## PMI-ACP考證，PMI-ACP套裝

有了NewDumps的PMI-ACP考古題，即使你只用很短的時間來準備考試，你也可以順利通過考試。因為NewDumps的考古題包含了在實際考試中可能出現的所有問題，所以你只需要記住PMI-ACP考古題裏面出現的問題和答案，你就可以輕鬆通過考試。這是通過考試最快的捷徑了。如果你工作很忙實在沒有時間準備考試，但是又想取得PMI-ACP的認證資格，那麼，你絕對不能錯過NewDumps的PMI-ACP考古題。因為這是你通過考試的最好的，也是唯一的方法。

PMI Agile Certified Practitioner（PMI-ACP）認證考試是一項全球認可且高度評價的認證，旨在驗證個人在敏捷原則和實踐方面的知識和專業能力。該認證由項目管理學會（PMI）提供，該協會是項目經理和其他項目管理專業人員的領先專業協會。PMI-ACP認證針對在敏捷環境中工作並希望增強敏捷方法論的技能和知識的個人。

## 最新的 PMI Agile PMI-ACP 免費考試真題 (Q43-Q48):

### 問題 #43

A project team tasked with delivering a solution with extremely aggressive timelines is facing an issue with meeting their sprint

velocity targets.

To address this issue and bring the project back on track, what action should the team take?

- A. Reevaluate the minimum viable product (MVP) deliverables to remove high-risk stories and meet timelines.
- **B. Perform value stream analysis to eliminate the processes with wastage.**
- C. Adjust the story points included in each sprint to represent the actual velocity.
- D. Include high-risk stories in earlier sprints to deliver incremental velocity.

**答案： B**

解題說明：

The correct answer is A - Perform value stream analysis to eliminate the processes with wastage. Value stream mapping is a lean and agile technique used to identify and eliminate non-value-adding activities, optimize flow, and increase delivery efficiency- especially crucial when facing tight deadlines.

From PMI Agile Practice Guide:

"Value stream mapping is used to analyze the flow of materials and information required to bring a product or service to a consumer. It helps teams eliminate waste and improve speed and quality." (PMI Agile Practice Guide, Section 6.4 - Continuous Improvement and Feedback Loops) From Mike Griffiths' PMI-ACP Exam Prep Book:

"Value stream analysis is a lean technique that helps agile teams identify delays, bottlenecks, and handoffs that waste time. When velocity lags behind expectations, understanding the end-to-end process is essential to improvement." (Mike Griffiths, Chapter 7 - Continuous Improvement) Option B (removing high-risk stories) may introduce more long-term risk and undermine value.

Option C suggests manipulating metrics instead of addressing root causes.

Option D may help identify risks early, but it doesn't address why velocity is low.

#### 問題 #44

What estimation technique is an agile team using when collectively estimating the relative size of its stories using story points?

- A. One-to-one comparison
- **B. Planning poker**
- C. Affinity
- D. Parametric

**答案： B**

解題說明：

Planning Poker is a well-known estimation technique where team members use numbered cards (usually Fibonacci series) to estimate story point values based on relative size. It's a consensus-based estimation method, as described in the PMI Agile Practice Guide (Section 5.2: Estimation Techniques) and Mike Griffiths' PMI-ACP Exam Prep Book (Chapter 6: Estimating Techniques).

\* Option D is correct: Planning Poker is explicitly designed for estimating stories in terms of points.

\* Option A (Parametric) is more common in traditional (predictive) planning.

\* Option B (One-to-one comparison) refers to relative sizing without collaboration.

\* Option C (Affinity) is another agile technique but typically used for grouping stories into size buckets, not direct story point consensus estimation.

#### 問題 #45

An agile coach is working with a team that serves clients making product requests by phone. During a daily commitment and replanning meeting, a team member states that they were unable to resolve a client request because they lacked sufficient product knowledge.

What should the agile coach do?

- A. Ask the line manager to assign the team member with the required technical knowledge.
- B. Provide the team member with training in any lacking areas.
- **C. Facilitate a team discussion to identify knowledge gaps and determine the best way to address them**
- D. Meet with the team member's line manager to discuss their development plan.

**答案： C**

解題說明：

The correct answer is A - Facilitate a team discussion to identify knowledge gaps and determine the best way to address them.

The agile coach's role is to foster team ownership and encourage collaborative problem solving. When knowledge gaps are uncovered, the first step is to create transparency and engage the team in identifying how to resolve the gap-through pairing, mentoring, spikes, or backlog adjustments.

From the PMI Agile Practice Guide:

"Agile leaders coach teams to self-identify impediments and explore solutions collaboratively. Coaching helps teams build awareness and take ownership of their development and process improvements." (PMI Agile Practice Guide, Section 6.2 - Coaching the Agile Team) Mike Griffiths adds:

"Rather than providing direct solutions, agile coaches should help teams uncover their own improvements through retrospection, facilitated discussion, and group problem solving." (Mike Griffiths, PMI-ACP Exam Prep Book, Chapter 7 - Continuous Improvement / Coaching) Why the other options fall short:

\* B & C externalize the problem instead of building team capability.

\* D may be part of the solution, but the team should explore it collectively-not as a unilateral decision.

#### 問題 #46

The Product Owner does not have to be a single person but may be a committee or a shared responsibility between multiple individuals.

- A. False
- B. True

答案： A

#### 問題 #47

The purpose of a project burndown chart is to:

- A. Identify dependencies between sprints or iterations.
- B. Identify and communicate upcoming milestones.
- C. Display the level of effort and resources utilized.
- D. Display the remaining work across time.

答案： D
