Fast2testは、魅力的なキャラクターで世界中の試験受験者を招きます。当社の専門家は彼らの卓越性に大きく貢献しました。したがって、試験をシミュレートするPlat-Admn-202が最良であると率直に言うことができます。Plat-Admn-202学習教材のコンテンツを作成する取り組みは、学習ガイドの開発につながり、完成度を高めます。関心を集め、いくつかの難しい点を簡素化するために、当社の専門家は当社のPlat-Admn-202学習資料を設計し、Plat-Admn-202学習ガイドをよりよく理解できるように最善を尽くします。

Salesforce Plat-Admn-202 認定試験の出題範囲：

トピック	出題範囲
トピック 1	<ul style="list-style-type: none">• Business Logic and Process Automation: This section of the exam measures the skills of Process Automation Specialists and Salesforce Administrators and covers the key tools Salesforce provides to automate and enforce business logic. It focuses on using formula fields, roll-up summary fields, and validation rules to meet defined requirements. Candidates must also understand approval processes and know how to select the right automation tool to prevent conflicts or errors. The domain emphasizes evaluating business requirements and recommending automation solutions that maintain system stability and accuracy.

トピック 2	<ul style="list-style-type: none"> • App Deployment: This section of the exam measures the skills of Release Managers and Salesforce Administrators and covers the application lifecycle from planning through deployment. It requires determining the appropriate strategy when working with different sandboxes and managing milestones during development. Candidates must know when to use change sets and how to troubleshoot deployment issues. The section also includes understanding the implications of using unmanaged versus managed packages and selecting the correct deployment plan for various business scenarios.
トピック 3	<ul style="list-style-type: none"> • Data Modeling and Management: This section of the exam measures the skills of Data Analysts and Salesforce Administrators and covers the core principles of designing and maintaining Salesforce data structures. It requires selecting the correct data model in various scenarios and understanding relationship types and how they influence reporting, record access, and the user interface. It also tests knowledge of field data types and the operational impact of changing them. The section includes evaluating the use of Schema Builder and understanding the considerations involved in importing and exporting data across internal and external sources.
トピック 4	<ul style="list-style-type: none"> • Salesforce Fundamentals: This section of the exam measures the skills of Salesforce Administrators and Junior Salesforce Consultants and covers the essential concepts needed to understand how Salesforce works at a foundational level. It focuses on recognizing when to use declarative tools versus programmatic customization, determining when AppExchange apps extend org capabilities, and understanding key methods for managing object, record, and field access. It also evaluates your ability to choose the right sharing model based on business needs and to apply reporting tools effectively, including report types and dashboards. Additionally, the domain reviews how to optimize the mobile experience through actions and layouts, and how Chatter can be used to support collaboration.
トピック 5	<ul style="list-style-type: none"> • User Interface: This section of the exam measures the skills of Salesforce UI Designers and Lightning App Builders and covers the ways in which Salesforce interfaces can be customized to improve usability. It includes understanding available options for UI customization and demonstrating when to apply custom buttons, links, and actions. The domain also distinguishes between declarative and programmatic methods for incorporating Lightning components in applications, ensuring that the right approach is selected for different user interface needs.

Salesforce Plat-Admn-202教育資料 & Plat-Admn-202技術内容

Plat-Admn-202有用なテストガイド資料は、最も重要な情報を最も簡単な方法でクライアントに提示するので、Plat-Admn-202有用なテストガイドを学習するための時間とエネルギーはほとんど必要ありません。クライアントは、テストの学習と準備に20~30時間しかかかりません。仕事や学習などで忙しい人にとっては、これは良いニュースです。なぜなら、テストの準備に十分な時間がないことを心配する必要がなく、主なことをゆっくりとできるからです。Plat-Admn-202学習実践ガイドをご覧ください。ですから、Plat-Admn-202試験の教材の大きな利点であり、クライアントにとって非常に便利です。

Salesforce Certified Platform App Builder 認定 Plat-Admn-202 試験問題 (Q125-Q130):

質問 # 125

Universal Containers (UC) has large data volumes and is nearing data storage limits. The planned solution is to archive historical data to reduce data storage in Salesforce; however, UC would still like to use reports, queries, and lookups on the archived information. Which two options could meet this requirement?

Choose 2 answers

- A. Big objects
- B. Related objects
- C. Custom objects
- D. External objects

正解: A、D

解説:

Big objects and external objects can be used to archive historical data and reduce data storage in Salesforce, while still allowing users to access the archived data using reports, queries, and lookups. Big objects store data within Salesforce, while external objects store data outside Salesforce and integrate it with Salesforce using an external data source

質問 # 126

An app builder needs to create new automation on an object.

What best practice should the app builder follow when building out automation?

- A. One Flow per object.
- B. One Workflow rule per object.
- C. One record change process per object.
- D. One invocable process per object.

正解: C

解説:

The best practice that the app builder should follow when building out automation is one record change process per object. A record change process is a type of process in Process Builder that starts when a record is created or updated. Having one record change process per object can avoid conflicts or errors when multiple processes try to update the same record at the same time. Option A is incorrect because one workflow rule per object is not a best practice, as workflow rules are considered legacy tools and have limitations compared to Process Builder. Option B is incorrect because one flow per object is not a best practice, as flows are more complex and require more resources than processes. Option C is incorrect because one invocable process per object is not a best practice, as invocable processes are used to invoke other processes from within a process or a flow.

質問 # 127

Which opportunity standard field is available to be configured directly? Choose 3

- A. Stage
- B. Forecast category
- C. Lead source
- D. Type

正解: A、C、D

解説:

The opportunity standard fields that are available to be configured directly are Stage, Lead Source, and Type. These fields can be modified by editing their picklist values, adding or removing values, or changing their default values. Option A is incorrect because Forecast Category is not a standard field on the opportunity object, but rather a system field that is automatically derived from the Stage field.

質問 # 128

An app builder would like to streamline the user experience by reflecting summarized calculations of specific fields on various objects. Which field types could be used in roll-up summary fields to accomplish this? Choose 3 answers

- A. Time
- B. Date
- C. Checkbox
- D. Currency
- E. Percent

正解: C、D、E

解説:

Roll-up summary fields can only be created on master-detail relationships, and they can only calculate numeric fields, such as currency, percent, and number. Date and time fields are not supported for roll-up summary fields. Checkbox fields can be used in roll-up summary filters, but not in the field to aggregate
