Valid SAP C_S4CPB_2508 Exam Questions are Conveniently Available in PDF Format

How can our C_S4CPB_2508 study questions are so famous and become the leader in the market? Because our C_S4CPB_2508 learning braindumps comprise the most significant questions and answers that have every possibility to be the part of the real exam. As you study with our C_S4CPB_2508 Practice Guide, you will find the feeling that you are doing the real exam. Especially if you choose the Software version of our C_S4CPB_2508 training engine, which can simulate the real exam.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q48-Q53):

NEW QUESTION # 48

In which deployment models is application management the responsibility of the customer? Note: There are 3 correct answers to this question.

- A. Private Cloud
- B. Platform as a Service
- C. On premise
- D. Infrastructure as a Service
- E. Software as a Service

Answer: A,B,C

Explanation:

In different deployment models, the responsibility for application management varies, with the customer typically taking on more

responsibility in certain models:

* Platform as a Service (PaaS): In this model, the customer is responsible for managing the applications they develop or deploy on the platform, even though the provider manages the underlying infrastructure, operating systems, and middleware.

* On premise: In an on-premise deployment, the customer has full responsibility for managing both the applications and the infrastructure they run on. This includes maintenance, updates, security, and compliance for both the applications and the hardware/software infrastructure.

* Private Cloud: Similar to on-premise deployments, customers in a private cloud model are typically responsible for managing their applications, including SAP S/4HANA Cloud Public Edition. The cloud provider may manage the cloud infrastructure and virtualization layer, but the customer often handles application-level management tasks, including updates, customization, and user management.

These deployment models contrast with Software as a Service (SaaS), where the service provider is generally responsible for managing the application, including its maintenance, updates, and availability.

NEW QUESTION # 49

If a customer wants to develop their own custom application and integrate it with SAP S/4HANA Cloud Public Edition, what tools would you recommend to develop the app? Note: There are 2 correct answers to this question.
