Chrome-Enterprise-Administrator Valid Test Book, Trustworthy Chrome-Enterprise-Administrator Pdf

What's more, part of that Pass4Leader Chrome-Enterprise-Administrator dumps now are free: https://drive.google.com/open?id=1HPoxA7vQTURNaag5u8Vg3IJ8vC46Yo7Z

With Chrome-Enterprise-Administrator guide torrent, you may only need to spend half of your time that you will need if you didn't use our products successfully passing a professional qualification exam. In this way, you will have more time to travel, go to parties and even prepare for another exam. The benefits of Chrome-Enterprise-Administrator Study Guide for you are far from being measured by money. Chrome-Enterprise-Administrator guide torrent has a first-rate team of experts, advanced learning concepts and a complete learning model. You give us a trust and we reward you for a better future.

Google Chrome-Enterprise-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	• Analyze Chrome Data: This section of the exam measures skills of a Chrome Data Analyst and focuses on using the Google Admin console to view, analyze, and troubleshoot browser data. It includes reviewing reports, diagnosing browser or update issues, investigating performance problems, and identifying security risks based on log events and Chrome activity.

Topic 2	• Chrome Enterprise Management Fundamentals: This section of the exam measures skills of a Chrome Device Administrator and covers the foundational elements of managing Chrome in an enterprise. It includes understanding how policies are applied and resolved, differentiating managed browsers from profiles, and describing how policies work. It also covers Chrome's built-in security features, how extensions are used and deployed, and how the release cycle and channels are managed.
Topic 3	• Manage Chrome Enterprise in the Cloud: This section of the exam measures skills of a Cloud Systems Administrator and focuses on preparing and configuring environments for Chrome cloud management. Candidates must demonstrate how to verify domains, use admin roles, configure organizational structures, deploy enrollment tokens, enable reporting, and maintain Chrome using the Google Admin console.
Topic 4	• Chrome Extensions: This section of the exam measures skills of an Endpoint Security Manager and involves managing Chrome extension policies. It includes designing extension management strategies, handling extension exemptions, creating approval workflows, and assessing extensions for their risk and compliance with business continuity requirements.
Topic 5	• Chrome Updates: This section of the exam measures skills of a Chrome IT Policy Analyst and addresses the various update methods available for Chrome. It includes selecting the right update strategy for different business and security needs, managing compliance across platforms, and adapting update methods based on environmental changes or risks.

Trustworthy Google Chrome-Enterprise-Administrator Pdf, Latest Chrome-Enterprise-Administrator Exam Experience

Google Chrome-Enterprise-Administrator certificate can help you a lot. It can help you improve your job and living standard, and having it can give you a great sum of wealth. Google certification Chrome-Enterprise-Administrator exam is a test of the level of knowledge of IT professionals. Pass4Leader has developed the best and the most accurate training materials about Google Certification Chrome-Enterprise-Administrator Exam. Now Pass4Leader can provide you the most comprehensive training materials about Google Chrome-Enterprise-Administrator exam, including exam practice questions and answers.

Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q35-Q40):

NEW QUESTION # 35
A company uses Chrome Enterprise Core to manage Chrome browsers for its employees and contractors who share devices They need a way to ensure the following:
* Full-Time Employees (FTEs) can only see and use extensions assigned to them
* Contractors can only see and use extensions assigned to them
* Both FTEs and contractors have access to a set of shared extensions
How can the Chrome administrator configure Chrome Enterprise Core to achieve this'?

