### SAP Certified Associate - Validating Business Transformation Sample Questions (Q31-Q36):

### NEW QUESTION # 31

SAP LeanIX Fact Sheets can represent which of the following?

- A. Survey Forms
- **B. Application, interfaces, and capabilities**
- C. Audit Logs
- D. RACI Matrices

**Answer: B**

### NEW QUESTION # 32

What benefit does SAP LeanIX Insights provide to stakeholders?

- **A. Visibility into current and target architecture alignment**
- B. Cost allocation mapping
- C. Enhanced survey management
- D. Lifecycle tag duration tracking

**Answer: A**

Explanation:

SAP LeanIX Insights summarizes architectural information to help stakeholders compare the current IT landscape with the planned future architecture. This includes visualizing application portfolios, evaluating capability support, and identifying technical or functional gaps. Insights offer clarity on the transformation roadmap, ensuring that business capabilities and IT strategy remain aligned. While LeanIX supports other reporting functions, its primary value in transformation programs is enabling clear visibility between "as-is" and "to-be" architecture.

### NEW QUESTION # 33

Which of the following are dimensions of the clean core concept?

(3 correct answers)

- **A. Integrations**
- **B. Configurations**
- **C. Processes**
- D. Applications
- E. Operations

**Answer: A,B,C**

Explanation:

The clean core concept is fundamental to SAP's cloud strategy and governs how organizations should structure their ERP systems to remain flexible, upgradeable, and stable. One key dimension is Configurations, which must follow SAP-recommended patterns and avoid unnecessary customizations that compromise upgradeability. Configurations define how the system behaves, and keeping them standardized ensures that the core can remain clean. A second dimension is Integrations. Clean core principles emphasize using SAP-approved integration patterns, APIs, and event-driven models rather than modifying the underlying system. By handling extensions and integrations through platforms like SAP Business Technology Platform, organizations avoid invasive changes that would otherwise jeopardize upgrades or system stability. A third dimension is Processes, referring to the ability to adopt SAP's standard end-to-end processes wherever possible. Aligning with SAP best practices minimizes the need for enhancements in the core system and ensures compatibility with future innovations. Applications and operations are not part of the formal clean core dimensions; rather, they are broader parts of the overall IT landscape. The clean core dimensions focus specifically on system configuration, integration behavior, and business process alignment-ensuring that SAP systems remain cloud-ready and agile.

### NEW QUESTION # 34

What are the phases of a business transformation process?

- A. Discover, plan, analyze, design, implement, operate
- **B. Discover, prepare, explore, realize, deploy, run**

- C. Analyze, plan, execute, monitor
- D. Discover, plan, execute, deploy, evaluate, run

**Answer: B**

Explanation:

These six phases-Discover, Prepare, Explore, Realize, Deploy, and Run-represent the standard SAP Activate-based structure used in transformation projects. Each phase has specific deliverables: discovery focuses on identifying value and readiness; prepare sets the foundation; explore validates fit-to-standard processes; realize configures and tests the solution; deploy transitions the system into production; and run focuses on operations and continuous improvement. This phased approach provides consistency across transformation initiatives.

### NEW QUESTION # 35

What is the role of "Joule Agents" in SAP's cloud strategy?

- A. They act as customer support agents.
- B. They provide interactive customer support.
- C. They offer sales and marketing solutions.
- **D. They orchestrate end-to-end business processes.**

**Answer: D**

### NEW QUESTION # 36

.....
