PL-600 Valid Test Online | PL-600 Trusted Exam Resource

Our product boasts many advantages and it is worthy for you to buy it. You can have a free download and tryout of our PL-600 Exam torrents before purchasing. After you purchase our product you can download our PL-600 study materials immediately. We will send our product by mails in 5-10 minutes. We provide free update and the discounts for the old client. If you have any doubts or questions you can contact us by mails or the online customer service personnel and we will solve your problem as quickly as we

can.

Microsoft Power Platform Solution Architect Sample Questions (Q125-Q130):

NEW QUESTION # 125

A company has an on-premises data warehouse and analytics solution- The data warehouse consists of multiple multi-dimensional data cubes representing over five years of operational data. The data warehouse consolidates and normalizes data that is sourced from 20 different systems.

The company plans to replace the existing solution with a Microsoft Power Platform solution that connects to the data warehouse. The company wants to provide analytical information to executives in a Microsoft Teams channel to support business planning.

The new solution must meet these requirements:

Support the current data warehouse.

The solution must support drill-through capabilities into the data.

You need to recommend a solution.

What should you recommend? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

The screenshot shows a Microsoft Power Platform solution architect interface. It features a Microsoft logo on the left. The interface is divided into two main sections: 'Requirement' and 'Solution'. The 'Requirement' section lists two requirements: 'Data storage and normalization.' and 'Visibility to key operational metrics from various Teams'. The 'Solution' section contains two boxes of options. The first box, corresponding to the first requirement, lists: Data Gateway, Azure Data Lake, Dataverse for Teams, and Azure Analysis Services. The second box, corresponding to the second requirement, lists: Power BI, AI Builder, Teams adaptive cards, and Microsoft Teams integration object.

Answer:

Explanation:

Answer Area

This screenshot is identical to the one above, but it shows the solution options with green checkmarks, indicating they are the correct selections. The first solution box has checkmarks next to 'Data Gateway', 'Azure Data Lake', and 'Dataverse for Teams'. The second solution box has checkmarks next to 'Power BI', 'AI Builder', 'Teams adaptive cards', and 'Microsoft Teams integration object'.

Explanation:

Requirement	Solution
Data storage and normalization.	<div style="border: 1px solid gray; padding: 2px;"> <div style="background-color: #f0f0f0; padding: 2px; display: flex; justify-content: space-between; align-items: center;"> ▼ </div> <ul style="list-style-type: none"> Data Gateway <li style="background-color: #d0d0d0;">Azure Data Lake Dataverse for Teams Azure Analysis Services </div>
 Visibility to key operational metrics from various Teams channels.	<div style="border: 1px solid gray; padding: 2px;"> <div style="background-color: #f0f0f0; padding: 2px; display: flex; justify-content: space-between; align-items: center;"> ▼ </div> <ul style="list-style-type: none"> Power BI AI Builder Teams adaptive cards <li style="background-color: #d0d0d0;">Microsoft Teams integration object </div>

Box 1: Azure Data Lake

A data warehouse is a centralized repository of integrated data from one or more disparate sources. Data warehouses store current and historical data and are used for reporting and analysis of the data.

<https://docs.microsoft.com/en-us/powerapps/teams/use-teams-integration-object>

NEW QUESTION # 126

You need to resolve the deployment plan issue.

What should you request?

- A. the IT manager adds a data migration strategy
- **B. the IT manager adds a responsibility matrix**
- C. the project manager adds a testing plan
- D. the project manager adds a risk assessment

Answer: B

NEW QUESTION # 127

You are designing a Power Platform solution for a company.

You have the following requirements:

Users in the human resources department must be able to create tasks.

Users in the human resources department must be able to assign cases to other users.

You need to recommend security settings to the company.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Business requirement	Solution
Users in the human resources department must be able to create tasks.	<ul style="list-style-type: none"> Assign only Create rights to activities. Assign Create and Read rights to activities. Assign user-level assign rights to the human resources case table. Assign organization-level rights to the human resources case table.
Users in the human resources department must be able to assign cases to other users.	<ul style="list-style-type: none"> Assign only Create rights to activities. Assign Create and Read rights to activities. Assign user-level assign rights to the human resources case table. Assign organization-level assign rights to the human resources case table.

Answer:

Explanation:

Business requirement	Solution
Users in the human resources department must be able to create tasks.	<ul style="list-style-type: none"> Assign only Create rights to activities. Assign Create and Read rights to activities. Assign user-level assign rights to the human resources case table. Assign organization-level rights to the human resources case table.
Users in the human resources department must be able to assign cases to other users.	<ul style="list-style-type: none"> Assign only Create rights to activities. Assign Create and Read rights to activities. Assign user-level assign rights to the human resources case table. Assign organization-level assign rights to the human resources case table.

NEW QUESTION # 128

You are a Power Apps architect for a company. The IT administrator designs a Power Apps app that is ready to be tested. The company uses application lifecycle management (ALM).

Each version and solution component must be tracked as it is tested.

You need to recommend a strategy to deploy solutions for the user acceptance testing environment.

What should you recommend?

- A. Use Solution Packager and deploy an unmanaged solution.
- B. Use Solution Packager and deploy a managed solution.
- C. Use Package Deployer and deploy a managed solution.
- D. Use Package Deployer and deploy an unmanaged solution.

Answer: A

Explanation:

Solution Packager is a tool that can unpack a compressed solution file into multiple XML files and other files, so they can be easily managed by a source control system.

Unmanaged solution: An open solution with no restrictions on what can be added, removed, or modified. This is recommended during development of a solution.

C: Managed solution

A completed solution ready to be imported into an organization. Once imported, components can't be added or removed, although they can optionally allow further customization. This is recommended when development of the solution is complete.

NEW QUESTION # 129

You are designing a Power Platform solution for a company.

You have the following requirements:

- * Users in the human resources department must be able to create tasks.
- * Users in the human resources department must be able to assign cases to other users.

You need to recommend security settings to the company.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

The screenshot shows the Microsoft Solution Packager tool interface. It has two columns: "Business requirement" and "Solution".

Business requirement 1: "Users in the human resources department must be able to create tasks." The solution dropdown menu is open, showing four options: "Assign only Create rights to activities.", "Assign Create and Read rights to activities.", "Assign user-level assign rights to the human resources case table.", and "Assign organization-level rights to the human resources case table." The first option is highlighted.

Business requirement 2: "Users in the human resources department must be able to assign cases to other users." The solution dropdown menu is open, showing the same four options as above. The first option is highlighted.

Answer:

Explanation:

This screenshot is identical to the previous one, but the correct solution options are highlighted in green. In the first dropdown, "Assign only Create rights to activities." is highlighted. In the second dropdown, "Assign organization-level assign rights to the human resources case table." is highlighted.

Explanation:

This is a smaller version of the screenshot above, showing the same interface with the correct solution options highlighted in green.

Box 1: Assign only Create rights to activities

You require the same set of Dataverse privileges and access rights to work with custom activities as those required to work with custom entities.

Task-based privileges, at the bottom of the form, give a user privileges to perform specific tasks, such as publish articles.

Box 2: Assign User-level assign rights to human resources case table.

Record-level privileges define which tasks a user with access to the record can do, such as Read, Create, Delete, Write, Assign, Share, Append, and Append To.

For user and team owned records, the access level choices for most privileges are tiered Organization, Business Unit, Business Unit and Child Business Unit or only the user's own records. That means for read privilege on contact, I could set user owned, and the user would only see their own records.
