SAP Certified Associate - Positioning SAP Business Transformation Management Solutions C_BCBTM_2509 Prüfungsfragen mit Lösungen (Q24-Q29):

24. Frage

What are typical challenges SAP customers face in an ERP transformation?

(Note: There are 3 correct answers to this question.)

- A. Significant reduction in product quality
- B. Inability to generate financial reports due to a lack of data analytics capabilities
- C. Alignment between business and IT
- D. Lack of transparency into processes and system landscapes
- E. Not knowing how and where to start their transformation journey

Antwort: C,D,E

Begründung:

According to SAP's Business Transformation Management (BTM[®]) and SAP Signavio Transformation Framework, the most common ERP transformation challenges are strategic alignment, starting complexity, and lack of visibility across business and IT landscapes.

"Organizations often face difficulties with aligning business and IT, defining where to start transformation efforts, and gaining transparency across processes and systems." Reference:

A - Alignment between Business and IT:

Misalignment leads to inconsistent objectives between operations and technology strategy.

"Achieving alignment between IT capabilities and business goals remains one of the biggest barriers to transformation." B - Not Knowing Where to Start:

Many organizations lack clarity on prioritization and readiness assessment.

"Determining the starting point and sequencing of transformation steps is a recurring challenge in ERP modernization projects." C - Lack of Transparency:

Without visibility into existing processes, companies struggle to identify inefficiencies or dependencies.

"Insufficient transparency across processes and system landscapes hinders effective transformation planning and execution."

Incorrect Options:

D: Financial reporting challenges are typically ERP operational issues, not transformation barriers.

E: Product quality reduction is not a standard ERP transformation issue.

Verified Correct Answers: A, B, and C.

25. Frage

What is the primary purpose of WalkMe's Digital Adoption Platform (DAP)?

- A. To implement advanced hardware solutions
- B. To automate recruitment processes
- C. To manage payroll systems efficiently
- **D. To reduce digital friction and guide users through complex software**

Antwort: D

Begründung:

The WalkMe Digital Adoption Platform (DAP) is designed to improve the user experience by reducing friction when interacting with digital systems. It provides on-screen guidance, automation, and analytics that help users complete tasks accurately and efficiently.

"The primary purpose of WalkMe's Digital Adoption Platform is to reduce digital friction and guide users through complex software environments using AI-powered, context-aware assistance." Reference:

The platform enhances employee productivity, adoption success, and process efficiency across SAP and third-party applications by simplifying navigation and ensuring process compliance.

"WalkMe DAP provides contextual guidance directly within applications, enabling users to execute digital workflows with minimal errors or training." Incorrect Options:

A: WalkMe is software-based, not a hardware solution.

B: Recruitment automation is part of SAP SuccessFactors, not WalkMe.

D: Payroll management is unrelated to WalkMe's purpose.

Verified Correct answer: C: To reduce digital friction and guide users through complex software.

26. Frage

How does SAP differentiate itself from competitors in the area of business transformation?

- A. By focusing on traditional methodologies without leveraging data-driven insights.
- B. By limiting transparency and accessibility of insights and recommendations.
- **C. By providing a comprehensive suite of capabilities across all project phases with high integration.**
- D. By avoiding collaboration with ecosystem partners and other stakeholders.

Antwort: C

Begründung:

SAP distinguishes itself in the transformation landscape through its comprehensive and fully integrated suite of Business Transformation Management (BTM) solutions. This suite connects business process intelligence (SAP Signavio), enterprise architecture management (SAP LeanIX), and digital adoption (WalkMe) into one end-to-end transformation framework.

"SAP differentiates itself by offering a comprehensive suite of integrated capabilities that cover every phase of business transformation - from discovery and design to implementation and adoption." Reference:

Unlike competitors that provide isolated tools, SAP enables continuous, data-driven transformation through unified visibility across business, IT, and adoption layers.

"SAP's integrated transformation platform supports data-driven insights, ecosystem collaboration, and transparency throughout the transformation journey." Incorrect Options:

A: SAP promotes transparency, not limits it.

B: SAP actively collaborates with partners (e.g., WalkMe, LeanIX, Signavio).

D: SAP uses modern, insight-driven approaches - not traditional static ones.

Verified Correct answer: C: By providing a comprehensive suite of capabilities across all project

27. Frage

What is the SAP Signavio Process Manager?

- **A. A cloud-based tool for designing, modeling, and improving business processes.**
- B. A tool for automating financial transactions in ERP systems.
- C. A software for managing customer relationships and sales pipelines.
- D. An analytics solution for process mining and data analysis.

Antwort: A

Begründung:

SAP describes SAP Signavio Process Manager as a collaborative, browser-based BPM tool focused on process design and improvement:

"SAP Signavio Process Manager is a cloud-based solution to model, document, and optimize business processes collaboratively using BPMN 2.0." Reference:

Option B confuses it with a different product in the same portfolio. SAP states that process mining sits in SAP Signavio Process Intelligence (not Process Manager):

"SAP Signavio Process Intelligence is the process mining and analytics solution of the SAP Signavio portfolio." Option C refers to ERP transaction automation, which is not the scope of Process Manager. SAP positions Process Manager for process modeling and documentation, not transaction execution/automation:

"Use SAP Signavio Process Manager to design and document processes and drive process improvement; execution of transactions is handled by operational systems (e.g., ERP)." Option D is about CRM. SAP clarifies that CRM and sales pipeline management are covered by customer experience/CRM solutions, not by Process Manager:

"Process Manager provides process modeling and governance, not CRM pipeline management."

28. Frage

Of the following options, which technologies does SAP provide to help organizations transform?

- A. SAP Sales and SAP HR
- B. SAP Finance and SAP Marketing
- C. SAP ERP and SAP CRM
- D. SAP Signavio and SAP LeanIX solutions

Antwort: D

Begründung:

SAP enables digital transformation primarily through its Business Transformation Management (BTM) portfolio, led by SAP Signavio and SAP LeanIX. These technologies give organizations the tools to visualize, plan, and manage transformation initiatives effectively.

"SAP helps organizations accelerate transformation with SAP Signavio for business process transformation and SAP LeanIX for enterprise architecture and technology management." Reference:

SAP Signavio enables business process analysis, mining, and optimization, while SAP LeanIX supports enterprise architecture, application portfolio management, and technology risk compliance - together offering full visibility from business to IT.

"The combination of SAP Signavio and SAP LeanIX forms the backbone of SAP's transformation offerings, aligning business process improvements with IT landscape modernization." Incorrect Options:

A, B, and C refer to standard ERP or LOB modules, not transformation-focused solutions.

Verified Correct answer: D: SAP Signavio and SAP LeanIX solutions.
