has requested that their personal data be deleted. Which action should be performed to accommodate this request in Data Cloud?

- A. Utilize the Data Rights Subject Request tool to request deletion of the customer's information
- B. Use Ingestion API to request deletion of the customer's information
- C. Use Consent API to request deletion of the customer's information
- D. Manually delete customer and related records using the Profile Explorer

**Answer: C**

Explanation:

This action should be performed to accommodate the request to delete personal data in Data Cloud. The Consent API allows you to set a consent flag for an individual that prevents further processing of their data and deletes their records from source data streams. Reference: [https://help.salesforce.com/s/articleView?id=sf.c360\\_a\\_data\\_cloud\\_consent\\_api.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.c360_a_data_cloud_consent_api.htm&type=5)
