

Valid NetSec-Pro Test Cram | Real NetSec-Pro Dumps Free

What's more, part of that ExamTorrent NetSec-Pro dumps now are free: <https://drive.google.com/open?id=19-CKcGRvA4TZgY1TygiCYELVMOD8Wwmq>

In order to serve you better, we have a complete system for you. We offer you free demo for NetSec-Pro exam braindumps, and we recommend you have a try before buying. If you are quite satisfied with the free demo and want the complete version, you just need to add to cart and pay for it. You will receive the downloading link and password for NetSec-Pro Exam Dumps within ten minutes, if you don't receive, you can contact with us, and we will solve this problem for you. We offer you free update for one year for NetSec-Pro exam dumps after payment, so that you can obtain the latest information for the exam, and the latest information will be sent to you automatically.

Palo Alto Networks NetSec-Pro Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Platform Solutions, Services, and Tools: This section measures the expertise of security engineers and platform administrators in Palo Alto Networks NGFW and Prisma SASE products. It involves creating security and NAT policies, configuring Cloud-Delivered Security Services (CDSS) such as security profiles, User-ID and App-ID, decryption, and monitoring. It also covers the application of CDSS for IoT security, Enterprise Data Loss Prevention, SaaS Security, SD-WAN, GlobalProtect, Advanced WildFire, Threat Prevention, URL Filtering, and DNS security. Furthermore, it includes aligning AIOps with best practices through administration, dashboards, and Best Practice Assessments.
Topic 2	<ul style="list-style-type: none"> GFW and SASE Solution Maintenance and Configuration: This domain evaluates the skills of network security administrators in maintaining and configuring Palo Alto Networks hardware firewalls, VM-Series, CN-Series, and Cloud NGFWs. It includes managing security policies, profiles, updates, and upgrades. It also covers adding, configuring, and maintaining Prisma SD-WAN including initial setup, pathing, monitoring, and logging. Maintaining and configuring Prisma Access with security policies, profiles, updates, upgrades, and monitoring is also assessed.
Topic 3	<ul style="list-style-type: none"> Connectivity and Security: This part measures the skills of network engineers and security analysts in maintaining and configuring network security across on-premises, cloud, and hybrid environments. It covers network segmentation, security and network policies, monitoring, logging, and certificate management. It also includes maintaining connectivity and security for remote users through remote access solutions, network segmentation, security policy tuning, monitoring, logging, and certificate usage to ensure secure and reliable remote connections.

Topic 4	<ul style="list-style-type: none"> • NGFW and SASE Solution Functionality: This part assesses the knowledge of firewall administrators and network architects on the functions of various Palo Alto Networks firewalls including Cloud NGFWs, PA-Series, CN-Series, and VM-Series. It covers perimeter and core security, zone security and segmentation, high availability, security and NAT policy implementation, as well as monitoring and logging. Additionally, it includes the functionality of Prisma SD-WAN with WAN optimization, path and NAT policies, zone-based firewall, and monitoring, plus Prisma Access features such as remote user and network configuration, application access, policy enforcement, and logging. It also evaluates options for managing Strata and SASE solutions through Panorama and Strata Cloud Manager.
Topic 5	<ul style="list-style-type: none"> • Infrastructure Management and CDSS: This section tests the abilities of security operations specialists and infrastructure managers in maintaining and configuring Cloud-Delivered Security Services (CDSS) including security policies, profiles, and updates. It includes managing IoT security with device IDs and monitoring, as well as Enterprise Data Loss Prevention and SaaS Security focusing on data encryption, access control, and logging. It also covers maintenance and configuration of Strata Cloud Manager and Panorama for network security environments including supported products, device addition, reporting, and configuration management.

Real Palo Alto Networks NetSec-Pro Dumps Free - NetSec-Pro Reliable Exam Bootcamp

Do you wonder why so many peers can successfully pass NetSec-Pro exam? Are also you eager to obtain NetSec-Pro exam certification? Now I tell you that the key that they successfully pass the exam is owing to using our NetSec-Pro exam software provided by our ExamTorrent. Our NetSec-Pro exam software offers comprehensive and diverse questions, professional answer analysis and one-year free update service after successful payment; with the help of our NetSec-Pro Exam software, you can improve your study ability to obtain NetSec-Pro exam certification.

