## **Valid CrowdStrike CCFA-200b Test Guide, Reliable CCFA-200b Test Notes**

As the labor market becomes more competitive, a lot of people, of course including students, company employees, etc., and all want

to get CrowdStrike authentication in a very short time, this has developed into an inevitable trend. Each of them is eager to have a strong proof to highlight their abilities, so they have the opportunity to change their current status, including getting a better job, have higher pay, and get a higher quality of material, etc. It is not easy to qualify for a qualifying exam in such a short period of time. Our company's CCFA-200b Study Guide is very good at helping customers pass the exam and obtain a certificate in a short time, and now I'm going to show you our CCFA-200b exam dumps. Our products mainly include the following major features.

## **CrowdStrike Falcon Administrator Sample Questions (Q110-Q115):**

### **NEW QUESTION # 110**

What are the three required parts of a Fusion SOAR workflow condition?

- A. Triggers, actions, and alerts
- **B. A parameter, an operator, and a value**
- C. A value, a trigger, and a constraint
- D. Notifications, alerts, and APIs

**Answer: B**

### **NEW QUESTION # 111**

You have a Windows host on your network in Reduced functionality mode (RFM). While the system is in RFM, which of the following is TRUE?

- A. System monitoring will be unavailable
- **B. Some detection patterns and preventions will not be triggered**
- C. Event reporting will be unavailable
- D. Prevention patterns will not be triggered

**Answer: B**

Explanation:

The option that is true when a Windows host is in Reduced Functionality Mode (RFM) is that some detection patterns and preventions will not be triggered. RFM is a mode that limits the sensor's functionality due to license expiration, network connectivity loss, or certificate validation failure. When a Windows sensor is in RFM, it will only provide basic prevention capabilities, such as blocking known malware hashes and preventing script execution from the %TEMP% directory.

The sensor will not send any telemetry or detection events to the Falcon platform, and will not receive any policy or update changes from the Falcon cloud. This means that some detection patterns and preventions that rely on telemetry, machine learning, or cloud analysis will not be triggered.

### **NEW QUESTION # 112**

Which report provides a filterable high-level overview of host information such as OS version, Device Type and Machine Domain, and also provides an active sensor heat map for a quick environment review?

- A. Sensor Policy Daily Report
- B. Sensor Report
- **C. Sensor Overview Report**
- D. Sensor Status Report

**Answer: C**

### **NEW QUESTION # 113**

Your incident responder team is in the process of migrating their existing workflows into Fusion SOAR workflows so that they will execute natively in Falcon. The team reports the workflow imports are failing.

What format must the workflows be in order to successfully import them into Fusion SOAR?

- A. CSV
- B. YAML
- **C. JSON**

- D. SOAR

**Answer: C**

#### **NEW QUESTION # 114**

You have been provided with a list of 100 hashes that are not malicious but your company has deemed to be inappropriate for work computers. They have asked you to ensure that they are not allowed to run in your environment. You have chosen to use Falcon to do this. Which is the best way to accomplish this?

- A. Using the Support Portal, create a support ticket and include the list of binary hashes, asking support to create an "Execution Prevention" rule to prevent these processes from running
- **B. Using IOC Management, gather the list of SHA256 or MD5 hashes for each binary and then upload them. Set all hashes to "Block" and ensure that the prevention policy these computers are using includes the option for "Custom Blocking" under Execution Blocking.**
- C. Using Custom Alerts in the Investigate App, create a new alert using the template "Process Execution" and within that rule, select the option to "Block Execution"
- D. Using the API, gather the list of SHA256 or MD5 hashes for each binary and then upload them, setting them all to "Never Allow"

**Answer: B**

Explanation:

The best way to ensure that a list of 100 hashes that are not malicious but your company has deemed to be inappropriate for work computers are not allowed to run in your environment is to use IOC Management, gather the list of SHA256 or MD5 hashes for each binary and then upload them. Set all hashes to "Block" and ensure that the prevention policy these computers are using includes the option for "Custom Blocking" under Execution Blocking. This will allow Falcon to block the execution of these hashes on the hosts using this policy. The other options are either incorrect or not efficient to achieve this goal.

#### **NEW QUESTION # 115**

.....

Our CCFA-200b study braindumps can be very good to meet user demand in this respect, allow the user to read and write in a good environment continuously consolidate what they learned. Our CCFA-200b prep guide has high quality. So there is all effective and central practice for you to prepare for your test. With our professional ability, we can accord to the necessary testing points to edit CCFA-200b Exam Questions. So high quality CCFA-200b materials can help you to pass your exam effectively, make you feel easy, to achieve your goal.
