

# DA0-002 Sure Pass, DA0-002 Test Sample Online

P.S. Free & New DA0-002 dumps are available on Google Drive shared by Pass4suresVCE: [https://drive.google.com/open?id=1wc26UotJwUuk\\_T5NuQu8MsZMbHQNS8Ea](https://drive.google.com/open?id=1wc26UotJwUuk_T5NuQu8MsZMbHQNS8Ea)

In the course of your study, the test engine of DA0-002 actual exam will be convenient to strengthen the weaknesses in the learning process. This can be used as an alternative to the process of sorting out the wrong questions of DA0-002 learning guide in peacetime learning, which not only help you save time, but also makes you more focused in the follow-up learning process with our DA0-002 learning materials.

## CompTIA DA0-002 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• <b>Data Mining:</b> This section of the exam measures skills of a Business Intelligence Analyst and covers how data is collected, cleaned, and prepared for analysis. It explains methods like ETL and ELT for data integration, as well as web scraping, API use, and survey data collection. Candidates are expected to identify issues like missing or duplicated data and apply techniques like filtering, sorting, merging, and normalizing. The section also touches on query optimization strategies to improve data handling efficiency.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• <b>Data Analysis:</b> This section of the exam measures skills of a Reporting Analyst and includes foundational knowledge of statistical methods such as averages, variances, and standard deviation. It covers how to use data to find patterns, track performance, and make predictions. This domain also introduces hypothesis testing, regression, correlation, and different types of analysis like exploratory and trend analysis. Candidates should also be aware of common tools used for analysis, including Excel, SQL, Python, R, and popular BI platforms like Tableau and Power BI.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• 5.0 Data Governance, Quality, and Controls</li> </ul>

## DA0-002 Test Sample Online, DA0-002 Reliable Test Cost

Have you been many years at your position but haven't got a promotion? Or are you a new comer in your company and eager to make yourself outstanding? Our DA0-002 exam materials can help you. After a few days' studying and practicing with our DA0-002 products you will easily pass the examination. God helps those who help themselves. If you choose our DA0-002 Study Materials, you will find God just by your side. The only thing you have to do is just to make your choice and study. Isn't it very easy? So know more about our DA0-002 study guide right now!

## CompTIA Data+ Exam (2025) Sample Questions (Q30-Q35):

### NEW QUESTION # 30

Which of the following is the best language to use in a notebook?

- A. SAS
- B. JavaScript
- C. Haskell
- **D. Python**

**Answer: D**

### NEW QUESTION # 31

A company gives users adequate data access permissions to allow them to fulfill their duties but nothing more. Which of the following concepts best describes this practice?

- A. Hierarchical access
- **B. Least privilege**
- C. Zero Trust
- D. Active Directory

**Answer: B**

Explanation:

This question pertains to the Data Governance domain, focusing on data security and access control principles. The company restricts access to the minimum needed for duties, which aligns with a specific security concept.

\* Active Directory (Option A): Active Directory is a tool for managing users and permissions, not a concept.

\* Hierarchical access (Option B): Hierarchical access implies access based on roles in a hierarchy, but it doesn't specifically focus on minimal access.

\* Zero Trust (Option C): Zero Trust requires continuous verification for all access, which is broader than just minimal permissions.

\* Least privilege (Option D): Least privilege ensures users have only the permissions necessary for their duties, which matches the scenario.

The DA0-002 Data Governance domain includes "data privacy concepts," and least privilege is a fundamental principle for secure access control.

Reference: CompTIA Data+ DA0-002 Draft Exam Objectives, Domain 5.0 Data Governance.

### NEW QUESTION # 32

A data analyst needs to join together a table data source and a web API data source using Python. Which of the following is the best way to accomplish this task?

- **A. Convert the data from the API and database to a JSON format and convert them to pandas DataFrames that are then merged together.**
- B. Convert the data from the API and database to a TXT format and convert them to pandas DataFrames that are then merged together.
- C. Convert the data from the API and database to a varchar format and convert them to pandas DataFrames that are then merged together.
- D. Convert the data from the API and database to a string format and convert them to pandas DataFrames that are then merged together.

