Different from other similar education platforms, the 100-160 quiz guide will allocate materials for multi-plate distribution, rather than random accumulation without classification. How users improve their learning efficiency is greatly influenced by the scientific and rational design and layout of the learning platform. The Cisco Certified Support Technician (CCST) Cybersecurity prepare torrent is absorbed in the advantages of the traditional learning platform and realize their shortcomings, so as to develop the 100-160 test material more suitable for users of various cultural levels. If just only one or two plates, the user will inevitably be tired in the process of learning on the memory and visual fatigue, and the 100-160 test material provided many study parts of the plates is good enough to arouse the enthusiasm of the user, allow the user to keep attention of highly concentrated.

Cisco 100-160 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Vulnerability Assessment and Risk Management: This section of the exam measures the skills of a Risk Management Analyst and entails identifying and assessing vulnerabilities, understanding risk priorities, and applying mitigation strategies that help manage threats proactively within an organization's systems
Topic 2	<ul style="list-style-type: none"> • Endpoint Security Concepts: This section of the exam measures the skills of an Endpoint Security Specialist and includes securing individual devices, understanding protections such as antivirus, patching, and access control at the endpoint level, essential for maintaining device integrity.

Topic 3	<ul style="list-style-type: none"> • Essential Security Principles: This section of the exam measures the skills of a Cybersecurity Technician and covers foundational cybersecurity concepts such as the CIA triad (confidentiality, integrity, availability), along with basic threat types and vulnerabilities, laying the conceptual groundwork for understanding how to protect information systems.
Topic 4	<ul style="list-style-type: none"> • Incident Handling: This section of the exam measures the skills of an Incident Responder and centers on recognizing security incidents, responding appropriately, and containing threats—forming the essential foundation of incident response procedures.
Topic 5	<ul style="list-style-type: none"> • Basic Network Security Concepts: This section of the exam measures the skills of a Network Defender and focuses on understanding network-level protections, including firewalls, VPNs, and intrusion detection • prevention systems, providing insight into how threats are mitigated within network environments.

Cisco 100-160 Reliable Test Voucher | Reliable 100-160 Test Question

Cisco Certified Support Technician (CCST) Cybersecurity exam tests hired dedicated staffs to update the contents of the data on a daily basis. Our industry experts will always help you keep an eye on changes in the exam syllabus, and constantly supplement the contents of 100-160 test guide. Therefore, with our study materials, you no longer need to worry about whether the content of the exam has changed. You can calm down and concentrate on learning. At the same time, the researchers hired by 100-160 Test Guide is all those who passed the Cisco Certified Support Technician (CCST) Cybersecurity exam, and they all have been engaged in teaching or research in this industry for more than a decade. They have a keen sense of smell on the trend of changes in the exam questions. Therefore, with the help of these experts, the contents of 100-160 exam questions must be the most advanced and close to the real exam.

Cisco Certified Support Technician (CCST) Cybersecurity Sample Questions (Q223-Q228):

NEW QUESTION # 223

Which compliance framework is specifically related to protecting the personal data and privacy of European Union (EU) citizens?

- A. PCI-DSS
- B. FERPA
- **C. GDPR**
- D. HIPAA

Answer: C

Explanation:

The General Data Protection Regulation (GDPR) is a compliance framework implemented by the European Union to protect the personal data and privacy of EU citizens. It focuses on the collection, processing, and storage of personal data, and it applies to any organization that handles EU citizens' data, regardless of its location.

NEW QUESTION # 224

Which of the following is not a component of risk management?

- **A. Risk elimination.**
- B. Risk identification.
- C. Risk monitoring.
- D. Risk assessment.

Answer: A

Explanation:

Risk elimination is not a component of risk management. Risk management involves identifying, assessing, and mitigating risks, as

well as monitoring and reviewing the effectiveness of risk controls. While it is ideal to eliminate risks entirely, it is not always feasible, and the focus is often on minimizing or mitigating risks rather than eliminating them completely.

NEW QUESTION # 225

Which of the following is a security best practice for securing data in the cloud?

- A. Using weak passwords
- **B. Implementing multi-factor authentication**
- C. Allowing unrestricted access to data
- D. Storing sensitive data in clear text

Answer: B

Explanation:

Option 1: Incorrect. Storing sensitive data in clear text is not a security best practice. It leaves the data vulnerable to unauthorized access and breaches.

Option 2: Correct. Implementing multi-factor authentication is a security best practice for securing data in the cloud. This adds an extra layer of protection by requiring users to provide additional verification beyond just a password.

Option 3: Incorrect. Allowing unrestricted access to data is not a security best practice. Access to data should be properly controlled and limited to authorized individuals or groups.

Option 4: Incorrect. Using weak passwords is not a security best practice. Strong and complex passwords should be used to prevent unauthorized access to data.

NEW QUESTION # 226

During a cybersecurity investigation, a log entry states, "Unauthorized access attempt blocked from IP address 123.45.67.89." What can be inferred from this log entry?

- A. The system experienced a denial-of-service attack from IP address 123.45.67.89.
- B. The system was compromised due to an unauthorized access attempt from IP address 123.45.67.89.
- **C. The system successfully prevented an unauthorized access attempt from a specific IP address.**
- D. The system detected suspicious traffic from IP address 123.45.67.89 for further investigation.

Answer: C

Explanation:

The log entry clearly states that the system blocked an unauthorized access attempt from a specific IP address, indicating that a security measure or mechanism successfully prevented the unauthorized access. This is a positive outcome for the system as it shows effective defense against potential threats.

NEW QUESTION # 227

What is the purpose of conducting a hardware inventory assessment on an endpoint system?

- A. To determine software compatibility requirements
- B. To identify potential gaps in security policies
- C. To track changes made to hardware configurations
- **D. To ensure compliance with hardware standards**

Answer: D

Explanation:

Conducting a hardware inventory assessment helps organizations ensure compliance with their hardware standards. By maintaining an up-to-date inventory of hardware components, organizations can identify any deviations from their standard configurations and take necessary actions to address them.

NEW QUESTION # 228

.....

The Cisco Certified Support Technician (CCST) Cybersecurity (100-160) practice test software also keeps a record of attempts, keeping users informed about their progress and allowing them to improve themselves. This feature makes it easy for 100-160 desktop-based practice exam software users to focus on their mistakes and overcome them before the original attempt. Overall, the Windows-based Cisco Certified Support Technician (CCST) Cybersecurity (100-160) practice test software has a user-friendly interface that facilitates candidates to prepare for the Cisco Certified Support Technician (CCST) Cybersecurity (100-160) exam without facing technical issues.
