However, if you do not pass the Salesforce Certified Data Architect exam even after properly using the Salesforce Certified Data Architect Data-Architect pdf questions and practice tests ActualVCE also gives a money-back guarantee. So, it is a good decision to purchase Salesforce Data-Architect Latest Dumps from ActualVCE. It will help you to achieve the best results in the actual Salesforce Data-Architect test.

Salesforce Certified Data Architect Sample Questions (Q120-Q125):

NEW QUESTION # 120

The architect is planning a large data migration for Universal Containers from their legacy CRM system to Salesforce. What three things should the architect consider to optimize performance of the data migration?

Choose 3 answers

- A. Defer sharing calculations of the Salesforce Org.
- B. Review the time zones of the User loading the data.
- C. Determine if the legacy system is still in use.
- D. Remove custom indexes on the data being loaded.
- E. Deactivate approval processes and workflow rules.

Answer: A,D,E

Explanation:

Removing custom indexes on the data being loaded will prevent unnecessary index maintenance and improve the data load speed. Deferring sharing calculations of the Salesforce Org will avoid frequent sharing rule evaluations and reduce the load time. Deactivating approval processes and workflow rules will prevent triggering any automation logic that might slow down or fail the data load.

NEW QUESTION # 121

A large retail company has recently chosen SF as its CRM solution. They have the following record counts:

2500000 accounts

25000000 contacts

When doing an initial performance test, the data architect noticed an extremely slow response for reports and list views. What should a data architect do to solve the performance issue?

- A. Load only the data that the users is permitted to access
- B. Add custom indexes on frequently searched account and contact objects fields
- C. Limit data loading to the 2000 most recently created records.
- D. Create a skinny table to represent account and contact objects.

Answer: B

NEW QUESTION # 122

NTO has decided that it is going to build a channel sales portal with the following requirements:

- 1.External resellers are able to authenticate to the portal with a login.
- 2.Lead data, opportunity data and order data are available to authenticated users.
- 3.Authenticated users many need to run reports and dashboards.
- 4.There is no need for more than 10 custom objects or additional file storage.

Which community cloud license type should a data architect recommend to meet the portal requirements?

- A. Customer community.
- B. Customer community plus.
- C. Lightning external apps starter.
- D. Partner community.

Answer: D

Explanation:

Partner community license type is the best option for building a channel sales portal, as it allows external resellers to access lead, opportunity, and order data, as well as run reports and dashboards. Customer community and customer community plus license types are more suitable for customer service portals, while lightning external apps starter license type does not support reports and dashboards

NEW QUESTION # 123

Universal Containers has implemented Salesforce for its operations. In order for customers to be created in their MDM solution, the customer record needs to have the following attributes:

1. First Name
2. Last Name
3. Email

Which option should the data architect recommend to mandate this when customers are created in Salesforce?

- A. Create validation rules to check If the required attributes are entered.

- B. Configure Page Layout marking attributes as required fields.
- C. Mark Fields for the attributes as required under Setup.
- D. Build validation in Integration with MDM to check required attributes.

Answer: A

Explanation:

Creating validation rules to check if the required attributes are entered is the best option to mandate this when customers are created in Salesforce. Validation rules allow you to specify criteria that must be met before a record can be saved. You can use validation rules to ensure that customers have a first name, last name, and email when they are created in Salesforce. This way, you can prevent incomplete or invalid data from being sent to your MDM solution.

NEW QUESTION # 124

Salesforce is being deployed in Ursa Major Solar's disparate, multi-system ERP environment. Ursa major Solar wants to maintain data synchronization between systems.

Which two techniques should be used to achieve this goal? (Choose two.)

- A. Utilize an MDM strategy to outline a single source of truth.
- B. Integrate Salesforce with the ERP environment.
- C. Utilize workbench to update files within systems.
- D. Build synchronization reports and dashboards.

Answer: A,B

NEW QUESTION # 125

.....
