An engineer needs to deploy a leaf access port policy group in ACI Fabric to support the following requirements:

- Control the amount of application data flowing into the system
- Allow the newly connected device to auto-negotiate link speed with the leaf switch

Which two ACI policies must be configured to achieve these requirements? (Choose two)

<input type="checkbox"/>	A. link level policy
<input type="checkbox"/>	B. L2 interface policy
<input type="checkbox"/>	C. slow drain policy
<input type="checkbox"/>	D. ingress data plane policing policy
<input type="checkbox"/>	E. ingress control plane policing policy

Our staff will be on-line service 24 hours a day. I believe that you have also contacted a lot of service personnel, but I still imagine you praise the staff of our 300-620 study engine. They have the best skills and the most professional service attitude on the 300-620 Practice Questions. He can solve any problems you have encountered while using 300-620 exam simulating for all of our staffs are trained to be professional to help our customers. And they are kind and considerate.

You can learn our 300-620 test prep in the laptops or your cellphone and study easily and pleasantly as we have different types, or you can print our PDF version to prepare your exam which can be printed into papers and is convenient to make notes. Studying our 300-620 exam preparation doesn't take you much time and if you stick to learning you will finally pass the exam successfully. Believe us because the 300-620 Test Prep are the most useful and efficient, and the 300-620 exam preparation will make you master the important information and the focus of the exam. We are sincerely hoping to help you pass the exam.

Hot Practice 300-620 Exam 100% Pass | High Pass-Rate 300-620 Valid Exam Braindumps: Implementing Cisco Application Centric Infrastructure

Thus, you can see how a single decision can bring a lot of positive and fruitful changes in your life. However, if you are thinking about what if you were not able to get the Cisco 300-620 certification or pass the Implementing Cisco Application Centric Infrastructure (300-620) exam? Don't worry, you will find it easy to adjust to this new thing and get complete support from the PassCollection who offer Cisco 300-620 Exam Questions and practice exams for the Cisco 300-620 certification exam

Cisco ACI is a comprehensive solution that provides a centralized policy-driven management approach for data center networks. It enables organizations to automate network provisioning, simplify network management tasks, and improve application performance. The Cisco 300-620 exam covers various topics related to Cisco ACI, including policy model, fabric discovery and initialization, application network profiles, endpoint groups, and contracts.

To pass the Cisco 300-620 Exam, candidates need to demonstrate their understanding of ACI architecture, policies, and operations, as well as their ability to configure and troubleshoot ACI fabric components, such as switches, routers, and controllers. 300-620 exam also covers topics related to automation and orchestration, including the use of APIs and scripting languages to automate routine tasks and the integration of ACI with other IT systems and services.

Cisco Implementing Cisco Application Centric Infrastructure Sample Questions (Q366-Q371):

NEW QUESTION # 366

Refer to the exhibit. A Cisco ACI fabric has an L3Out OSPF connectivity with router R1. The Cisco ACI fabric must have only subnet 192.168.1.0/24 installed in the routing table. Which two configurations must be selected to accomplish this goal? (Choose two.)

- A. Import Route Control Enforcement
- B. Import Route Control Subnet
- C. Shared Security Import Subnet
- D. External Subnets for the External EPG
- E. Export Route Control Subnet

Answer: A,B

Explanation:

Import Route Control Subnet: This option allows you to specify which external subnets should be imported into the ACI fabric's routing table. In this case, only the 192.168.1.0/24 subnet should be configured under Import Route Control Subnet.

Import Route Control Enforcement: This setting ensures that the configured route control policies (such as the subnet filter for 192.168.1.0/24) are enforced when importing routes from the external router (R1) into the ACI fabric.

NEW QUESTION # 367

Which protocol does ACI use to securely save the configuration in a remote location?

- A. HTTPS
- B. FTP
- C. SCP

- D. TFTP

Answer: C

Explanation:

ACI uses the SCP (Secure Copy Protocol) to securely save the configuration in a remote location. SCP is a network protocol that supports file transfers and relies on the Secure Shell (SSH) protocol to provide security for the transferred data.

