

Unparalleled AZ-204 Test Assessment - Easy and Guaranteed AZ-204 Exam Success

P.S. Free 2026 Microsoft AZ-204 dumps are available on Google Drive shared by ExamcollectionPass:
<https://drive.google.com/open?id=1rPLPwk8vezCv69hjRg9mrwE7d-Pt8BHz>

It is time for you to plan your life carefully. After all, you have to make money by yourself. If you want to find a desirable job, you must rely on your ability to get the job. Now, our AZ-204 study materials will help you master the popular skills in the office. Believe it or not, our AZ-204 Study Materials will relieve you from poverty. It is important to make large amounts of money in modern society.

If you are worry about the coming AZ-204 study materials, our study materials will help you solve your problem. In order to promise the high quality of our AZ-204 study materials, our company has outstanding technical staff, and has perfect service system after sale. More importantly, our good AZ-204 guide questions and perfect after sale service are approbated by our local and international customers. If you want to pass your practice exam, we believe that our learning engine will be your indispensable choices. More and more people have bought our AZ-204 Guide questions in the past years.

Guaranteed AZ-204 Questions Answers | Latest Real AZ-204 Exam

If you use the trial version of our AZ-204 study materials, you will find that our products are very useful for you to pass your exam and get the certification. Though the trail version of our AZ-204 learning guide only contains a small part of the exam questions and answers, but it shows the quality and validity. If you buy our AZ-204 Exam Questions, we can promise that you will pass the exam for sure and gain the according the certification.

Microsoft Developing Solutions for Microsoft Azure Sample Questions (Q460-Q465):

NEW QUESTION # 460

Hotspot Question

You are developing a workflow solution using Azure technologies.

What should you implement to meet each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Microsoft

Requirement

Tool

Debug the solution by using Visual Studio.

Durable functions only
Logic Apps only
Durable functions and Logic Apps

Use a collection of ready-made actions.

Durable functions only
Logic Apps only
Durable functions and Logic Apps

Deploy the component by using Visual Studio Team Services.

Durable functions only
Logic Apps only
Durable functions and Logic Apps

Answer:

Explanation:

Answer Area

Requirement	Tool
Debug the solution by using Visual Studio.	<p>Durable functions only</p> <p>Logic Apps only</p> <p>Durable functions and Logic Apps</p>
Use a collection of ready-made actions.	<p>Durable functions only</p> <p>Logic Apps only</p> <p>Durable functions and Logic Apps</p>
Deploy the component by using Visual Studio Team Services.	<p>Durable functions only</p> <p>Logic Apps only</p> <p>Durable functions and Logic Apps</p>

Explanation:

Box 1: Logic Apps only

You can manually trigger a logic app deployed in Azure from Visual Studio. On the Logic App Designer toolbar, choose Run Trigger.

To check the status and diagnose problems with logic app runs, you can review the details, such as inputs and outputs, for those runs in Visual Studio.

Box 2: Durable functions only

Box 3: Durable functions and Logic Apps

NEW QUESTION # 461

Your company has several websites that use a company logo image. You use Azure Content Delivery Network (CDN) to store the static image.

You need to determine the correct process of how the CDN and the Point of Presence (POP) server will distribute the image and

list the items in the correct order.

In which order do the actions occur? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Actions

A user requests the image from the CDN URL. The DNS routes the request to the best performing POP location.

Subsequent requests for the file may be directed to the same POP using the CDN logo image URL. The POP edge server returns the files from cache if the TTL has not expired.

If no edge servers in the POP have the image in cache, the POP requests the file from the origin server.

The origin server returns the logo image to an edge server in the POP. An edge server in the POP caches the logo image and returns the image to the client.

Answer Area

 Microsoft

Answer:

Explanation:

Explanation

A user requests the image from the CDN URL. The DNS routes the request to the best performing POP location.

If no edge servers in the POP have the image in cache, the POP requests the file from the origin server.

The origin server returns the logo image to an edge server in the POP. An edge server in the POP caches the logo image and returns the image to the client.

Subsequent requests for the file may be directed to the same POP using the CDN logo image URL. The POP edge server returns the files from cache if the TTL has not expired.

