NEW QUESTION # 63

When you create a purchasing organization in your organizational structure, which of the following assignments is a must?

- A. Purchase organization to storage location
- **B. Purchase organization to company code**
- C. Purchase organization to distribution channel
- D. Purchase organization to plant

Answer: B

Explanation:

In SAP S/4HANA Cloud Public Edition, when creating a purchasing organization in the organizational structure, it must be assigned to a company code. This assignment ensures that the purchasing organization is linked to the financial and legal entity for which procurement activities are performed.

* Purchase organization to company code (Option D): The purchasing organization is responsible for procurement activities, and its assignment to a company code ensures proper financial integration. For example, invoices generated by the purchasing organization are posted to the corresponding company code. The SAP Organizational Structure Guide confirms this requirement.

* A. Purchase organization to storage location: Storage locations are part of the plant structure and are not directly linked to purchasing organizations.

* B. Purchase organization to distribution channel: Distribution channels are used in sales and distribution processes, not in procurement.

* C. Purchase organization to plant: While purchasing organizations can interact with plants during procurement, they are not directly assigned to plants. Instead, plants are assigned to company codes.

* SAP Organizational Structure Guide: Explains the relationship between purchasing organizations and company codes in SAP S/4HANA Cloud Public Edition. <https://help.sap.com>

* SAP S/4HANA Cloud Procurement Guide: Provides details on configuring purchasing organizations and their assignments.
