ISO-IEC-27001-Foundation日本語、ISO-IEC-27001-Foundation認定試験

Fast2testすべての賞賛と高い価値は、ISO-IEC-27001-Foundation練習エンジンのより高い標準へと導きます。そのため、試験の受験者の関心を高く評価するあなたの関心に対して、私たちの労働倫理が強く強調されています。私たちAPMG-Internationalの実践教材は、ISO/IEC 27001 (2022) Foundation Exam専門知識の本質を捉えて、あなたを楽に望ましい結果に導きます。そこで、ISO-IEC-27001-Foundation学習教材の利点を引き続き参照しましょう。

APMG-International ISO/IEC 27001 (2022) Foundation Exam 認定 ISO-IEC-27001-Foundation 試験問題 (Q10-Q15):

質問 # 10

Which output is a required result from risk analysis?

- A. Risk acceptance criteria
- B. Prioritized risks for treatment
- C. Determined levels of risk

- D. Risk treatment control options

正解: C

解説:

Clause 6.1.2 (d) states that during risk analysis, the organization shall:

- * "assess the potential consequences that would result if the risks identified... were to materialize;"
- * "assess the realistic likelihood of the occurrence of the risks identified;"
- * "determine the levels of risk."

This makes it clear that the required output of risk analysis is the determined levels of risk. Risk acceptance criteria (A) are set earlier in 6.1.2(a), treatment control options (C) belong to 6.1.3, and prioritization (D) is part of risk evaluation (6.1.2 e). Therefore, the verified correct output is B: Determined levels of risk.

質問 # 11

What is required to be reported by the Information security event reporting control?

- A. Unauthorized access
- B. Information disclosure
- C. Asset disposal
- D. Observed or suspected events

正解: D

解説:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A, control 6.8 (Information security event reporting) specifies:

"Information security events should be reported through appropriate management channels as quickly as possible. The organization should require all employees and contractors to note and report any observed or suspected information security events." This wording confirms that the required reporting covers "observed or suspected events." Specific event types like information disclosure (A) or unauthorized access (B) are examples but not the broad requirement.

Asset disposal (C) is addressed separately under equipment lifecycle controls (Annex A.7.14).

Therefore, the verified correct answer is D: Observed or suspected events.

質問 # 12

Which statement describes the Classification of information control in Annex A of ISO/IEC 27001?

- A. Ensures the rules to control physical and logical access apply to assets
- B. Ensures that security perimeters are used to protect assets
- C. Ensures that information is classified based on confidentiality, integrity and availability
- D. Ensures that all information assets are labelled with their classification

正解: C

解説:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.5.12 (Classification of information) states:

"Information should be classified according to the information security needs of the organization based on confidentiality, integrity and availability." This aligns directly with option B. Option A (labelling) is a separate control (Annex A.5.13). Option C (security perimeters) is under physical controls (Annex A.7.1). Option D (access control rules) relates to Annex A.5.15 and A.8.2.

Thus, the verified correct statement for the Classification of information control is B.

質問 # 13

Which International Standard can be used to implement an integrated management system with ISO/IEC 27001?

- A. ISO/IEC 27013
- B. ISO 9001
- C. ISO/IEC 27003

- D. None of the above

正解: A

解説:

ISO/IEC 27013 provides specific guidance on the integration of ISO/IEC 27001 (Information Security Management) and ISO/IEC 20000-1 (IT Service Management). It offers practical advice for organizations seeking a unified management system approach. While ISO/IEC 27003 (A) provides guidance on ISMS implementation, it does not address integration. ISO 9001 (C) is the Quality Management Standard and can be integrated, but the specific standard designed for integrating 27001 with ITSM is ISO/IEC 27013. Therefore, the correct answer is B: ISO/IEC 27013, as it is explicitly published for this purpose.

質問 # 14

Which aspect of ISO/IEC 27001 requires that contractors know about the organization's information security policies?

- A. Communication
- **B. Awareness**
- C. Nonconformity and corrective action
- D. Competence

正解: B

解説:

Clause 7.3 (Awareness) requires:

"Persons doing work under the organization's control shall be aware of: (a) the information security policy; (b) their contribution to the effectiveness of the ISMS, including the benefits of improved information security performance; (c) the implications of not conforming with the ISMS requirements." This applies not only to employees but also contractors and external parties under the organization's control.

Competence (B) requires having skills, training, and experience, while Communication (C) covers defining communication processes (Clause 7.4). Nonconformity and corrective action (A) is part of Clause 10 (Improvement).

Therefore, the specific requirement that ensures contractors are made aware of the information security policies is found in Clause 7.3 Awareness. Correct answer: D.

質問 # 15

.....

現在、多くの外資系会社は APMG-International の ISO-IEC-27001-Foundation 試験認定を持つ職員に奨励を与えます。それに、ISO-IEC-27001-Foundation 試験に合格しない人々は大変なことであるのでしょうか？我々の APMG-International の ISO-IEC-27001-Foundation 問題集は試験に準備する受験生にヘルプを与えます。もしあなたは APMG-International の ISO-IEC-27001-Foundation 試験に準備しているなら、弊社 Fast2test の ISO-IEC-27001-Foundation 問題集を使ってください。
