In this era of the latest technology, we should incorporate interesting facts, figures, visual graphics, and other tools that can help people read the Automating and Programming Cisco Collaboration Solutions (300-535) exam questions with interest. SureTorrent uses pictures that are related to the Automating and Programming Cisco Collaboration Solutions (300-535) certification exam and can even add some charts, and graphs that show the numerical values. It will not let the reader feel bored with the Automating and Programming Cisco Collaboration Solutions (300-535) practice test. They can engage their attention in the Cisco 300-535 exam visual effects and pictures that present a lot of.

Cisco Automating and Programming Cisco Collaboration Solutions Sample Questions (Q47-Q52):

NEW QUESTION # 47
What are two fundamental design constraints of a RESTful API? (Choose two.)

- A. Each interaction is independent from all others on the server side.
- B. It includes a series of interactions to the API that are dependent on one another.
- C. It exposes procedures or functions for a client call.
- D. It is dependent on the communication protocol being HTTP.
- E. It is a client-server communication model where the client and the server are independent of one another.

Answer: A,E

NEW QUESTION # 48
Which two commands generate a template using Cisco NSO to build a service package?
(Choose two.)

- A. show running-config devices device ce-ios config ios:interface Loopback 0
- B. show running-config devices device ce-ios config ios:interface Loopback 0 | display xml
- C. request running-config devices device ce-ios config ios:interface Loopback 0 | display xml
- D. show running-config devices device ce-ios config ios:interface Loopback 0 | display template.xml
- E. show running-config devices device ce-ios config ios:interface Loopback 0 | display xml | save template.xml

Answer: B,E

NEW QUESTION # 49
On the Cisco IOS XR, when using the match protocol command within a class-map to classify traffic, you noticed that the match protocol option on the Cisco IOS XR shows much fewer protocol options than on the Cisco IOS or IOS XE, like there is no option such as the match protocol yahoo-messenger command on the Cisco IOS XR. Why is this?

- A. because flexible packet matching has not been enabled on the Cisco IOS XR router
- B. because when defining the class-map, the class-map type should be set to type inspect: class-map type inspect class-map-name command
- C. because the Cisco IOS XR router does not have the correct software packages installed
- D. because NBAR is not supported on the Cisco IOS XR

Answer: D

Explanation:
Explanation

NEW QUESTION # 50
Referring to the Cisco IOS XR configuration exhibit,

which labels will be advertised by the router with this configuration?

- A. Only the label for 10.1.1.1/32 will be advertised to all the LDP peers.
- B. No labels will be advertised to any LDP peers.
- C. Labels for all prefixes will be advertised to the 10.1.1.1 LDP peer.
- D. Labels for all prefixes will be advertised to all the LDP peers.

Answer: A

NEW QUESTION # 51

The Cisco IOS and IOS XE qos pre-classify command allows which kind of packet classification on IP packets that are encapsulated with GRE and IPsec?

- A. allows for packets to be classified based on the packet payload after packet encryption
- B. allows for packets to be classified based on the packet header parameters other than the ToS byte values after packet encryption
- C. allows for packets to be classified based on the ToS byte values after packet encryption
- D. allows for packets to be classified based on the packet payload before packet encryption
- E. allows for packets to be classified based on the ToS byte values before packet encryption

Answer: E

Explanation:

http://www.cisco.com/en/US/tech/tk543/tk545/technologies_tech_note09186a008017405e.shtml The qos pre-classify command When packets are encapsulated by tunnel or encryption headers, QoS features are unable to examine the original packet headers and correctly classify the packets. Packets traveling across the same tunnel have the same tunnel headers, so the packets are treated identically if the physical interface is congested. With the introduction of the Quality of Service for Virtual Private Networks (VPNs) feature, packets can now be classified before tunneling and encryption occur.
In this example, tunnel0 is the tunnel name. The qos pre-classify command enables the QoS for VPNs feature on tunnel0:
Router(config)# interface tunnel0
Router(config-if)# qos pre-classify

NEW QUESTION # 52

......

The Automating and Programming Cisco Collaboration Solutions (300-535) practice test software also keeps a record of attempts, keeping users informed about their progress and allowing them to improve themselves. This feature makes it easy for 300-535 desktop-based practice exam software users to focus on their mistakes and overcome them before the original attempt. Overall, the Windows-based Automating and Programming Cisco Collaboration Solutions (300-535) practice test software has a user-friendly interface that facilitates candidates to prepare for the Automating and Programming Cisco Collaboration Solutions (300-535) exam without facing technical issues.