NEW QUESTION # 368

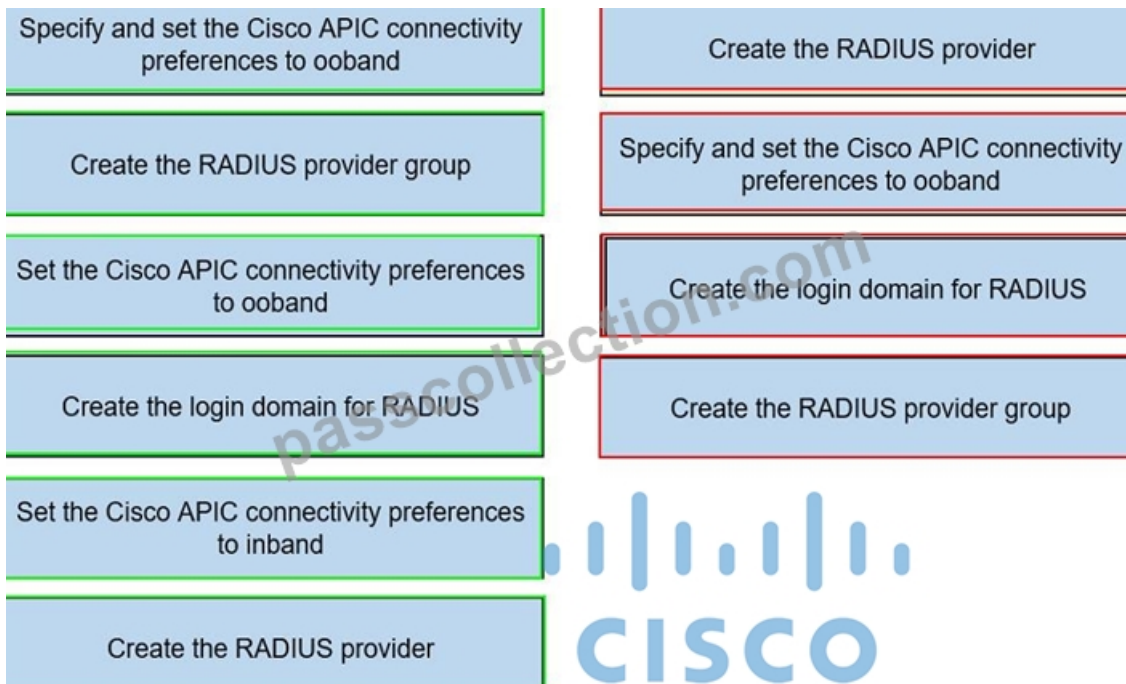

An engineer must configure RADIUS authentication with Cisco ACI for remote authentication with out-of-band management access. Drag and drop the RADIUS configuration steps from the left into the required implementation order on the right. Not all steps are used.

Specify and set the Cisco APIC connectivity preferences to ooband	step 1
Create the RADIUS provider group	step 2
Set the Cisco APIC connectivity preferences to ooband	step 3
Create the login domain for RADIUS	step 4
Set the Cisco APIC connectivity preferences to inband	
Create the RADIUS provider	

Answer:

Explanation:

NEW QUESTION # 369

Which setting prevents the learning of Endpoint IP addresses whose subnet does not match the bridge domain subnet?

- A. "Limit IP learning to network" setting within the EPG.
- **B. "Limit IP learning to subnet" setting within the bridge domain.**
- C. "Limit IP learning to subnet" setting within the EPG.
- D. "Limit IP learning to network" setting within the bridge domain.

Answer: B

Explanation:

https://www.cisco.com/c/en/us/td/docs/switches/datacenter/aci/apic/sw/2-x/L2_config/b_Cisco_APIC_Layer_2_Configuration_Guide/b_Cisco_APIC_Layer_2_Configuration_Guide_chapter_010.html

NEW QUESTION # 370

An engineer must securely export Cisco APIC configuration snapshots to a secure, offsite location. The exported configuration must be transferred using an encrypted tunnel and encoded with a platform-agnostic data format that provides namespace support. Which configuration set must be used?

- A. Option C
- **B. Option B**
- C. Option A
- D. Option D

Answer: B

Explanation:

To securely export Cisco APIC configuration snapshots to a secure, offsite location using an encrypted tunnel and a platform-agnostic data format that provides namespace support, the following configuration set must be used:

Choose a Platform-Agnostic Data Format: Export the configuration in a data format like JSON or XML, which are platform-agnostic and support namespaces1.

Use an Encrypted Tunnel: Transfer the configuration snapshot over a secure protocol such as SFTP or SCP, which provides an encrypted tunnel for the data transfer1.

Schedule the Export: Set up a scheduled export of the configuration in the Cisco APIC to occur at regular intervals, ensuring the process is automated1.

Enable Encryption: Make sure the configuration export policy includes encryption settings. Cisco APIC supports AES-256 encryption for securing exported configuration files2.

Verify Namespace Support: Ensure that the chosen data format and the method of export support the use of namespaces, which are essential for organizing elements and attributes in XML documents1.

By following these steps and choosing Option B, the engineer can meet the requirements for securely exporting Cisco APIC configuration snapshots to an offsite location.

NEW QUESTION # 371

.....

The Implementing Cisco Application Centric Infrastructure 300-620 exam is a valuable credential that will assist you to advance your career. To pass the 300-620 exam is not an easy job. It always gives tough times to their candidates. The best 300-620 Exam Preparation strategy along with the PassCollection 300-620 exam practice test questions can help you to crack the Cisco 300-620 exam easily.