- A. Create Organizational Units (OUs) for Shared devices, assign shared extensions to the OU. Use Group Policy Objects to assign specific extensions by user group
- B. Ask users to install all the extensions they need on the shared device
- C. Create separate groups in the Google Admin Console for FTEs and Contractors. Assign extensions to respective groups based on their needs
- D. Create Organizational Units (OUs) for Shared devices, assign shared extensions to the OU. Create a separate group in the Google Admin Console for FTEs. Assign extensions to the group based on their needs

Answer: D

Explanation:
The most effective way to manage extensions in this scenario is to use a combination of OUs and groups.
Create an OU for the shared devices and force-install the shared extensions at this OU level. Then, create separate user groups for FTEs and Contractors in the Google Admin console and force-install their specific extensions to these groups. User group policies

have a higher precedence than OU policies, ensuring the correct extensions are available to each user type when they sign in to the shared devices. Option A mentions Group Policy Objects, which are for Windows environments and less relevant in a cloud-managed scenario across potentially different OSes. Option B doesn't address the shared device aspect effectively. Option C is not a managed approach.

NEW QUESTION # 36

A Chrome administrator's organization has recently introduced a new security compliance requirement that mandates all software, including web browsers, be updated within 48 hours of a security patch release Which steps should the administrator take to ensure compliance with the new security requirement company wide'?

- A. Disable automatic updates and manually check all managed browsers for updates every 48 hours to comply with the new security requirements
- B. Implement a policy in the Google Admin console to force automatic updates and recommend Chrome relaunches to apply updates within the required timeframe
- C. Implement a policy in the Google Admin console to force automatic updates and ensure Chrome relaunches to apply updates within the required timeframe
- D. Rely on users to manually update their browsers within the required timeframe

Answer: C

Explanation:
To meet a strict 48-hour update requirement for security patches, the administrator must enforce automatic updates through the Google Admin console. Additionally, ensuring Chrome relaunches after updates are downloaded is crucial for applying the patches promptly. Recommending relaunches (option A) might not guarantee timely application. Relying on manual updates (option B) is unreliable and doesn't ensure compliance. Manually checking all browsers (option C) is not scalable or efficient for a company-wide deployment.

NEW QUESTION # 37

A company is managing browsers in the Google Admin console Security has scanned extensions in the organization and has determined that there are several extensions installed with ability to set proxy This violates company policy How would an administrator block these extensions'?

- A. Set policy in the Google Admin console to block all extensions from being installed on the browser
- B. Remotely connect to each device and delete the extension from the browser
- C. Send an email to the users notifying them that they must uninstall the detected extensions
- D. Set permission policy in the Google Admin console to block such extensions

Answer: D

Explanation:
The Google Admin console allows administrators to control extension permissions. By configuring the
"Permissions and URL access" policy, the administrator can block extensions that request specific permissions, such as the ability to set a proxy. This is a centralized and effective way to enforce the security policy. Remotely connecting to each device (option B) is not scalable. Blocking all extensions (option C) might be too restrictive. Relying on users to uninstall (option D) is not enforceable.

NEW QUESTION # 38

An administrator identifies that the next major Chrome release, Chrome 130, has an issue with one of their critical business applications. The company's Chrome browsers are currently on version 129.0.6568.91. The administrator needs to prevent browsers from updating to Chrome 130, while allowing continued updates within the Chrome 129 major version.
Which target version prefix should the administrator use in the updates setting to achieve this?

- A. 129'"
- B. 129.
- C. 129(
- D. 0

Answer: B

Explanation:
To target all updates within the 129 major version, the administrator should use the target version prefix `129.
`. This tells Chrome to stay within the 129 branch and accept minor updates (like 129.0.x.y to 129.1.x.y) but not to upgrade to the next major version (130). The other options are not the correct syntax for specifying a major version prefix for target updates.

NEW QUESTION # 39

Where can information about all of the profiles associated with a browser be found*?

- A. Managed browsers detail
- B. Chrome log events
- C. Chrome Insights report
- D. Managed devices

Answer: A

Explanation:
The "Managed browsers detail" page in the Google Admin console provides specific information about individual managed Chrome browser instances. This includes details about the profiles associated with that browser, such as the signed-in users and their management status. Chrome log events might contain some profile-related information but are more focused on actions. The"Managed devices" section primarily focuses on ChromeOS devices. The "Chrome Insights report" provides a high-level overview rather than detailed profile information for a specific browser instance.
