So do not hesitate and buy our EUNA_2024 Preparation exam, you will benefit a lot from it and pass the EUNA_2024 exam for sure.

Esri ArcGIS Utility Network Associate 2024 Sample Questions (Q23-Q28):

NEW QUESTION # 23

A field technician is using ArcGIS Field Maps with a published utility network. Which two actions are supported in Field Maps when interacting with the network?

- A. View associations and perform traces
- B. Offline editing and schema changes
- C. Apply validation rules and create subnetworks

Answer: A

Explanation:

In Field Maps, users can view associations and run traces. Offline editing workflows are not supported.

NEW QUESTION # 24

What is the key difference between a domain network and a structure network in ArcGIS Utility Network?

- A. Structure networks enforce connectivity, while domain networks enforce containment
- B. Domain networks define ranks, while structure networks manage terminal paths
- C. Domain networks carry resources, while structure networks provide support

Answer: C

Explanation:

Domain networks model the flow of resources (e.g., water, electricity), while structure networks provide physical support.

NEW QUESTION # 25

What do terminals in ArcGIS Utility Network model?

- A. Locations or ports where resources flow in and out of devices or junctions
- B. Categories used to tag subnetwork controllers
- C. Ranks that define trace order

Answer: A

Explanation:

Terminals model ports where utilities enter/exit devices, such as valves in water systems or breakers in electric networks.

NEW QUESTION # 26

When creating and managing terminals in ArcGIS Utility Network, which process correctly describes the required steps?

- A. Create a terminal configuration, assign it to asset groups/types, and define valid and default paths
- B. Allow topology validation to auto-generate terminals
- C. Use only system-provided attributes for terminal management

Answer: A

Explanation:

Terminals are created through configurations assigned to asset groups and types, defining valid paths and flow direction.

NEW QUESTION # 27

In ArcGIS Utility Network, which type of association allows a transformer to connect to a distribution line even if the two features are not spatially coincident?

- A. Structural attachment association
- B. Connectivity association
- C. Containment association

Answer: B

Explanation:

Connectivity associations allow connectivity between non-coincident features, enabling logical rather than spatial connections.

NEW QUESTION # 28

.....

Do you want to try our free demo of the EUNA_2024 study questions? Your answer must be yes. So just open our websites in your computer. You will have easy access to all kinds of free trials of the EUNA_2024 practice materials. You can apply for many types of EUNA_2024 Exam simulation at the same time. Once our system receives your application, it will soon send you what you need. Please ensure you have submitted the right email address. And you will have the demos to check them out.
