

# Valid JN0-336 Real Practice Materials - JN0-336 Actual Exam Dumps - ActualVCE

DOWNLOAD the newest ActualVCE JN0-336 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1Jsw2PITV5iZbmYnt-DmWpZhdXAD5DRF>

With the development of technology, our JN0-336 training engine will be updated regularly. Actually, we never stop researching the new functions of the study materials. Normally, we will release our new version of the JN0-336 exam simulation on our website once it passed the tests. Many details will be perfected in the new version of our JN0-336 Study Materials not only on the content, but also on the displays. And we have been in this career for over ten years, our JN0-336 learning guide is perfect.

Our Company is always striving to develop not only our JN0-336 latest practice materials, but also our service because we know they are the aces in the hole to prolong our career. Reliable service makes it easier to get oriented to the JN0-336 exam. The combination of JN0-336 Exam Guide and sweet service is a winning combination for our company, so you can totally believe that we are sincerely hope you can pass the JN0-336 exam, and we will always provide you help and solutions with pleasure, please contact us through email then.

>> Valid JN0-336 Exam Question <<

## JN0-336 Exam Material & JN0-336 Valid Test Book

Our JN0-336 test guide has become more and more popular in the world. Of course, if you decide to buy our JN0-336 latest question, we can make sure that it will be very easy for you to pass your exam and get the certification in a short time, first, you just need 5-10 minutes can receive JN0-336 Exam Torrent that you can learn and practice it. Then you just need 20-30 hours to practice our study materials that you can attend your exam. It is really spend your little time and energy.

## Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q66-Q71):

### NEW QUESTION # 66

Click the Exhibit button.

You are validating the configuration template for device access. The commands in the exhibit have been entered to secure IP access to an SRX Series device.

Referring to the exhibit, which two statements are true? (Choose two.)

- A. The device manager can access the device from 10.253.1.2.
- B. The loopback interface blocks invalid traffic on its entry into the device.
- C. The loopback interface blocks invalid traffic on its exit from the device.
- D. The device manager can access the device from 192.168.11.248.

Answer: A,B

Explanation:

The commands in the exhibit show how to configure a firewall filter on the loopback interface (lo0) of an SRX Series device. The loopback interface is a gateway for all the control traffic that enters the Routing Engine of the device. The firewall filter can be used to monitor and protect this control traffic from various attacks. Two statements that are true based on the exhibit are:  
The loopback interface blocks invalid traffic on its entry into the device: The firewall filter applied on lo0 has a term that matches any packet with an invalid source address (such as 0.0.0.0/8 or 127.0.0.0/8) and discards it. This prevents spoofing or DoS attacks using invalid source addresses. The device manager can access the device from 10.253.1.2: The firewall filter applied on lo0 has a term that matches any packet with a source address of 10.253.1.2 and accepts it. This allows the device manager to access the device from this IP address using protocols such as SSH, Telnet, HTTP, or HTTPS.  
Reference: = Firewall Filter Support on Loopback Interface, [MX/SRX] The behavior of firewall filters that are applied on the loopback interfaces in virtual routers

#### NEW QUESTION # 67

Which two statements about SRX Series device chassis clusters are correct? (Choose two.)

- A. The chassis cluster data plane is connected with revenue ports.
- B. The chassis cluster data plane is connected with SPC ports.
- C. The chassis cluster can contain a maximum of two devices.
- D. The chassis cluster can contain a maximum of three devices.

**Answer: A,C**

Explanation:

Two statements that are correct about SRX Series device chassis clusters are:

The chassis cluster data plane is connected with revenue ports: A chassis cluster is a high-availability feature that groups two identical SRX Series devices into a cluster that acts as a single device. The cluster has two types of links: control links and fabric links. The control links are used for exchanging heartbeat messages and configuration synchronization between the nodes. The fabric links are used for forwarding data traffic between the nodes. The fabric links are connected with revenue ports, which are regular Ethernet interfaces that can also be used for normal traffic when not in cluster mode.

The chassis cluster can contain a maximum of two devices: A chassis cluster can only consist of two nodes: node 0 and node 1. The nodes must be the same model, have the same hardware configuration, run the same software version, and have the same license keys. The nodes share a common configuration and act as backup for each other in case of failure.

Reference: = Configuring Chassis Clustering on SRX Series Devices, SRX Series Chassis Cluster Configuration Overview, Connecting SRX Series Firewalls to Create a Chassis Cluster

#### NEW QUESTION # 68

Your manager asks you to provide firewall and NAT services in a private cloud.

Which two solutions will fulfill the minimum requirements for this deployment? (Choose two.)

- A. a cSRX for firewall services and a separate cSRX for NAT services
- B. a single cSRX
- C. a single vSRX
- D. a vSRX for firewall services and a separate vSRX for NAT services

**Answer: B,C**

Explanation:

A single vSRX instance is capable of handling both firewall and NAT services simultaneously. This solution provides a streamlined and resource-efficient way to secure and manage network traffic within a private cloud environment.

Similar to the vSRX, a single cSRX can also provide both firewall and NAT services. The cSRX, being a containerized version of the SRX, is particularly suited for environments where high density and microservices architectures are used, offering high performance in a compact form factor.

#### NEW QUESTION # 69

You want to deploy a virtualized SRX in your environment.

In this scenario, why would you use a vSRX instead of a cSRX? (Choose two.)

- A. The vSRX has faster boot times.

- B. Only the vSRX provides NAT, IPS, and UTM services
- C. Only the vSRX provides clustering.
- D. The vSRX supports Layer 2 and Layer 3 configurations.

**Answer: C,D**

Explanation:

vSRX provides flexible networking capabilities which include support for both Layer 2 (data link) and Layer 3 (network) configurations. This allows it to handle a variety of routing and switching tasks within virtual environments.

Clustering capability, which involves grouping multiple vSRX instances to operate as a single entity for redundancy and high availability, is a feature specific to vSRX. This is critical in environments where continuous uptime and resilience are required.

#### NEW QUESTION # 70

You are asked to create an IPS-exempt rule base to eliminate false positives from happening.

Which two configuration parameters are available to exclude traffic from being examined? (Choose two.)

- A. destination IP address
- B. destination port
- C. source port
- D. source IP address

**Answer: A,D**

Explanation:

You can specify the source IP address or a range of IP addresses to exclude certain traffic originating from specific network segments or devices. This is useful for whitelisting traffic from known, secure sources that are otherwise triggering false positives in the IPS system.

Similarly, you can specify the destination IP address or a range of addresses to exclude traffic destined for particular network hosts or segments. This helps in reducing false positives for traffic directed towards trusted internal resources or specific external services that are known to be safe.

#### NEW QUESTION # 71

.....

Since the content of the examination is also updating daily, you will need real and latest Juniper JN0-336 Exam Dumps to prepare successfully for the JN0-336 certification exam in a short time. People who don't study from updated Security, Specialist (JNCIS-SEC) (JN0-336) questions fail the examination and loss time and money.
