For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**ANSWER AREA**

Statements	Yes	No
Admin2 can review the results of Policy1 at 3:00 PM on August 2, 2023.	<input type="radio"/>	<input type="radio"/>
Admin3 can review the results of Policy3 at 9:00 PM on August 2, 2023.	<input type="radio"/>	<input type="radio"/>
Admin1 can review the results of Policy2 at 2:00 PM on August 2, 2023.	<input type="radio"/>	<input type="radio"/>

**Answer:**

Explanation:

**ANSWER AREA**

Statements	Yes	No
Admin2 can review the results of Policy1 at 3:00 PM on August 2, 2023.	<input type="radio"/>	<input checked="" type="radio"/>
Admin3 can review the results of Policy3 at 9:00 PM on August 2, 2023.	<input checked="" type="radio"/>	<input type="radio"/>
Admin1 can review the results of Policy2 at 2:00 PM on August 2, 2023.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation:

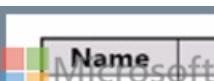

**ANSWER AREA**

Statements	Yes	No
Admin2 can review the results of Policy1 at 3:00 PM on August 2, 2023.	<input type="radio"/>	<input checked="" type="radio"/>
Admin3 can review the results of Policy3 at 9:00 PM on August 2, 2023.	<input checked="" type="radio"/>	<input type="radio"/>
Admin1 can review the results of Policy2 at 2:00 PM on August 2, 2023.	<input checked="" type="radio"/>	<input type="radio"/>

### NEW QUESTION # 305

You have a Microsoft 365 E5 subscription that contains the adaptive scopes shown in the following table.

Name	Type	Query
Scope1	Users	FirstName starts with User
Scope2	SharePoint Online sites	SiteTitle starts with Site

You create the retention policies shown in the following table.

Name	Type	Location
RPolicy1	Adaptive	Scope1
RPolicy2	Adaptive	Scope2
RPolicy3	Static	Microsoft 365 groups

Which retention policies support a preservation lock?

- A. RPolicy1, RPolicy2, and RPolicy3
- B. RPolicy3only
- C. RPolicy2only
- D. RPolicy1and RPolicy2 only

- E. RPolicy1 and RPolicy3 only

**Answer: E**

**NEW QUESTION # 306**

Case Study 1 - Fabrikam, Inc

Overview

Fabrikam, Inc. is a consulting company that has a main office in Montreal and six branch offices in New York, Seattle, Miami, Houston, Los Angeles, and Vancouver.

Existing Environment

Cloud Environment

Fabrikam has a Microsoft 365 tenant that contains the following resources:

An Azure Active Directory (Azure AD) tenant that syncs to an on-premises Active Directory domain named corp.fabrikam.com

Microsoft Cloud App Security connectors configured for all supported cloud applications used by the company Some users have company Dropbox accounts.

Compliance Configuration

Fabrikam has the following in the Microsoft 365 compliance center:

A data loss prevention (DLP) policy is configured. The policy displays a tooltip to users. Users can provide a business justification to override a DLP policy violation.

The Azure Information Protection unified labeling scanner is installed and configured.

A sensitivity label named Fabrikam Confidential is configured.

An existing third-party records management system is managed by the compliance department.

Human Resources (HR) Management System

The HR department has an Azure SQL database that contains employee information. Each employee has a unique 12-character alphanumeric ID. The database contains confidential employee attributes including payroll information, date of birth, and personal contact details.

On-Premises Environment

You have an on-premises file server that runs Windows Server 2019 and stores Microsoft Office documents in a shared folder named Data.

All end-user computers are joined to the corp.fabrikam.com domain and run a third-party antimalware application.

Business Processes

Sales Contracts

Users in the sales department receive draft sales contracts from customers by email. The sales contracts are written by the customers and are not in a standard format.

Employment Applications

Employment applications and resumes are received by HR department managers and stored in either mailboxes, Microsoft SharePoint Online sites, OneDrive for Business folders, or Microsoft Teams channels.

The employment application form is downloaded from SharePoint Online and a serial number is assigned to each application.

The resumes are written by the applicants and are in any format.

Requirements

HR Requirements

You need to create a DLP policy that will notify the HR department of a DLP policy violation if a document that contains confidential employee attributes is shared externally. The DLP policy must use an Exact Data Match (EDM) classification derived from a CSV export of the HR department database.

