These NCLEX NCLEX-RN questions can be customized by the user according to their needs. This customization feature so that customers can adjust the time as they want. They can change the settings of the time and questions as per need while giving the NCLEX NCLEX-RN tests. These NCLEX NCLEX-RN exam questions train candidates to maintain discipline so that they can solve the real NCLEX NCLEX-RN questions on time while giving their final NCLEX-RN exam.

Preparing for the NCLEX-RN exam is an important part of nursing education. Many nursing programs offer specialized courses and study materials to help students prepare for the exam. In addition, there are numerous test preparation resources available, including review books, online practice exams, and study groups. Most importantly, students should focus on developing a strong foundation of knowledge and clinical skills throughout their nursing education in order to be successful on the NCLEX-RN exam.

NCLEX-RN, or National Council Licensure Examination for Registered Nurses, is a standardized exam that is used to determine whether or not a candidate is qualified to become a licensed registered nurse. NCLEX-RN Exam is administered by the National Council of State Boards of Nursing (NCSBN) and is accepted by all state boards of nursing in the United States and its territories. The NCLEX-RN is designed to assess a candidate's knowledge, skills, and abilities in a variety of areas related to nursing practice, including patient care, safety, and ethical considerations.

## Reliable NCLEX-RN Guide Dumps: National Council Licensure Examination(NCLEX-RN) - NCLEX-RN Test Prep Materials - BraindumpsPass

The second format is web-based NCLEX-RN practice exam and can be accessed through browsers and candidates can take it online. The students don't need to install or use any plugins or software to attempt the web-based practice exam. The third and last form is the NCLEX NCLEX-RN desktop practice test software that can be used from Windows computers. Candidates that have Windows laptops or computers can take the NCLEX-RN practice exam efficiently.

NCLEX-RN exam is a computer-adaptive test (CAT) that adapts to the test taker's abilities. This means that the difficulty level of the questions will adjust based on the test taker's responses. NCLEX-RN Exam consists of a minimum of 75 questions and a maximum of 265 questions. Test takers have up to six hours to complete the exam, which includes two optional breaks.

## NCLEX National Council Licensure Examination(NCLEX-RN) Sample Questions (Q674-Q679):

### NEW QUESTION # 674

Chorioamnionitis is a maternal infection that is usually associated with:

- A. Postterm deliveries
- B. Maternal pyelonephritis
- C. Maternal dehydration
- **D. Prolonged rupture of membranes**

**Answer: D**

Explanation:

Section: Questions Set D

Explanation

Explanation:

(A) Chorioamnionitis is an inflammation of the chorion and amnion that is generally associated with premature or prolonged rupture of membranes. (B) Postterm deliveries have not been shown to increase the risk of chorioamnionitis unless there has been prolonged rupture of membranes. (C) Pyelonephritis is a kidney infection that develops in 20%-40% of untreated maternal UTIs. (D) Maternal dehydration, though of great concern, is not related to chorioamnionitis.

#### NEW QUESTION # 675

A client presented herself to the mental health center, describing the following symptoms: a weight loss of 20 lb in the past 2 months, difficulty concentrating, repeated absences from work due to "fatigue," and not wanting to get dressed in the morning. She leaves her recorded message on her telephone and has lost interest in answering the phone or doorbell. The nurse's assessment of her behavior would most likely be:

- A. Deep depression
- B. Severe anxiety
- C. Psychotic depression
- **D. Severe depression**

**Answer: D**

Explanation:

Explanation/Reference:

Explanation:

(A) A client in deep depression would have been brought to the mental health center and would not be physically able to seek help for herself. (B) She is not manifesting psychotic symptoms in her behaviors.

(C) The client's symptoms are more indicative of depression than anxiety. (D) Although the client was able to bring herself to the mental health center, the extent of her weight loss and the interference of symptoms with activities of daily living indicate that she is severely depressed.

#### NEW QUESTION # 676

The parents of a 9-year-old child with acute lymphocytic leukemia expressed concern about his alopecia from cranial irradiation. The nurse explains that:

- **A. His hair will grow back in a few months.**
- B. There are several wig makers for children.
- C. Most children select a favorite hat to protect their heads.
- D. Alopecia is an unavoidable side effect.

**Answer: A**

Explanation:

(A)

Alopecia has occurred, and knowing it is a side effect does not address their concern.

(B)

Although true, it does not give them hope for the future. (C) Although true, it does not provide them with information of the temporary nature of the situation. (D) Knowing the hair will grow back provides comfort that the alopecia is temporary.

#### NEW QUESTION # 677

The nurse assists a client with advanced emphysema to the bathroom. The client becomes extremely short of breath while returning

to bed. The nurse should:

- A. Have him breathe into a paper bag
- B. Increase his nasal O<sub>2</sub> to 6 L/min
- **C. Encourage pursed-lip breathing**
- D. Place him in a lateral Sims' position

**Answer: C**

Explanation:

Explanation/Reference:

Explanation:

(A) Giving too high a concentration of O<sub>2</sub> to a client with emphysema may remove his stimulus to breathe.

(B) The client should sit forward with his hands on his knees or an overbed table and with shoulders elevated. (C) Pursed-lip breathing helps the client to blow off CO<sub>2</sub> and to keep air passages open. (D) Covering the face of a client extremely short of breath may cause anxiety and further increase dyspnea.

### NEW QUESTION # 678

The nurse in the mental health center is instructing a depressed client about the dietary restrictions necessary in taking her medication, which is a monoamine oxidase (MAO) inhibitor. Which of the following is she restricting from the client's diet?

- **A. Aged cheese**
- B. Cream cheese
- C. Yeast bread
- D. Fresh fruits

**Answer: A**

Explanation:

Explanation/Reference:

Explanation:

(A) Cream cheese does not contain tyramine, which might cause a hypertensive crisis. (B) Fresh fruits do not contain tyramine, which might cause a hypertensive crisis. (C) Aged or matured cheese combined with a monoamine oxidase predisposes the client to a hypertensive crisis. (D) Bread products raised with yeast do not contain tyramine.
