VMware 3V0-32.23 PDF Dumps - Pass Your Exam In First Attempt [Updated-2026]

Certification has become a prerequisite for employment and career growth in the VMware industry for reputable companies. To advance comfortably in your career, passing the 3V0-32.23 exam is a valuable validation of your expertise. However, many test takers struggle to find updated Cloud Management and Automation Advanced Design (3V0-32.23) dumps and fail to prepare effectively in a short period, resulting in a loss of time, money, and motivation.

VMware Cloud Management and Automation Advanced Design Sample Questions (Q230-Q235):

NEW QUESTION # 230

In a Cloud Management physical design scenario, why would you include VMware Aria Automation Config?

- A. To automate cloud infrastructure provisioning and configuration tasks
- B. To organize office events
- C. To develop new marketing strategies
- D. To manage customer complaints

Answer: A

NEW QUESTION # 231

A company is in the process of finalizing its cross-team requirements for its Cloud Management Platform design. The Cloud Infrastructure team has indicated that it would like a way to interact with the platform programmatically. After some research, the decision is made to use vRealize CloudClient.

What are three use cases for using the selected command-line utility? (Choose three.)

- A. Update DNS on the vRealize Automation appliance.
- B. Import and export blueprints and other content to a human-readable format.
- C. Execute vRealize Orchestrator workflows.
- D. Browse the catalog and submit a request.
- E. Execute a workload reclamation request.

Answer: B,C,D

NEW QUESTION # 232

An architect is completing the physical design for a vRealize Operation (vROps) solution for a customer. The customer has only provided the following information for their existing environment:

- 500 Virtual Machines
- 2 VMware vCenter Servers
- 10 VMware vSphere Hosts
- 20 Datastores
- Live data should be stored within the vROps solution for 6 months
- The RTO for all existing management components is 4 hours
- The RTO for all existing management components is 1 hour

Which two assumptions could the architect make when sizing the vROps cluster? (Choose two.)

- A. The RPO of the vROps solution will be 1 hour.
- B. The minimum data retention within vRealize Operations Cluster will be 12 months.
- C. The resource profile of a virtual machine will be, on average, 1 vCPU and 2 GB RAM.
- D. The vROps cluster will be configured as High Availability.
- E. The RTO of the vROps solution will be 4 hours.

Answer: D,E

NEW QUESTION # 233

An architect has been tasked with designing a solution for development team deployments that are connected to the corporate network.

The network security team would like to ensure that the deployments NOT have access to or from corporate network resources without explicit review and authorization. All deployments should be able to communicate with one another.

Which two vRealize Automation blueprint designs satisfy these requirements? (Choose two.)

- A. - On-demand routed network
 - Software components configuring firewall rules on each machine
 - Property definition drop-downs allowing machine firewall configuration at request time
- B. - On-demand NAT network.
 - App Isolation selected from within the blueprint properties
 - Existing security group assigned to each machine that is tied to appropriate security policies in NSX
- C. - On-demand NAT network
 - Existing security group assigned to each machine that is tied to appropriate security policies in NSX
- D. - On-demand routed network
 - Existing security tags assigned to each machine that are auto-assigned to appropriate security groups in NSX

Answer: C,D

NEW QUESTION # 234

A financial services company has mandated that all IP and DNS entries be allocated from an existing third-party IPAM solution. Also, for auditing purposes, all systems must handle user authentication via the existing open source LDAP directory. When considering a logical design for this scenario, which is true about the dependency relationships of these systems?

- A. The LDAP system is an upstream dependency and the IPAM system is a downstream dependency of vRealize Automation.
- B. Both the IPAM and LDAP systems are external, downstream dependencies of vRealize Automation.
- C. Both the IPAM and LDAP systems are external, upstream dependencies of vRealize Automation.
- D. The LDAP system is an upstream dependency and the LDAP system is a downstream dependency of vRealize Automation.

Answer: B

NEW QUESTION # 235

.....

Most candidates who register for Cloud Management and Automation Advanced Design (3V0-32.23) certification lack the right resources to help them achieve it. As a result, they face failure, which causes them to waste time and money, and sometimes even lose motivation to repeat their VMware 3V0-32.23 exam. PracticeDump will solve such problems for you by providing you with 3V0-32.23 Questions. The VMware 3V0-32.23 certification exam is undoubtedly a challenging task, but it can be made much easier with the help of PracticeDump's reliable preparation material.

3V0-32.23 Test Passing Score: https://www.practicedump.com/3V0-32.23_actualtests.html

During your transitional phrase to the ultimate aim, our 3V0-32.23 study engine as well as these updates is referential. With 3V0-32.23 study materials, you will have more flexible learning time, VMware 3V0-32.23 Materials It suddenly occurs to me that an important exam is coming, VMware 3V0-32.23 Materials That's really a terrible thing to you, Especially when you get a high 3V0-32.23 passing score in test, it means that you have capability to handle with professional issue of technology and you are quite qualified for IT work.

Happily, we think we have found a way, One of the advantages of our 3V0-32.23 Study Material is that it has various versions, During your transitional phrase to the ultimate aim, our 3V0-32.23 study engine as well as these updates is referential.