Palo Alto Networks Network Security Professional Sample Questions (Q53-Q58):

NEW QUESTION # 53

A primary firewall in a high availability (HA) pair is experiencing a current failover issue with ICMP pings to a secondary device. Which metric should be reviewed for proper ICMP pings between the firewall pair?

- A. Heartbeat polling
- B. Bidirectional Forwarding Detection (BFD)
- C. Link monitoring
- D. Non-functional state

Answer: A

Explanation:

Heartbeat polling is a core HA function to monitor connectivity between HA peers, leveraging ICMP pings to determine link health and availability.

Heartbeat Polling uses ICMP pings to verify the connectivity and health of the HA peers. If heartbeat polling fails, the firewall considers the peer to be down and may initiate failover.

If ICMP pings fail, checking heartbeat polling logs helps identify if link or path monitoring triggers the failover.

NEW QUESTION # 54

Which of the following are considered best practices for network hardening on Palo Alto firewalls?

(Choose two)

- A. Use User-ID and Device-ID-based policies
- B. Disable logging
- C. Enable unused administrative interfaces

- **D. Segment networks using zones**

Answer: A,D

Explanation:

Use User-ID and Device-ID-based policies: This approach enhances security by allowing granular policy enforcement based on authenticated user identity and device information, rather than just IP addresses, improving control and reducing attack surfaces.

Segment networks using zones: Network segmentation by creating zones helps isolate different network areas, limits lateral movement of threats, and enables precise policy enforcement between network segments, which is fundamental for robust security posture.

NEW QUESTION # 55

What is a necessary step for creation of a custom Prisma Access report on Strata Cloud Manager (SCM)?

- **A. Configure a dashboard.**
- B. Generate a PDF summary report.
- C. Set up Cloud Identity Engine.
- D. Open a support ticket.

Answer: A

Explanation:

To create custom Prisma Access reports within SCM, you first configure a dashboard that aggregates the relevant logs and analytics. This allows you to define the data points you want to include.

Dashboards in SCM can be customized to include Prisma Access data sources, enabling you to create and generate reports that meet specific business and security requirements.

Once configured, you can export the dashboard as a custom report.

Use the dashboard's data visualization to create custom reports for Prisma Access, which can be exported as PDFs for distribution.

NEW QUESTION # 56

How does Strata Logging Service help resolve ever-increasing log retention needs for a company using Prisma Access?

- **A. It can scale to meet the capacity needs of new locations as business grows.**
- B. Automatic selection of physical data storage regions decreases adoption time.
- C. It increases resilience due to decentralized collection and storage of logs.
- D. Log traffic using the licensed bandwidth purchased for Prisma Access reduces overhead.

Answer: A

Explanation:

The Strata Logging Service offers scalable log storage to accommodate data growth, which ensures organizations can retain logs for compliance and threat hunting as their environments expand.

"The Strata Logging Service is designed to scale dynamically to accommodate growing log retention needs, allowing enterprises to maintain comprehensive visibility as they expand their network footprint." (Source: Strata Logging Service Overview)

NEW QUESTION # 57

Which GlobalProtect configuration is recommended for granular security enforcement of remote user device posture?

- **A. Configuring host information profile (HIP) checks for all mobile users**
- B. Implementing multi-factor authentication (MFA) for all users attempting to access internal applications
- C. Applying log at session end to all GlobalProtect Security policies
- D. Configuring a rule that blocks the ability of users to disable GlobalProtect while accessing internal applications

Answer: A

Explanation:

Host Information Profile (HIP) checks are used in GlobalProtect to collect and evaluate endpoint posture (OS, patch level, AV status) to enforce granular security policies for remote users.

The HIP feature collects information about the host and can be used in security policies to enforce posture-based access control. This ensures only compliant endpoints can access sensitive resources. This enables fine-grained, context-aware access decisions beyond user identity alone.

NEW QUESTION # 58

.....

If you have the NetSec-Pro certification, it will be very easy for you to achieve your dream. But it is not an easy thing for many candidates to pass the NetSec-Pro exam. By chance, our company can help you solve the problem and get your certification, because our company has compiled the NetSec-Pro question torrent that not only have high quality but also have high pass rate. We believe that our NetSec-Pro exam questions will help you get the certification in the shortest. So hurry to buy our NetSec-Pro exam torrent, you will like our products.
