

HPE7-A11 Exam Sample Questions & HPE7-A11 Formal Test

2026 Latest DumpsTests HPE7-A11 PDF Dumps and HPE7-A11 Exam Engine Free Share: https://drive.google.com/open?id=1iE-sJEJGz_VPae9nS5PuaDbDLp4gnOQU

Our HPE7-A11 prep material target all users and any learners, regardless of their age, gender and education background. We provide 3 versions for the clients to choose based on the consideration that all the users can choose the most suitable version to learn. The 3 versions each support different using method and equipment and the client can use the HPE7-A11 Exam Dump on the smart phones, laptops or the tablet computers. The clients can choose the version which supports their equipment on their hands to learn.

If you are a person who desire to move ahead in the career with informed choice, then the HP training material is quite beneficial for you. The HPE7-A11 pdf vce is designed to boost your personal ability in your industry. It just needs to spend 20-30 hours on the HPE7-A11 Preparation, which can allow you to face with HPE7-A11 actual test with confidence. You will always get the latest and updated information about HPE7-A11 training pdf for study due to our one year free update policy after your purchase.

Correct HPE7-A11 Exam Sample Questions & Pass-Sure HP Certification Training - Verified HP HPE Network Campus Access Professional Architect Exam

They all got benefits from HPE7-A11 certification and now they are HPE7-A11 certification holders. You can also become part of this skilled and qualified community. To do this you just need to pass the HP HPE7-A11 certification exam. Are you ready for this? Do you want to become a HPE Network Campus Access Professional Architect Exam certified? If your answer is positive then we assure you that you are at the right place. Register yourself for HPE Network Campus Access Professional Architect Exam (HPE7-A11) certification exam and download the DumpsTests HPE7-A11 exam practice questions and start preparation right now.

HPE Network Campus Access Professional Architect Exam Sample Questions (Q53-Q58):

NEW QUESTION # 53

What is the function of the HPE 5400R z2 Switch series in a campus network?

- A. Edge layer switch
- B. Wireless access point

- C. Core or distribution layer switch
- D. WAN optimization appliance

Answer: C

Explanation:

The HPE 5400R z12 series is a modular switch that can be used in core or distribution layers of a campus network. It is designed to offer high performance and scalability for large enterprise networks.

NEW QUESTION # 54

Drag and Drop Question

You hired a junior engineer to assist you with a large-scale network infrastructure project. The engineer has never worked on such a complex project before and wants to better understand the role that each stakeholder will play in the project.

Match the stakeholder title to the responsibilities that would most likely apply to their role.

□

Answer:

Explanation:

□

NEW QUESTION # 55

A global cruise line company needs to refresh its current fleet. They will refresh the 'insides' of the ship to be cost-effective and increase their sustainability. They will replace the complete WLAN/LAN hardware of the ship. In this refresh, the company will not refresh its current security requirements. The CIO also wants to limit the number of unused ports in the switches. Future expansion will always mean a refresh of hardware. They start with the smallest ship with a maximum of 800 guests.

Each ship has a LAN infrastructure consisting of two core switches, up to 10 redundant distribution switches, and up to 500 access switches (400 cabins, 100 technical rooms). The Core switches are located in the MDF of the ship and the distribution switches are located in the IDFs of the ship. Each cabin and technical room gets one single access switch.

The cabling structure of the ship will not be refreshed. Each IDF is connected to the MDF by SMF, of which two pairs are available for the interconnect between the core and distribution. The length of SM fiber between MDF and IDF is less than 300 meters (980 ft) and the type used is OS1. Each cabin is connected by a single OM2 pair to the IDF, the maximum length is 60 meters (200 ft).

Each technical room is connected by a single OM2 pair to the IDF, with lengths between 100 and 150 meters (320 and 500 ft).

For each cabin/technical room the customer is looking to replace their current fan-less 2530/2540 without changing the requirements, except they need to upgrade the uplink to distribution switch to 10GbE to handle the increased network traffic, and the technical rooms need redundant power.

The WLAN infrastructure will be 1:1 refreshed without new cabling or new AP locations. Their WLAN infrastructure is based on the 200/300 series indoor and outdoor APs running InstantOS (less than 300 APs), the customer has no change in WLAN requirements.

The cruise line company will replace its current internet connection before the LAN/WLAN refresh. The new Internet connection will provide a 99.8% uptime, which is needed to ensure the paid guest Wi-Fi is always operational. With this new Internet connection, the CIO of the cruise line wants to base the design on the ESP architecture from Aruba because internet connection is guaranteed.

Based on the best practices and customer requirements, what is the correct WLAN approach?

- A. OS10 AP only deployment
- B. OS8 campus deployment
- C. Instant OS6 deployment
- D. OS10 AP and gateway deployment

Answer: A

NEW QUESTION # 56

Your organization is planning to implement HPE Aruba Networking User Experience Insight (UXI) sensors to enhance network visibility and proactive troubleshooting across your enterprise environment. The goal is to continuously monitor user experience, application performance, and network health across wired, wireless, and WAN segments.

Which capabilities accurately describe the features and requirements of HPE Aruba Networking UXI sensors? (Choose two.)

- A. UXI directly integrates with HPE ANW SSE to continuously monitor and report Data Protection Policy violations across the network.
- B. The UXI Linux agent matches the features of physical sensors but with reduced performance and will require a separate subscription.
- C. UXI sensors deliver 24/7 cloud-based monitoring and testing of network performance across wired, wireless, and WAN environments.
- D. UXI sensors depend entirely on passive traffic monitoring and do not generate any active synthetic test traffic for network assessment.

Answer: B,C

Explanation:

UXI sensors provide continuous cloud-based monitoring using active testing to validate user experience across wired, wireless, and WAN environments.

The UXI Linux agent offers similar functionality to hardware sensors but with some performance limitations and requires its own subscription for operation.

NEW QUESTION # 57

Drag and Drop Question

Match the deployment type with the usage scenario.

□

Answer:

Explanation:

□

NEW QUESTION # 58
