You can obtain the downloading link and password within ten minutes after payment for Professional-Cloud-Database-Engineer exam barindumps, and the latest version will be sent to your email automatically.

Google Cloud Certified - Professional Cloud Database Engineer Sample Questions (Q10-Q15):

NEW QUESTION # 10

Your organization is running a MySQL workload in Cloud SQL. Suddenly you see a degradation in database performance. You need to identify the root cause of the performance degradation. What should you do?

- A. Use Logs Explorer to analyze log data.
- B. Use Cloud Debugger to inspect the state of an application.
- C. Use Error Reporting to count, analyze, and aggregate the data.
- **D. Use Cloud Monitoring to monitor CPU, memory, and storage utilization metrics.**

Answer: D

NEW QUESTION # 11

Your team is building a new inventory management application that will require read and write database instances in multiple Google Cloud regions around the globe. Your database solution requires 99.99% availability and global transactional consistency. You need a fully managed backend relational database to store inventory changes. What should you do?

- A. Use Cloud SQL for MySQL
- **B. Use Cloud Spanner.**
- C. Use Bigtable.
- D. Use Firestore.

Answer: B

Explanation:

Spanner covers the SLA

NEW QUESTION # 12

Your company wants to migrate an Oracle-based application to Google Cloud. The application team currently uses Oracle Recovery Manager (RMAN) to back up the database to tape for long-term retention (LTR). You need a cost-effective backup and restore solution that meets a 2-hour recovery time objective (RTO) and a 15-minute recovery point objective (RPO). What should you do?

- A. Migrate the Oracle databases to Bare Metal Solution for Oracle, and use Actifio to store backup files on Cloud Storage using the Nearline Storage class.
- B. Migrate the Oracle databases to Bare Metal Solution for Oracle, and store backups on tapes on-premises.
- **C. Migrate the Oracle databases to Bare Metal Solution for Oracle, and back up the Oracle databases to Cloud Storage using the Standard Storage class.**
- D. Migrate the Oracle databases to Compute Engine, and store backups on tapes on-premises.

Answer: C

NEW QUESTION # 13

You are deploying a new Cloud SQL instance on Google Cloud using the Cloud SQL Auth proxy. You have identified snippets of application code that need to access the new Cloud SQL instance. The snippets reside and execute on an application server running

on a Compute Engine machine. You want to follow Google- recommended practices to set up Identity and Access Management (IAM) as quickly and securely as possible.
What should you do?

- A. For each application code, set up a common shared user account.
- B. For each application code, set up a dedicated user account.
- **C. For the application server, set up a service account.**
- D. For the application server, set up a common shared user account.

Answer: C

Explanation:

<https://cloud.google.com/sql/docs/mysql/sql-proxy#using-a-service-account>

NEW QUESTION # 14

You host an application in Google Cloud. The application is located in a single region and uses Cloud SQL for transactional data. Most of your users are located in the same time zone and expect the application to be available 7 days a week, from 6 AM to 10 PM. You want to ensure regular maintenance updates to your Cloud SQL instance without creating downtime for your users. What should you do?

- **A. Configure a maintenance window during a period when no users will be on the system. Control the order of update by setting non-production instances to earlier and production instances to later.**
- B. Create your database with one primary node and one read replica in the region.
- C. Configure your Cloud SQL instance with high availability enabled.
- D. Enable maintenance notifications for users, and reschedule maintenance activities to a specific time after notifications have been sent.

Answer: A

Explanation:

Configure a maintenance window during a period when no users will be on the system. Control the order of update by setting non-production instances to earlier and production instances to later.

NEW QUESTION # 15

.....

In order to cater to meet different needs of our customers, three versions of Professional-Cloud-Database-Engineer exam bootcamp are available. Each version has its own advantages, and you can choose the most suitable one in accordance with your needs. Furthermore, Professional-Cloud-Database-Engineer exam bootcamp is compiled by outstanding experts, therefore the quality and the accuracy can be guaranteed. Besides, we have the professional technicians to examine the website on a regular basis, hence a clean and safe shopping environment will be provided to you. You just need to buy the Professional-Cloud-Database-Engineer Exam Dumps with ease.
