Second, the purchase process of SC-200 Study Materials is very safe and transactions are conducted through the most reliable guarantee platform. Last but not least, our website platform has no viruses and you can download SC-200 study materials at ease. If you encounter difficulties in installation or use of SC-200 study materials, we will provide you with remote assistance from a dedicated expert.

Microsoft Security Operations Analyst Sample Questions (Q299-Q304):

NEW QUESTION # 299

You have a Microsoft subscription that has Microsoft Defender for Cloud enabled. You configure the Azure logic apps shown in the following table.

You need to configure an automatic action that will run if a Suspicious process executed alert is triggered. The solution must minimize administrative effort.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation:

A. Configure the Trigger automated response settings in the Azure Security Center or Azure Logic App,

B. Filter by alert title (e.g. "Suspicious process executed").
C. Select "Take action" (e.g. "Mitigate the threat").

NEW QUESTION # 300

You have an Azure subscription that uses Microsoft Defender for Servers Plan 1 and contains a server named Server1.

You enable agentless scanning.

You need to prevent Server1 from being scanned. The solution must minimize administrative effort.

What should you do?

- A. Create an exclusion group.
- **B. Create an exclusion tag.**
- C. Create a governance rule.
- D. Upgrade the subscription to Defender for Servers Plan 2.

Answer: B

NEW QUESTION # 301

You are informed of a new common vulnerabilities and exposures (CVE) vulnerability that affects your environment.

You need to use Microsoft Defender Security Center to request remediation from the team responsible for the affected systems if there is a documented active exploit available.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

□

Answer:

Explanation:

□ 1 - From Threat & Vulnerability Management, select Weaknesses, and search for the CVE.
2 - Select Security recommendations.
3 - Create a remediation request.

NEW QUESTION # 302

You have an Azure subscription. The subscription contains 10 virtual machines that are onboarded to Microsoft Defender for Cloud. You need to ensure that when Defender for Cloud detects digital currency mining behavior on a virtual machine, you receive an email notification. The solution must generate a test email.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

□

Answer:

Explanation:

□ Explanation

Step 1: From Logic App Designer, create a logic app.

Create a logic app and define when it should automatically run

1. From Defender for Cloud's sidebar, select Workflow automation.
2. To define a new workflow, click Add workflow automation. The options pane for your new automation opens.

□ Here you can enter:

A name and description for the automation.

The triggers that will initiate this automatic workflow. For example, you might want your Logic App to run when a security alert that contains "SQL" is generated.

The Logic App that will run when your trigger conditions are met.

3. From the Actions section, select visit the Logic Apps page to begin the Logic App creation process.

4. Etc.

Step 2: From Logic App Designer, run a trigger.

Manually trigger a Logic App

You can also run Logic Apps manually when viewing any security alert or recommendation.

Step 3: From Workflow automation in Defender for cloud, add a workflow automation.

Configure workflow automation at scale using the supplied policies

Automating your organization's monitoring and incident response processes can greatly improve the time it takes to investigate and mitigate security incidents.

NEW QUESTION # 303

You provision a Linux virtual machine in a new Azure subscription.

You enable Azure Defender and onboard the virtual machine to Azure Defender.

You need to verify that an attack on the virtual machine triggers an alert in Azure Defender.

Which two Bash commands should you run on the virtual machine? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. cp /bin/echo ./alerttest
- B. ./asc_alerttest_662jfi039n testing eicar pipe
- C. cp /bin/echo ./asc_alerttest_662jfi039n
- D. ./alerttest testing eicar pipe

Answer: B,C
