You can choose any version of AZ-800 study guide, as long as you find it appropriate.

Microsoft Administering Windows Server Hybrid Core Infrastructure Sample Questions (Q58-Q63):

NEW QUESTION # 58

You have an Azure subscription that contains the storage accounts shown in the following table.

In the East US Azure region, you create a storage sync service named Synd.

You need to create a sync group in Synd.

Which storage accounts can you use, and what can you specify as the cloud endpoints? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

□

NEW QUESTION # 59

Your network contains an Active Directory Domain Services (AD DS) forest named contoso.com. The forest contains a child domain named east.contoso.com.

In the contoso.com domain, you create two users named Admin1 and Admin2.

You need to ensure that the users can perform the following tasks:

- * Admin1 can create and manage Active Directory sites.
- * Admin2 can deploy domain controller to the east.contoso.com domain.

The solution must use the principle of least privilege.

To which group should you add each user? To answer, select the appropriate options in the answer area.

NOTE Each correct selection is worth one point.

□

Answer:

Explanation:

□

NEW QUESTION # 60

You have an Azure subscription that contains the virtual networks shown in the following table.

□

You deploy a virtual machine named VM1 that runs Windows Server. VM1 is connected to Subnet11.

You plan to add an additional network interface named NIC1 to VM1.

To which subnets can NIC1 be attached?

- A. Subnet11 only
- B. Subnet12 and Subnet21 only
- C. Subnet12 only
- D. Subnet11, Subnet12, Subnet21 and Subnet31
- E. Subnet11 and Subnet12 only

Answer: C

NEW QUESTION # 61

SIMULATION

You need to collect the recommended Windows Performance Counters from SRV1 in a Log Analytics workspace.

The required files are stored in a shared folder named \\dc1\install.

To complete this task, sign in to the required computer or computers.

Answer:

Explanation:

Microsoft Azure - Enable Windows Performance Counters in Azure for Monitoring Collect windows performance counters from Log Analytics agents at custom intervals to gain insight into the performance of hardware components, operating systems, and applications.

Implementation:

Step 1: Log in to Azure Portal.

Step 2: Access the Log Analytics Workspace >> Select your Log Analytics.

Step 3: After selecting the select Log Analytics Workspace, Navigate to Settings >> Agents Configuration

□

Step 4: Select Windows Performance Counters >> You can start with the recommended performance counters by clicking on Add recommended counters or using the add button to add a new performance counter.

□

Step 5: Click on + Add Performance Counter >> Select the Performance Counter name

□

Step 6: After adding the required Performance Counter name, click on Apply to make the changes.

That's it. You are done. At this point, we have successfully enabled Windows Performance Counters in Azure for Monitoring.

Reference:

NEW QUESTION # 62

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a server named Server1 that runs Windows Server 2022 and has the DHCP Server role. Server1 contains a single DHCP scope named Scope1.

You deploy five printers to the network.

You need to ensure that the printers are always assigned the same IP address.

Solution: You create a DHCP address exclusion for each printer.

Does this meet the requirement?

- A. No
- B. Yes

Answer: A

NEW QUESTION # 63

.....
