A lot of Salesforce Certified Platform App Builder (Plat-Admn-202) exam applicants have used the Salesforce Certified Platform App Builder (Plat-Admn-202) practice material. They are satisfied with it because it is updated.

## Salesforce Certified Platform App Builder Sample Questions (Q120-Q125):

### NEW QUESTION # 120

The app builder at Ursa Major Solar has just created a master-detail relationship between a parent object Galaxy\_\_c and child object Star\_\_c.

What would be the effect of creating this type of relationship if users want to report on Galaxy\_\_c with Star\_\_c?

- A. A new custom report type will need to be created for Star\_\_c with lookup fields from Galaxy\_\_c.
- B. A new custom report type will need to be created for Galaxy\_\_c with Star\_\_c.
- C. A Star\_\_c report type with Galaxy\_\_c as a field will be automatically created.
- **D. A Galaxy\_\_c with Star\_\_c report type will be automatically created.**

**Answer: D**

Explanation:

A master-detail relationship between two objects automatically creates a report type that includes both objects. The app builder does not need to create a custom report type for this scenario. The report type will have the format of Parent object with Child object

### NEW QUESTION # 121

Ursa Major Solar is ramping up the sales team to meet increased demand. As part of the short ramp up for these new reps, the manager wants to provide a help guide to enable reps to easily get help where needed during the different sales processes.

Which solution should an app builder recommend?

- **A. Path**
- B. Journey Builder
- C. Chatter Publisher
- D. Flow

**Answer: A**

Explanation:

To provide a help guide to enable reps to easily get help where needed during the different sales processes, an app builder should recommend Path. Path is a component that displays the key fields and guidance for each stage of a sales process on an object's record page. Users can see where they are in the process, update the stage and fields, and access resources such as tips and links. [Source]

#### NEW QUESTION # 122

Universal Containers (UC) delivers purchased containers to remote construction sites. Customers supply UC with crossroads or location markers.

Which field type should the app builder use to capture this information?

- A. External Lookup
- **B. Geolocation**
- C. Reference
- D. Number

**Answer: B**

Explanation:

The best choice for capturing geographic location data, such as crossroads or location markers provided by customers, is the Geolocation field type. This field type stores latitude and longitude data, allowing accurate pinpointing of locations on a map. Geolocation fields are suitable for any application that needs to handle coordinates for mapping and proximity calculations.

A: Number field is not specific enough for geographical coordinates.

C: Reference fields link to other records, not geographical data.

#### NEW QUESTION # 123

An app builder at Universal Containers has been asked to add the Chatter feed to a custom object record page.

Which approach should the app builder use?

- A. Add the Chatter feed component from the AppExchange.
- B. Add the standard related list component
- C. Add a custom Chatter feed component
- **D. Add the standard Chatter feed component.**

**Answer: D**

Explanation:

Add the standard Chatter feed component is how an app builder can add the Chatter feed to a custom object record page.

According to the Salesforce documentation, "The Chatter Feed component displays updates about records in your org." Add the standard related list component, add a custom Chatter feed component, and add the Chatter feed component from the AppExchange are not valid or necessary options.

#### NEW QUESTION # 124

A sales rep at AW Computing is unable to find what they are looking for while scrolling through their Chatter feed.

How can a filter be utilized to show only posts from their key account and opportunity records?

- A. Create Chatter bookmarks
- **B. Create a Chatter stream.**
- C. Create a Chatter notification.
- D. Create a Chatter group.

**Answer: B**

Explanation:

Create a Chatter stream. This is correct because a Chatter stream allows users to follow multiple records and people in one feed, and filter the feed by selecting a stream.
