

# The Best 1Z0-771–100% Free New Exam Question | 1Z0-771 Certification Book Torrent

2025 Latest Dumpexams 1Z0-771 PDF Dumps and 1Z0-771 Exam Engine Free Share: <https://drive.google.com/open?id=1VblEgkr78mhMOhfCRUq7zHpt0UNnQSg4>

In today's society, many enterprises require their employees to have a professional 1Z0-771 certification. It is true that related skills serve as common tools frequently used all over the world, so we can realize that how important an 1Z0-771 certification is, also understand the importance of having a good knowledge of it. The rigorous world force us to develop ourselves, thus we can't let the opportunities slip away. Being more suitable for our customers the 1Z0-771 Torrent question compiled by our company can help you improve your competitiveness in job seeking, and 1Z0-771 exam training can help you update with times simultaneously.

## Oracle 1Z0-771 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Getting Started with Oracle APEX on the Oracle Autonomous Database: This section of the exam measures the skills of APEX Developers in understanding Oracle APEX and its core components. It covers the creation and management of workspaces, providing an overview of how APEX integrates with the Oracle Autonomous Database to streamline application development.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Developing Reports: This section assesses the skills of Report Developers in creating interactive reports and dashboards. It involves customizing reports, working with faceted search pages, integrating smart filters, and designing visually appealing data presentations using Oracle APEX.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Implementing Navigation in Your Application: This section assesses the skills of UX Designers in designing smooth application navigation. It includes configuring shared components, setting up search functionalities, and enhancing user experience with intuitive navigation structures.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Managing Pages and Regions: This section measures the knowledge of UI Designers in structuring application layouts. It covers creating different types of pages and regions, managing page components within Page Designer, and ensuring an optimized user interface for applications.</li></ul>

Topic 5	<ul style="list-style-type: none"> <li>• <b>Creating Application Page Controls:</b> This section tests the abilities of Frontend Developers in implementing interactive page elements. It includes creating page-level items, buttons, and controls that enhance navigation and user interaction within APEX applications.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• <b>Adding Computations, Processes, Validations, and Branches:</b> This section measures the knowledge of Backend Developers in implementing application logic. It focuses on configuring computations, processes, validations, and page branches to automate workflows and ensure data integrity.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• <b>Creating Progressive Web Apps:</b> This section assesses the skills of Web Developers in building Progressive Web Applications (PWAs). It includes enhancing application accessibility, implementing push notifications, and optimizing applications for seamless cross-device experiences.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>• <b>Creating and Using Dynamic Actions and Plug-ins:</b> This section tests the expertise of Developers in implementing dynamic actions. It covers configuring event-driven behaviors and integrating plug-ins to create responsive and interactive application features.</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>• <b>Implementing Security in Your Application:</b> This section evaluates the knowledge of Security Specialists in securing APEX applications. It covers authentication schemes, authorization controls, and session state protection to ensure application security and user access management.</li> </ul>
Topic 10	<ul style="list-style-type: none"> <li>• <b>Using SQL Workshop:</b> This section evaluates the expertise of Database Developers in managing database objects using SQL Workshop. It includes creating and modifying database structures, running SQL commands and scripts, and efficiently loading and unloading data through the Data Workshop utility to simplify database interactions.</li> </ul>
Topic 11	<ul style="list-style-type: none"> <li>• <b>Creating and Using Forms:</b> This section evaluates the proficiency of Form Developers in designing user-friendly forms. It covers creating interactive grids, developing simple forms linked to reports, and implementing master-detail forms for effective data management.</li> </ul>
Topic 12	<ul style="list-style-type: none"> <li>• <b>Managing Workflows and Tasks:</b> This section evaluates the proficiency of Process Automation Specialists in workflow management. It covers customizing workflows, using approval processes, and handling unified task lists to streamline business processes within applications.</li> </ul>
Topic 13	<ul style="list-style-type: none"> <li>• <b>Leveraging Generative AI in Oracle APEX:</b> This section tests the knowledge of AI Developers in integrating AI-powered features within APEX applications. It involves using APEX Assistant for code generation, creating AI-driven data models, and implementing AI-powered text generation using dynamic actions.</li> </ul>
Topic 14	<ul style="list-style-type: none"> <li>• <b>Extending Application Capabilities:</b> This section measures the skills of APEX Developers in enhancing application functionality. It includes sending automated emails, implementing plug-ins, and utilizing automation features to improve efficiency and extend capabilities.</li> </ul>
Topic 15	<ul style="list-style-type: none"> <li>• <b>Migrating Application Development Between Environments:</b> This section measures the abilities of DevOps Engineers in managing application deployments. It includes exporting and importing application artifacts, performing remote deployments, and maintaining working copies to ensure smooth transitions between development environments.</li> </ul>
Topic 16	<ul style="list-style-type: none"> <li>• <b>Adding Additional Pages to Your Application:</b> This section assesses the skills of Application Developers in expanding application functionalities. It involves creating Oracle JET charts, calendars, trees, and maps to enhance data visualization and user interaction.</li> </ul>

## 1Z0-771 Certification Book Torrent - 1Z0-771 Exam Fees

Based on the research results of the examination questions over the years, the experts give more detailed explanations of the contents of the frequently examined contents and difficult-to-understand contents, and made appropriate simplifications for

infrequently examined contents. 1Z0-771 test questions make it possible for students to focus on the important content which greatly shortens the students' learning time. With 1Z0-771 Exam Torrent, you will no longer learn blindly but in a targeted way. 1Z0-771 exam torrent will also help you count the type of the wrong question, so that you will be more targeted in the later exercises and help you achieve a real improvement. 1Z0-771 exam guide will be the most professional and dedicated tutor you have ever met, you can download and use it with complete confidence.

