2026 Efficient AD0-E117 – 100% Free New Test Guide | Certification Adobe Experience Manager Architect Master Dump

Here we want to give you a general idea of our AD0-E117 exam questions. Our website is operated with our AD0-E117 practice

materials related with the exam. We promise you once you make your choice we can give you most reliable support and act as your best companion on your way to success. We not only offer AD0-E117 free demos for your experimental overview of our practice materials, but being offered free updates for whole year long.

Adobe AD0-E117 Exam is designed to test the knowledge of candidates who aspire to become Adobe Experience Manager (AEM) Architects. AEM is a comprehensive content management system that is widely used by businesses to create, manage, and deliver digital experiences across various channels. AD0-E117 Exam is a globally recognized certification that demonstrates an individual's expertise in designing and implementing AEM solutions.

Adobe Experience Manager Architect Master Sample Questions (Q46-Q51):

NEW QUESTION # 46

Refer to the exhibit.

A customer with an existing AEM implementation wants to enrich product pages with technical data coming from their PIM system. The PIM system sits behind an API Management solution that publicly exposes the PIM API's as RESTful web services with basic authentication as the security mechanism. Data consistency with the PIM and secure access to the APIs are key elements of the integration.

How should the Architect set up the integration between AEM and the PIM?

- A. Convert the technical data to Content Fragments and expose using Content Services
- B. Use a client-side integration with AJAX from the browser to the API Management
- **C. Integrate the AEM Publishers directly with the API Management solution**
- D. Import the technical data into the AEM Author and replicate to Publishers

Answer: C

Explanation:

Integrate the AEM Publishers directly with the API Management solution. According to Adobe Experience Manager documentation¹, a direct integration between AEM and PIM can enable marketers and creative professionals to manage eCommerce-related product data and photography within AEM. A direct integration can also ensure data consistency with the PIM and secure access to the APIs using basic authentication²³. Option A is the only diagram that shows how AEM Publishers can directly communicate with the API Management solution.

NEW QUESTION # 47

A client is migrating the content from a legacy website to an existing AEM implementation. An Architect evaluates the content of the legacy site and determine-that there are approximately 20,000 pages with a common structure, and a few hundred pages that do not follow a pattern. The client wants to complete the migration as soon as possible.

Which approach should the Architect recommend for the content migration?

- A. Use Site importer to import the content into AEM
- **B. Recreate the entire content manually with a group of Content Authors**
- C. Migrate all common pages using the ETL procedure and use manual authoring for the rest
- D. Migrate all common pages using the ETL procedure with multiple rounds

Answer: B

NEW QUESTION # 48

A large digital agency has 10 TB of assets in their DAM where renditions for each Asset must be created without affecting performance for the authors. Which capability should the Architect recommend to meet the requirements?

- **A. Create AEM multi-threaded workflow**
- B. Use AEM Asset Offloading
- C. Reduce the number of AEM Asset versions
- D. Update dispatcher configuration to cache Assets

Answer: A

NEW QUESTION # 49

A client was successfully moved from AEM 6.5 to AEM as a Cloud Service (AEMaaS) environment. The Content Transfer Tool was used to transfer the content to the AEMaaS environment. The developed components render different renditions based on the breakpoint of the pages. The users reported that newly uploaded assets are not rendering or missing. What is the cause of this issue and how can it be resolved?

- A. The Asset Update workflow was not migrated properly to the new AEMaaS instance. The solution is to migrate the /var path and the workflow models using the Content Transfer Tool.
- **B. The Asset Update workflow is not compatible with AEMaaS. The solution is to use AEM Processing profiles to create the missing renditions.**
- C. The Asset Update workflow is not compatible with AEMaaS. The solution is to rewrite the workflow to use the new APIs in the AEM SDK.
- D. The Asset Update workflow was not migrated properly to the new AEMaaS instance. The solution is to make sure that the workflow is present in the codebase.

Answer: B

NEW QUESTION # 50

A renowned eCommerce company's flagship product page witnesses a dramatic surge in traffic during the holiday seasons. Over the past few sales events, users have highlighted slower load times and sporadic outages. Preliminary analysis suggests that the current setup might be straining under the increased traffic.

The company has recently integrated a Content Delivery Network (CDN) and plans to fine-tune the dispatcher settings. The leadership emphasizes ensuring a seamless user experience for the forthcoming holiday season and wants to leverage the CDN and dispatcher optimally.

Given the situation described, which two approaches should be prioritized to bolster the performance and resilience of the product page during peak traffic? (Choose two.)

- A. Performing Integration Testing to validate third-party APIs
- **B. Performing Load Testing to mimic high traffic scenarios**
- **C. Performing testing of cache efficiency of dispatcher and CDN**
- D. Performing Penetration Testing for securing the site

Answer: B,C

NEW QUESTION # 51
