If candidates are going to buy SC-100 test dumps, they may consider the problem of the fund safety. If you are thinking the same question like this, our company will eradicate your worries. We choose the international third party to ensure the safety of the fund. The SC-100 Test Dumps are effective and conclusive, you just need to use the least time to pass it. If you choose us, it means you choose the pass.

Microsoft SC-100, also known as the Microsoft Cybersecurity Architect Exam, is a certification exam that focuses on the skills and knowledge required to design and implement secure Microsoft solutions. SC-100 Exam is intended for individuals who are interested in pursuing a career in cybersecurity and wish to demonstrate their expertise in implementing security measures for Microsoft platforms and technologies.

Excellect SC-100 Pass Rate | SC-100 Books PDF

We promise during the process of installment and payment of our Microsoft Cybersecurity Architect prep torrent, the security of your computer or cellphone can be guaranteed, which means that you will be not afraid of virus intrusion and personal information

leakage. Besides we have the right to protect your email address and not release your details to the 3rd parties. Moreover if you are not willing to continue our SC-100 Test Braindumps service, we would delete all your information instantly without doubt. The main reason why we try our best to protect our customers' privacy is that we put a high value on the reliable relationship and mutual reliance to create a sustainable business pattern.

Microsoft Cybersecurity Architect Sample Questions (Q59-Q64):

NEW QUESTION # 59

You have an Azure subscription.

You have a subscription to a third-party cloud provider. The subscription contains 100 virtual machines.

You manage cloud security for both subscriptions from the Azure subscription.

You need to recommend a solution to validate the security posture of the virtual machines.

Which two services should you include in the recommendation? Each correct answer presents part of the solution.

- A. Microsoft Defender for Cloud
- B. Azure Lighthouse
- C. Microsoft Defender for Endpoint
- D. Azure Arc
- E. Microsoft Sentinel

Answer: A,D

NEW QUESTION # 60

Your on-premises network contains an Active Directory Domain Services (AD DS) domain named corp.xontoso.com and an AD DS-integrated application named App1.

Your perimeter network contains a server named Server1 that runs Windows Server.

You have a Microsoft Entra tenant named contoso.com that syncs with corp.contoso.com.

You plan to implement a security solution that will include the following configurations:

* Manage access to App1 by using Microsoft Entra Private Access.

* Deploy a Microsoft Entra application proxy connector to Server1.

* Implement single sign-on (SSO) for App1 by using Kerberos constrained delegation.

* For Server1, configure the following rules in Windows Defender Firewall with Advanced Security:

o Rule1: Allow TCP 443 inbound from a designated set of Azure URLs.

o Rule2: Allow TCP 443 outbound to a designated set of Azure URLs.

o Rule3: Allow TCP 80 outbound to a designated set of Azure URLs.

o Rule4: Allow TCP 389 outbound to the domain controllers on corp.contoso.com.

You need to maximize security for the planned implementation. The solution must minimize the impact on the connector.

Which rule should you remove?

- A. Rule1
- B. Rule2
- C. Rule4
- D. Rule3

Answer: D

NEW QUESTION # 61

Hotspot Question

You have multiple on-premises Hyper-V hosts that contain virtual machines. The virtual machines run Windows Server 2022.

You have an Azure subscription.

You need to recommend a solution to collect Security event logs from the virtual machines by using Microsoft Sentinel. The Solution must meet the following requirements:

- Leverage the Windows Security Events via AMA data connector.
- Ensure that only specific events are collected.
- Minimize costs.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

□

Answer:

Explanation:

□ Explanation:

Box 1: Azure Monitor data collection rules (DCRs)

In Azure, deploy

Windows Security Events via AMA connector for Microsoft Sentinel

You can stream all security events from the Windows machines connected to your Microsoft Sentinel workspace using the Windows agent. This connection enables you to view dashboards, create custom alerts, and improve investigation. This gives you more insight into your organization's network and improves your security operation capabilities.

Connector attributes

□ Create a data collection rule

You can define a data collection rule to send data from multiple machines to multiple Log Analytics workspaces, including workspaces in a different region or tenant. Create the data collection rule in the same region as your Log Analytics workspace. You can send Windows event and Syslog data to Azure Monitor Logs only. You can send performance counters to both Azure Monitor Metrics and Azure Monitor Logs.

Box 2: The Azure Connected Machine agent for Azure Arc-enabled servers

On the virtual machines, install

The Azure Connected Machine agent enables you to manage your Windows and Linux machines hosted outside of Azure on your corporate network or other cloud providers.

NEW QUESTION # 62

You need to recommend an identity security solution for the Azure AD tenant of Litware. The solution must meet the identity requirements and the regulatory compliance requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

□

Answer:

Explanation:

□

NEW QUESTION # 63

You are evaluating an Azure environment for compliance.

You need to design an Azure Policy implementation that can be used to evaluate compliance without changing any resources.

Which effect should you use in Azure Policy?

- A. Deny
- **B. Disabled**
- C. Append
- D. Modify

Answer: B

Explanation:

Before looking to manage new or updated resources with your new policy definition, it's best to see how it evaluates a limited subset of existing resources, such as a test resource group. Use the enforcement mode Disabled (DoNotEnforce) on your policy assignment to prevent the effect from triggering or activity log entries from being created. <https://docs.microsoft.com/en-us/azure/governance/policy/concepts/evaluate-impact>