Step 1: A user requests the image..

A user requests a file (also called an asset) by using a URL with a special domain name, such as <endpoint name>.azureedge.net. This name can be an endpoint hostname or a custom domain. The DNS routes the request to the best performing POP location, which is usually the POP that is geographically closest to the user.

Step 2: If no edge servers in the POP have the..

If no edge servers in the POP have the file in their cache, the POP requests the file from the origin server. The origin server can be an Azure Web App, Azure Cloud Service, Azure Storage account, or any publicly accessible web server.

Step 3: The origin server returns the..

The origin server returns the file to an edge server in the POP.

An edge server in the POP caches the file and returns the file to the original requestor (Alice). The file remains cached on the edge server in the POP until the time-to-live (TTL) specified by its HTTP headers expires. If the origin server didn't specify a TTL, the default TTL is seven days.

Step 4: Subsequent requests for..

Additional users can then request the same file by using the same URL that the original user used, and can also be directed to the

same POP.

If the TTL for the file hasn't expired, the POP edge server returns the file directly from the cache. This process results in a faster, more responsive user experience.

NEW QUESTION # 462

Case Study 4 - Best for You Organics

Background

Best for You Organics Company is a global restaurant franchise that has multiple locations. The company wants to enhance user experiences and vendor integrations. The company plans to implement automated mobile ordering and delivery services.

Best For You Organics hosts an Azure web app at the URL <https://www.bestforyouorganics.com>.

Users can use the web app to browse restaurant locations, menu items, nutritional information, and company information. The company developed and deployed a cross-platform mobile app.

Requirements

You must develop a chatbot by using the Bot Builder SDK and Language Understanding Intelligence Service (LUIS). The chatbot must allow users to order food for pickup or delivery.

The chatbot must meet the following requirements:

- * Ensure that chatbot endpoint can be accessed only by the Bot Framework connector.
- * Use natural language processing and speech recognition so that users can interact with the chatbot by using text and voice.

Processing must be server-based.

- * Alert users about promotions at local restaurants.
- * Enable users to place an order for delivery or pickup by using their voice.
- * Greet the user upon sign-in by displaying a graphical interface that contains action buttons.
- * The chatbot greeting interface must match the formatting of the following example:

Vendor API

Vendors receive and provide updates for the restaurant inventory and delivery services by using Azure API Management hosted APIs. Each vendor uses their own subscription to access each of the APIs.

APIs must meet the following conditions:

- * API usage must not exceed 5,000 calls and 50,000 kilobytes of bandwidth per hour per vendor.
- * If a vendor is nearing the number of calls or bandwidth limit, the API must trigger email notifications to the vendor.
- * APIs must prevent API usage spikes on a per-subscription basis by limiting the call rate to 100 calls per minute.
- * The Inventory API must be written by using ASP.NET Core and Node.js.
- * The API must be updated to provide an interface to Azure SQL Database. Database objects must be managed by using code.
- * The Delivery API must be protected by using the OAuth 2.0 protocol with Azure Active Directory (Azure AD) when called from the Azure web app. You register the Delivery API and web app in Azure AD. You enable OAuth 2.0 in the web app.
- * The delivery API must update the Products table, the Vendor transactions table, and the Billing table in a single transaction.

The Best For You Organics Company architecture team has created the following diagram depicting the expected deployments into

Azure:

Delivery API

The Delivery API intermittently throws the following exception:

Chatbot greeting

The chatbot's greeting does not show the user's name. You need to debug the chatbot locally.

Language processing

Users report that the bot fails to understand when a customer attempts to order dishes that use Italian names.

Relevant portions of the app files are shown below. Line numbers are included for reference only and include a two-character prefix that denotes the specific file to which they belong.

Startup.cs

You need to resolve the delivery API error.

What should you do?

- A. Implement exponential backoff by using the EnableRetryOnFailure feature of Entity Framework.
- **B. Implement simple retry by using the EnableRetryOnFailure feature of Entity Framework.**
- C. Invoke custom execution strategy in Entity Framework.
- D. Implement the Circuit Breaker pattern by using the EnableRetryOnFailure feature of Entity Framework.

