**Quiz 2026 CCSK: Certificate of Cloud Security Knowledge v5 (CCSKv5.0)
Newest Clear Exam**

CCSK exam questions have a very high hit rate, of course, will have a very high pass rate. Before you select a product, you must have made a comparison of your own pass rates. Our CCSK study materials must appear at the top of your list. And our CCSK learning quiz has a 99% pass rate. This is the result of our efforts and the best gift to the user. And it is also proved and tested the quality of our CCSK training engine is excellent.

Cloud Security Alliance Certificate of Cloud Security Knowledge v5 (CCSKv5.0) Sample Questions (Q196-Q201):

NEW QUESTION # 196

Exploitable bugs in programs that attackers can use to infiltrate a computer system for the purpose of stealing data, taking control of the system or disrupting service operations, are called:

- A. Threat Agents
- B. Honepots
- C. Threats
- D. Vulnerabilities

Answer: D

NEW QUESTION # 197

What is the key difference between Business Continuity and Business Continuity Management?

- A. Business Continuity is the capability of the organization whereas Business Continuity Management is the holistic process.
- B. None of the above
- C. They are same concepts used interchangeably
- D. Business Continuity is the holistic process whereas Business Continuity Management is the capability of the organization

Answer: A

Explanation:

Definitions:

Business continuity: The capability of the organisation to continue delivery of products or services at acceptable predefined levels following a loss of service.

Business continuity management: A holistic management process that identifies potential threats to an organisation and the impacts to business operations those threats, if realised, might cause. It provides a framework for building organisational resilience with the capability of an effective response that safeguards the interests of its key stakeholders, reputation, brand, and value-creating activities

NEW QUESTION # 198

Which practice ensures container security by preventing post-deployment modifications?

- A. Implementing dynamic network segmentation policies
- B. Regular vulnerability scanning of deployed containers
- C. Employing Role-Based Access Control (RBAC) for container access
- D. Use of immutable containers

Answer: D

Explanation:

Immutable containers are not altered post-deployment, ensuring the integrity of the deployed environment and reducing the risk of unauthorized modifications. Reference: [CCSK v5 Curriculum, Domain 8 - Cloud Workload Security][source 16].

NEW QUESTION # 199

Which of the following is NOT part of Risk management process?

- A. Dealing
- B. Assessing
- C. Responding

- D. Framing

Answer: A

Explanation:

The risk-management process has four components

1. Framing risk
2. Assessing risk
3. Responding to risk
4. Monitoring risk

NEW QUESTION # 200
