P.S. Free & New HPE7-A07 dumps are available on Google Drive shared by BraindumpsPrep: [https://drive.google.com/open?id=14\\_y8xqCH0znXXURCc\\_FERuCygg8YULLE](https://drive.google.com/open?id=14_y8xqCH0znXXURCc_FERuCygg8YULLE)

If you are worried about your exam, and want to pass the exam just one time, we can do that for you. HPE7-A07 exam materials are compiled by experienced experts, and they are quite familiar with the exam center, and therefore the quality can be guaranteed. In addition, you can receive the downloading link and password within ten minutes, so that you can begin your learning immediately. We provide you with free update for one year and the update version for HPE7-A07 Exam Torrent will be sent to your email automatically.

## HP HPE7-A07 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Network Stack: This topic of the HP HPE7-A07 exam evaluates the ability of a senior HP RF network engineer to analyze and troubleshoot network solutions based on customer issues. Mastery of this ensures effective problem resolution in complex network environments.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• Network Resiliency and Virtualization: This section of the Aruba Certified Campus Access Mobility Expert Written exam assesses the expertise of a senior HP RF network engineer in designing and troubleshooting mechanisms for resiliency, redundancy, and fault tolerance. It is crucial for maintaining uninterrupted network services.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• Switching: Senior HP RF network engineers must demonstrate proficiency in implementing and troubleshooting Layer 2</li> <li>• 3 switching, including broadcast domains and interconnection technologies. This ensures seamless and efficient data flow across network segments.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Routing: This Aruba Certified Campus Access Mobility Expert Written exam section measures the ability to design and troubleshoot routing topologies and functions, ensuring that data efficiently navigates through complex networks, a key skill for HP solutions architects.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Performance Optimization: The Aruba Certified Campus Access Mobility Expert Written exam focuses on analyzing and remediating performance issues within a network. It measures the ability of a senior RF network engineer to fine-tune network operations for maximum efficiency and speed.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• Authentication</li> <li>• Authorization: Senior HP RF network engineers are tested on their skills in designing and troubleshooting AAA configurations, including ClearPass integration. This ensures that network access is securely managed according to the customer's requirements.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• Troubleshooting: This topic of the HP HPE7-A07 Exam assesses skills of a senior HP RF network engineer in troubleshooting. It also assesses the ability to remediate issues in campus networks. It is vital for ensuring network reliability and minimizing downtime in critical environments.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>• Connectivity: The topic covers developing configurations, applying advanced networking technologies, and identifying design flaws. It tests the skills of a senior HP RF network engineer in creating reliable, high-performing networks tailored to specific customer needs.</li> </ul>

## Reguler HP HPE7-A07 Update | Real HPE7-A07 Braindumps

The HPE7-A07 exam questions that BraindumpsPrep provide with you is compiled by professionals elaborately and boosts varied versions: PDF version, Soft version and APP version, which aimed to help you pass the HPE7-A07 exam by the method which is convenient for you. Our HPE7-A07 training braindump is not only cheaper than other dumps but also more effective. The high pass rate of our HPE7-A07 study materials has been approved by thousands of candidates, they recognized our website as only study tool to pass HPE7-A07 exam

## HP Aruba Certified Campus Access Mobility Expert Written Exam Sample Questions (Q111-Q116):

### NEW QUESTION # 111

Exhibit.

Which user role will be assigned when a voice client tries to connect for the first time, but the RADIUS server is unavailable?

- A. PRE\_AUTH
- B. DEFAULT\_AUTH
- C. CRITICAL\_AUTH
- D. CRITICAL\_VOICE

**Answer: D**

Explanation:

In the provided configuration for interface 1/1/7, there are roles specified for different scenarios concerning authentication. When a

voice client attempts to connect and the RADIUS server is unreachable, the role that is assigned is the one specified as the "critical-voice-role". In this case, the "CRITICAL\_VOICE" role is configured to be assigned under such circumstances, ensuring that voice clients receive appropriate network access permissions even when the RADIUS server is not available to authenticate them.