Answer: B

Explanation:

Scenario: The Delivery API intermittently throws the following exception:

A useful method to get rid of this error is to use RETRY LOGIC of Entity Framework 1.1.0 services.AddDbContext<DbContext> (options => options.UseSqlServer('yourconnectionstring', ...sqlServerOptionsAction: sqlOptions =>

```
...{  
.....sqlOptions.EnableRetryOnFailure(  
.....maxRetryCount: 5,  
.....maxRetryDelay: TimeSpan.FromSeconds(30),  
.....errorNumbersToAdd: new List<int>() { 19 });  
...});
```

In Retry logic, error 19 is not included. So you have to pass the error code 19 to set retry logic for error code 19.

NEW QUESTION # 463

You are developing an application that uses Azure Storage to store customer data. The data must only be decrypted by the customer and the customer must be provided a script to rotate keys.

You need to provide a script to rotate keys to the customer.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 464

A company develops a series of mobile games. All games use a single leaderboard service.

You have the following requirements:

*Code should be scalable and allow for growth.

*Each record must consist of a playerId, gameId, score, and time played.

*When users reach a new high score, the system will save the new score using the SaveScore function below.

*Each game is assigned an Id based on the series title.

You have the following code. (Line numbers are included for reference only.)

You store customer information in an Azure Cosmos database. The following data already exists in the database:

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

□ Explanation:

□ Box 1: Yes

Code for CosmosDB, example:

```
// Parse the connection string and return a reference to the storage account.
```

```
CloudStorageAccount storageAccount = CloudStorageAccount.Parse(
```

```
CloudConfigurationManager.GetSetting("StorageConnectionString"));
```

```
// Create the table client.
```

```
CloudTableClient tableClient = storageAccount.CreateCloudTableClient();
```

```
// Retrieve a reference to the table.
```

```
CloudTable table = tableClient.GetTableReference("people");
```

```
// Create the TableOperation object that inserts the customer entity.
```

```
TableOperation insertOperation = TableOperation.Insert(customer1);
```

Box 2: No

A new record will always be added as TableOperation.Insert is used, instead of TableOperation.InsertOrReplace.

Box 3: No

No partition key is used.

Box 4: Yes

NEW QUESTION # 465

.....

The Microsoft AZ-204 exam questions formats are PDF dumps files, desktop practice test software, and web-based practice test software. All these AZ-204 exam questions format hold some common and unique features. Such as AZ-204 PDF dumps file is the PDF version of Prepare for your Microsoft AZ-204 Exam Dumps that works with all operating systems and devices. Whereas the other two AZ-204 practice test questions formats are concerned, both are the mock Microsoft AZ-204 exam.

Guaranteed AZ-204 Questions Answers: <https://www.examcollectionpass.com/Microsoft/AZ-204-practice-exam-dumps.html>

ExamcollectionPass Guaranteed AZ-204 Questions Answers is offering services in this industry for 15 years, PDF AZ-204 exam questions and answers can be run on any portable device or on your desktop computer, Our AZ-204 training materials cover the most content of the real exam and the accuracy of our AZ-204 test answers is 100% guaranteed, Microsoft AZ-204 Test Assessment You can choose to accept or decline cookies.

Delens holistic approach covers key data mining processes and methods, Guaranteed AZ-204 Questions Answers relevant data management techniques, tools and metrics, advanced text and web mining, big data integration, and much more.

Free PDF 2026 AZ-204: Trustable Developing Solutions for Microsoft Azure Test Assessment

That way, if a meteorite destroys your house, or if you are a victim AZ-204 of theft, fire or flood, you will always have another copy of your precious photos in an organized fashion intact and safe.

ExamcollectionPass is offering services in this industry for 15 years, PDF AZ-204 exam questions and answers can be run on any portable device or on your desktop computer.

Our AZ-204 training materials cover the most content of the real exam and the accuracy of our AZ-204 test answers is 100% guaranteed, You can choose to accept or decline cookies.

This is why we have designed Developing Solutions for Microsoft Azure dumps to be such that they can be used to prepare for Microsoft AZ-204 exam without any hard work.