## Oracle APEX Cloud Developer Professional Sample Questions (Q54-Q59):

### NEW QUESTION # 54

Which two declarative options in Oracle APEX allow you to download BLOB/CLOB content?

- A. Share Dynamic Action
- B. APEX\_UTIL.DOWNLOAD PL/SQL API
- C. Download Dynamic Action
- D. Download Page Process

**Answer: C,D**

Explanation:

Declarative options for downloading BLOB/CLOB content include:

Download Dynamic Action: A built-in action type to trigger downloads of BLOB/CLOB data.

Download Page Process: A process type that declaratively handles BLOB/CLOB downloads from a table.

APEX\_UTIL.DOWNLOAD is a PL/SQL API, not a declarative option, and Share Dynamic Action is for sharing URLs, not downloading files.

### NEW QUESTION # 55

Which two statements are true about Oracle APEX?

- A. Running an APEX app needs client software.
- B. You can build interactive reporting apps based on data from disparate systems.
- C. Application definition is not stored in the database.
- D. APEX eliminates middle tier application logic.

**Answer: B,D**

Explanation:

Key truths about Oracle APEX:

APEX eliminates middle tier application logic: APEX runs entirely within the Oracle Database, using PL/SQL and SQL for logic, bypassing traditional middle-tier servers (e.g., Java EE). This simplifies architecture and boosts performance.

You can build interactive reporting apps based on data from disparate systems: Via REST Data Sources, database links, or ORDS, APEX integrates data from external systems, enabling unified reporting (e.g., combining on-premises and cloud data).

Needs client software: False; APEX is web-based, requiring only a browser.

Application definition not stored in database: False; definitions are stored as metadata in the database (e.g., APEX\_APPLICATIONS).

This reflects APEX's database-centric, low-code philosophy.

### NEW QUESTION # 56

Which is a valid method of logging messages to the execution log in APEX applications?

- A. apex\_error.add\_error ('SAL for ' || :ENAME || ' increased by 19.');
- B. apex\_debug.info ('SAL for :ENAME ||' increased by 19.');
- C. apex\_automation.log\_info ('SAL for ' || :ENAME || ' increased by 19.');

**Answer: C**

Explanation:

Logging in APEX tracks runtime activity:

A. apex\_automation.log\_info: Correctly logs an informational message to the execution log for automation tasks (e.g., workflows).

The syntax || :ENAME || concatenates the item value (e.g., "JOHN") into "SAL for JOHN increased by 19." It's stored in

APEX\_AUTOMATION\_LOG, viewable in Monitoring.

B . apex\_debug.info: Logs to debug output, but the syntax is flawed (:ENAME || isn't concatenated properly; should be 'SAL for ' || :ENAME || ...). It's valid only when debugging is enabled (e.g., APEX\_DEBUG.ENABLE).

C . apex\_error.add\_error: Adds an error to the error stack for user display, not a log message.

Technical Insight: log\_info is non-intrusive, unlike apex\_debug, which requires debug mode, or apex\_error, which signals failure.

Use Case: Logging salary updates in a scheduled job without debug overhead.

Pitfall: Ensure :ENAME is in scope (e.g., page item).

### NEW QUESTION # 57

In a faceted search page, facets can be displayed as different UI types. Which two facet item types are supported in the faceted search region?

- A. Range
- B. Checkbox Group
- C. Popup LOV
- D. Date Picker

**Answer: A,B**

Explanation:

In Oracle APEX, a faceted search page allows users to filter data using facets, which are displayed as UI components in the Faceted Search region. According to the Oracle APEX documentation, the supported facet item types include:

Range: Used for numeric or date ranges, allowing users to filter data within a specified range (e.g., salary or hire date).

Checkbox Group: Used for multi-select options, enabling users to select multiple values from a list (e.g., departments).

Other types like Popup LOV and Date Picker are valid item types in APEX but are not natively supported as facet types in the Faceted Search region. Popup LOV is typically used for single-value selection in forms, and Date Picker is a standalone item type, not a facet-specific UI.

### NEW QUESTION # 58

In which two formats can the GetCurrentPosition Dynamic Action in Oracle APEX return coordinates?

- A. GeoJSON
- B. Function Body returning SQL Query
- C. State and Pincode
- D. Latitude and Longitude

**Answer: A,D**

Explanation:

The GetCurrentPosition Dynamic Action retrieves geolocation data from the user's device. It supports:

Latitude and Longitude: Returns coordinates as separate numeric values (e.g., lat: 37.7749, lon: -122.4194).

GeoJSON: Returns coordinates in a structured JSON format compliant with the GeoJSON standard (e.g., { "type": "Point", "coordinates": [-122.4194, 37.7749] }).

Function Body returning SQL Query is a dynamic action type, not a coordinate format, and State and Pincode is unrelated to geolocation coordinates.

### NEW QUESTION # 59

.....

The exercises and answers of our 1Z0-771 exam questions are designed by our experts to perfectly answer the puzzles you may encounter in preparing for the exam and save you valuable time. Take a look at 1Z0-771 preparation exam, and maybe you'll find that's exactly what you've always wanted. You can free download the demos which present a small part of the 1Z0-771 Learning Engine, and have a look at the good quality of it.
