Belive it or not, our efficient and authoritative CCAAK exam materials are always here waiting for you to provide you with the best help of CCAAK exam preparation. Maybe you just need a CCAAK exam certification to realize your dream of promotion. We know that impulse spending will make you regret, so we suggest that you first download our free demo to check before purchasing. You can easily download our free demo of CCAAK Exam; come on and try it.

Confluent CCAAK Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Deployment Architecture: This section of the exam measures skills of a Kafka Administrator and covers different Kafka deployment topologies. It evaluates understanding of high availability, disaster recovery, multi-data center replication, and the roles of Zookeeper or KRaft in the cluster architecture.
Topic 2	<ul style="list-style-type: none">• Kafka Connect: This section of the exam measures skills of a Site Reliability Engineer and addresses the use and management of Kafka Connect for data integration. It includes setting up connectors, managing configurations, and ensuring efficient movement of data between Kafka and external systems.
Topic 3	<ul style="list-style-type: none">• Apache Kafka® Fundamentals: This section of the exam measures skills of a Kafka Administrator and covers core concepts such as Kafka architecture, components, and data flow. It assesses the candidate's understanding of topics like topics and partitions, brokers, producers, consumers, and message retention.
Topic 4	<ul style="list-style-type: none">• Apache Kafka® Cluster Configuration: This section of the exam measures skills of a Kafka Administrator and includes configuring broker properties, tuning for performance, managing topic-level settings, and applying best practices for production-grade environments.

CCAAK Examcollection Vce, Reliable CCAAK Braindumps Free

Customizable Confluent CCAAK practice exams (desktop and web-based) of It-Tests are designed to give you the best learning experience. You can attempt these CCAAK practice tests multiple times till the best preparation for the Confluent Certified Administrator for Apache Kafka (CCAAK) test. On every take, our Confluent CCAAK practice tests save your progress so you can view it to see and strengthen your weak concepts easily.

Confluent Certified Administrator for Apache Kafka Sample Questions (Q19-Q24):

NEW QUESTION # 19

Your organization has a mission-critical Kafka cluster that must be highly available. A Disaster Recovery (DR) cluster has been set up using Replicator, and data is continuously being replicated from source cluster to the DR cluster. However, you notice that the message on offset 1002 on source cluster does not seem to match with offset 1002 on the destination DR cluster.

Which statement is correct?

- A. The DR cluster is lagging behind updates; once the DR cluster catches up, the messages will match.
- B. The message on DR cluster got over-written accidentally by another application.
- C. The offsets for the messages on the source, destination cluster may not match.
- D. The message was updated on source cluster, but the update did not flow into destination DR cluster and errored.

Answer: C

Explanation:

When using Confluent Replicator (or MirrorMaker), offsets are not preserved between the source and destination Kafka clusters. Messages are replicated based on content, but they are assigned new offsets in the DR (destination) cluster. Therefore, offset 1002 on the source and offset 1002 on the DR cluster likely refer to different messages, which is expected behavior.

NEW QUESTION # 20

An employee in the reporting department needs assistance because their data feed is slowing down. You start by quickly checking the consumer lag for the clients on the data stream.

Which command will allow you to quickly check for lag on the consumers?

- A. bin/kafka-consumer-lag.sh
- B. bin/kafka-reassign-partitions.sh
- C. bin/kafka-consumer-group-throughput.sh
- D. bin/kafka-consumer-groups.sh

Answer: D

Explanation:

The kafka-consumer-groups.sh script is used to inspect consumer group details, including consumer lag, which indicates how far behind a consumer is from the latest data in the partition.

The typical usage is bin/kafka-consumer-groups.sh --bootstrap-server <broker> --describe --group <group_id>

NEW QUESTION # 21

How does Kafka guarantee message integrity after a message is written on a disk?

- A. Only message metadata can be altered using command line (CLI) tools.
- B. A message can be edited by the producer, producing to the message offset.
- C. A message cannot be altered once it has been written.
- C A message can be grouped with message sharing the same key to improve read performance

Answer: C

Explanation:

Kafka ensures message immutability for data integrity. Once a message is written to a Kafka topic and persisted to disk, it cannot be modified. This immutability guarantees that consumers always receive the original message content, which is critical for auditability,

fault tolerance, and data reliability.

NEW QUESTION # 22

Why does Kafka use ZooKeeper? (Choose two.)

- A. To scale the number of brokers in the cluster
- B. To prevent replication between clusters
- C. For controller election
- D. To access information about the leaders and partitions

Answer: C,D

Explanation:

ZooKeeper stores metadata such as partition leadership and ISR (in-sync replicas), which brokers use to coordinate.

Kafka uses ZooKeeper to perform leader election for the Controller broker, which manages cluster metadata and leadership changes.

NEW QUESTION # 23

What is the relationship between topics and partitions? (Choose two.)

- A. A topic may have more than one partition.
- B. A topic always has one partition.
- C. A partition is always linked to a single topic.
- D. A partition may have more than one topic.
- E. There is no relationship between topics and partitions.

Answer: A,C

Explanation:

Kafka topics are split into one or more partitions to enable parallelism and scalability.

Each partition belongs to exactly one topic; it cannot span multiple topics.

NEW QUESTION # 24

.....

You will have prior experience in answering questions with adjustable time. With these features, you will improve your Confluent Certified Administrator for Apache Kafka CCAAK exam confidence and time management skills. Many candidates prefer to prepare for the Confluent Certified Administrator for Apache Kafka CCAAK Exam Dumps using different formats. The Confluent Certified Administrator for Apache Kafka CCAAK exam questions were designed in different formats so that every candidate could select what suited them best.
