## 300-745 testing engine training online | 300-745 test dumps

300-745 study dumps have a pass rate of 98% to 100% because of the high test hit rate. So our exam materials are not only effective but also useful. If our candidates have other things, time is also very valuable. It is very difficult to take time out to review the 300-745 Exam. But if you use 300-745 exam materials, you will learn very little time and have a high pass rate. Our 300-745 study materials are worthy of your trust.

## Cisco Designing Cisco Security Infrastructure Sample Questions (Q44-Q49):

### NEW QUESTION # 44

A security engineer on an application design team must choose a framework of attack patterns to evaluate during threat modeling. Which framework provides the common set of attacks?

- A. MITRE CAPEC
- B. GDPR
- C. Cisco SAFE
- D. SOC2

**Answer: A**

Explanation:

MITRE CAPEC (Common Attack Pattern Enumeration and Classification) provides a standardized catalog of attack patterns. It is specifically designed for use in threat modeling and application design, allowing security engineers to anticipate and evaluate common attacks.

**NEW QUESTION # 45**

An employee of a pharmaceutical company accidentally checked in code that contains AWS secret keys to a public GitHub repository, which exposes production resources to attackers.

Which mitigation strategy must a security engineer recommend to prevent future reoccurrence?

- A. Implement a phishing education campaign.
- **B. Configure a SCM precommit hook.**
- C. Add a web application firewall.
- D. Implement a more granular port security strategy.

**Answer: B**

Explanation:

An SCM (Source Code Management) precommit hook scans code for sensitive information such as AWS keys before it is committed. This prevents developers from accidentally pushing secrets to public repositories, protecting production resources from exposure.

**NEW QUESTION # 46**

A furniture company recently discovered that the endpoint detection and response configuration flagged several malicious files on company-managed laptops. The company must enhance security to prevent known malicious files from being delivered to the network and endpoints. The new solution must enhance the company's ability to inspect and filter incoming traffic effectively.

Which security product must be used to accomplish this goal?

- A. host-based firewall
- B. traditional firewall
- **C. next-generation firewall**
- D. eBPF

**Answer: C**

Explanation:

A next-generation firewall (NGFW) inspects and filters incoming traffic with deep packet inspection, intrusion prevention, and advanced malware filtering. This prevents known malicious files from reaching the network and endpoints, complementing the company's EDR solution.

**NEW QUESTION # 47**

A telecommunications company recently introduced a hybrid working model. Based on the new policy, employees can work remotely for 2 days per week if corporate equipment is used. The IT department is preparing corporate laptops to support users during the remote working days.

Which solution must the IT department implement that provides secure connectivity to corporate resources and protects sensitive corporate data even if a laptop is stolen?

- A. Cisco Duo
- **B. Secure Client**
- C. ISE Posture
- D. Umbrella

**Answer: B**

Explanation:

Cisco Secure Client (formerly AnyConnect) provides secure remote connectivity through VPN, ensuring encrypted access to

corporate resources. It also integrates endpoint security features, protecting sensitive corporate data even if a laptop is stolen.

#### **NEW QUESTION # 48**

A global hotel chain is using Cisco ISE and Cisco switches to manage the network. The hotel company wants to enhance network security by segmenting users and endpoints. The company must ensure that devices within the same VLAN cannot communicate with each other. The goal is to prevent cross-communication without the use of dynamic access control lists. Which action must be taken using Cisco ISE to meet the requirement?

- A. Configure TrustSec.
- B. Set up endpoint profiling.
- C. Enable identity groups.
- D. Implement device posturing.

**Answer: A**

Explanation:

Cisco TrustSec provides software-defined segmentation by assigning Security Group Tags (SGTs) to users and devices. This allows policy enforcement that prevents communication between devices in the same VLAN without needing dynamic ACLs. It is the correct approach to achieve secure segmentation in this scenario.

#### **NEW QUESTION # 49**

.....

We believe that the best brands are those that go beyond expectations. They don't just do the job – they go deeper and become the fabric of our lives. Therefore, as the famous brand, even though we have been very successful we have never satisfied with the status quo, and always be willing to constantly update the contents of our 300-745 exam torrent. Most important of all, as long as we have compiled a new version of the 300-745 Guide Torrent, we will send the latest version of our 300-745 training materials to our customers for free during the whole year after purchasing. We will continue to bring you integrated 300-745 guide torrent to the demanding of the ever-renewing exam, which will be of great significance for you to keep pace with the times.