**Answer: A**

Explanation:

This question falls under the Data Acquisition and Preparation domain of CompTIA Data+ DA0-002, which involves acquiring and combining data from different sources, such as a database and a web API, using tools like Python. The task requires joining the data, which in Python often involves using pandas DataFrames.

\* Convert the data from the API and database to a varchar format and convert them to pandas DataFrames that are then merged together (Option A): VARCHAR is a database data type for strings, not a format for data exchange or merging in Python, making this incorrect.

\* Convert the data from the API and database to a JSON format and convert them to pandas DataFrames that are then merged together (Option B): Web APIs commonly return data in JSON format, and databases can export data as JSON. In Python, JSON data can be easily converted to pandas DataFrames using `pandas.read_json()` or `pandas.DataFrame()`, and then merged using `pandas.merge()` on a common key, making this the best approach.

\* Convert the data from the API and database to a TXT format and convert them to pandas DataFrames that are then merged together (Option C): TXT is a generic text format that lacks structure, making it less efficient for merging compared to JSON.

\* Convert the data from the API and database to a string format and convert them to pandas DataFrames that are then merged together (Option D): Converting to a string format is vague and not a standard approach for structured data merging in Python.

The DA0-002 Data Acquisition and Preparation domain includes "executing data manipulation," such as combining data from APIs and databases, and JSON is a standard format for this purpose in Python.

Reference: CompTIA Data+ DA0-002 Draft Exam Objectives, Domain 2.0 Data Acquisition and Preparation.

### NEW QUESTION # 33

A data analyst troubleshoots a dashboard every day for a week. Which of the following techniques best addresses how to validate the data moving forward?

- **A. Setting up monitoring alerts**
- B. Reaching out to users daily
- C. Rebuilding the dashboard
- D. Inquiring about structure changes

**Answer: A**

Explanation:

This question pertains to the Data Governance domain, focusing on ensuring data quality and reliability in dashboards over time. Daily troubleshooting indicates a recurring issue, and the task is to validate data moving forward.

\* Inquiring about structure changes (Option A): This might identify past issues but doesn't provide ongoing validation.

\* Setting up monitoring alerts (Option B): Monitoring alerts can automatically notify the analyst of data issues (e.g., missing updates, errors), providing a proactive way to validate data continuously.

\* Reaching out to users daily (Option C): This is inefficient and reactive, not a sustainable validation method.

\* Rebuilding the dashboard (Option D): Rebuilding might fix current issues but doesn't ensure future validation.

The DA0-002 Data Governance domain includes "data quality control concepts," such as implementing monitoring to ensure data reliability in dashboards.

Reference: CompTIA Data+ DA0-002 Draft Exam Objectives, Domain 5.0 Data Governance.

### NEW QUESTION # 34

The human resources department wants to understand the relationship between the ages and incomes of all employees. Which of the

following graphics is the most appropriate to present the analysis?

- A. Bar chart
- **B. Scatter plot**
- C. Pie chart
- D. Area plot

**Answer: B**

Explanation:

This question pertains to the Visualization and Reporting domain, focusing on selecting the appropriate visualization to show a relationship between two continuous variables (ages and incomes).

\* Scatter plot (Option A): A scatter plot displays individual data points on two axes (age vs. income), making it ideal for showing the relationship and potential correlation between two continuous variables.

\* Area plot (Option B): Area plots are used for showing trends over time, not relationships between two variables.

\* Bar chart (Option C): Bar charts are better for categorical data comparisons, not continuous variable relationships.

\* Pie chart (Option D): Pie charts show proportions of a whole, not suitable for showing relationships between variables.

The DA0-002 Visualization and Reporting domain emphasizes "translating business requirements to form the appropriate visualization," and a scatter plot is best for showing the relationship between age and income.