#### NEW QUESTION # 112

A customer would like to allow their IT Helpdesk to configure IoT devices to connect to a single SSID using a unique PSK that other devices cannot use. Which solution would you recommend?

- A. MPSK Local
- B. MPSK AES with Cloud Auth
- C. MPSK AES with MAC Auth
- D. MPSK AES with ClearPass

**Answer: D**

Explanation:

Multi-Pre-Shared Key (MPSK) with ClearPass is the recommended solution for a scenario where the IT Helpdesk needs to configure IoT devices to connect to a single SSID using unique PSKs. MPSK allows for the use of different PSKs on the same SSID, and ClearPass enables the management of these unique keys efficiently.

#### NEW QUESTION # 113

Which option shows the correct Bandwidth Control for 1024 kbps down and 2048 Kbps up for the SSID?

- A.
- B.
- C.
- D.

**Answer: B**

Explanation:

The correct Bandwidth Control settings for 1024 Kbps down and 2048 Kbps up for the SSID are shown in Option D. In Option D, the downstream is set at 1024 Kbps and the upstream at 2048 Kbps, both configured per user, which matches the requested configuration. This setup ensures that each user has a guaranteed bandwidth allocation of the specified rates when connected to the SSID, providing a controlled and predictable user experience.

#### NEW QUESTION # 114

An AOS 10 multi-site deployment has sites with AP-only bridged SSIDs and other sites with APs and gateways operating tunneled SSIDs. Client session state sync errors exist between secure lab environments and public-facing areas at several sites.

What is causing the issues?

- A. The DTLS connections are down between APs in the lab and APs in public areas
- B. The affected clients are associated with an SSID with 11r and 11k disabled.
- C. The sites with issues are the AP-only deployments because the connection to HPE Aruba Networking Central is interrupted
- D. The sites with issues are the overlay AP with gateway sites because the connection to HPE Aruba Networking central is interrupted

**Answer: D**

Explanation:

In a multi-site deployment with a mix of bridged and tunneled SSIDs, if there are session sync errors between different areas, it could be due to connectivity issues with the central management platform, which in the case of Aruba, is likely HPE Aruba Networking Central. This interruption could cause inconsistencies in session states across the network.

#### NEW QUESTION # 115

A customer is planning to add IoT devices that connect wirelessly to the existing 802.1X SSID. The customer will use ClearPass to authenticate the IoT devices by MAC address but other devices will still need to authenticate by only 802.1X Exhibit.

The customer provided the current configuration and reported their non-IoT 802.1X devices are no longer able to connect. Which configuration change can be made to fix the issue?

- A. Modify `opmode wpa3-aes-gcm-256` to `opmode wpa2-aes`
- **B. Remove `mac-authentication` from the WLAN configuration**
- C. Modify `max-authentication failures` to 0.
- D. Add `i2-autn-fairthrough` to the WLAN configuration

**Answer: B**

Explanation:

The existing configuration for the WLAN ssid-profile has enabled MAC authentication which, while suitable for IoT devices that may not support 802.1X, can interfere with the normal 802.1X authentication process for other devices. By removing `mac-authentication` directive from the WLAN configuration, the non-IoT

802.1X devices should be able to connect without issues as the authentication process will not be disrupted by MAC authentication checks. This adjustment ensures that the WLAN ssid-profile is correctly aligned with the authentication requirements for both IoT and non-IoT devices within the network environment, conforming to the best practices for mixed-device WLAN configurations.

## NEW QUESTION # 116

.....

Applying the international recognition third party for payment for HPE7-A07 exam cram, and if you choose us, your money and account safety can be guaranteed. And the third party will protect the interests of you. In addition, HPE7-A07 learning materials are edited and verified by professional experts who possess the professional knowledge for the exam, and the quality can be guaranteed. We are pass guarantee and money back guarantee and if you fail to pass the exam, we will give you full refund. We provide free update for 365 days for HPE7-A07 Exam Materials for you, so that you can know the latest information for the exam, and the update version will be sent to your email automatically.