The HR department identifies the following requirements for handling employment applications:

Resumes must be identified automatically based on similarities to other resumes received in the past.

Employment applications and resumes must be deleted automatically two years after the applications are received.

Documents and emails that contain an application serial number must be identified automatically and marked as an employment application.

Sales Requirements

A sensitivity label named Sales Contract must be applied automatically to all draft and finalized sales contracts.

Compliance Requirements

Fabrikam identifies the following compliance requirements:

All DLP policies must be applied to computers that run Windows 10, with the least possible changes to the computers.

Users in the compliance department must view the justification provided when a user receives a tooltip notification for a DLP violation.

If a document that has the Fabrikam Confidential sensitivity label applied is uploaded to Dropbox, the file must be deleted automatically.

The Fabrikam Confidential sensitivity label must be applied to existing Microsoft Word documents in the Data shared folder that

have a document footer containing the following string: Company use only.

Users must be able to manually select that email messages are sent encrypted. The encryption will use Office 365 Message Encryption (OME) v2. Any email containing an attachment that has the Fabrikam Confidential sensitivity label applied must be encrypted automatically by using OME.

Existing policies configured in the third-party records management system must be replaced by using Records management in the Microsoft 365 compliance center. The compliance department plans to export the existing policies, and then produce a CSV file that contains matching labels and policies that are compatible with records management in Microsoft 365.

The CSV file must be used to configure records management in Microsoft 365.

#### Executive Requirements

You must be able to restore all email received by Fabrikam executives for up to three years after an email is received, even if the email was deleted permanently.

You need to recommend a solution that meets the Data Loss Prevention requirements for the HR department.

Which three actions should you perform? Each correct answer presents part of the solution.

(Choose three.)

NOTE: Each correct selection is worth one point.

- A. Create a sensitive info type rule package that contains regular expressions.
- B. Define the sensitive information database schema in the XML format.
- C. Schedule EdmUploadAgent.exe to hash and upload a data file that contains employee information.
- D. Define the sensitive information database schema in the CSV format.
- E. Create a sensitive info type rule package that contains the EDM classification.

**Answer: B,C,E**

Explanation:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/create-custom-sensitive-information-types-with-exact-data-match-based-classification?view=o365-worldwide>

## NEW QUESTION # 307

Hotspot Question

You have a Microsoft 365 E5 subscription that contains the data loss prevention (DLP) policies shown in the following table.

Name	Applied to
DLP1	Microsoft Exchange Online email
DLP2	Microsoft SharePoint Online sites
DLP3	Microsoft Teams Chat and channel messages

You have a custom employee information form named Template1.docx.

You plan to create a sensitive info type named Sensitive1 that will use the document fingerprint from Template1.docx.

What should you use to create Sensitive1, and in which DLP policies can you use Sensitive1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area** 

Create Sensitive1 by using:

- Security & Compliance PowerShell
- The Exchange admin center
- The Microsoft Purview compliance portal
- The SharePoint admin center

Use Sensitive1 in:

- DLP1 only
- DLP2 only
- DLP1 and DLP2 only
- DLP1, DLP2, and DLP3

**Answer:**

Explanation:

## Answer Area Microsoft

Create Sensitive1 by using:

- Security & Compliance PowerShell
- The Exchange admin center
- The Microsoft Purview compliance portal
- The SharePoint admin center

Use Sensitive1 in:

- DLP1 only
- DLP2 only
- DLP1 and DLP2 only
- DLP1, DLP2, and DLP3

### NEW QUESTION # 308

You need to recommend a solution that meets the sales requirements.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Create a trainable classifier.	
Create an auto-labeling policy for sensitivity labels.	
Create a sensitive info type that contains a keywords classification.	
Create a sensitive info type that contains an EDM classification.	
Create a sensitive info type that contains a document fingerprint.	
Upload sample contract documents to a seed content folder in SharePoint Online.	

Move items from the Actions list to the Answer Area using the following buttons:

- > (Move to the right)
- < (Move to the left)
- Up (Move up)
- Down (Move down)

Answer:

Explanation:

Statements	Yes	No
If a user creates a file in Site4 on January 1, 2021, users will be able to access the file on January 15, 2023.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
If a user deletes a file from Site4 that was created on January 1, 2021, an administrative user will be able to recover the file on April 15, 2023.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
If a user deletes a file from Site4 that was created on January 1, 2021, an administrative user will be able to recover the file on April 15, 2026.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
