Free PDF Pass-Sure SC-200 - Examcollection Microsoft Security Operations Analyst Free Dumps

Experts at Lead2PassExam strive to provide applicants with valid and updated Microsoft SC-200 exam questions to prepare from, as well as increased learning experiences. We are confident in the quality of the Microsoft SC-200 preparational material we provide and back it up with a money-back guarantee. Lead2PassExam provides Microsoft SC-200 desktop-based practice software for you to test your knowledge and abilities. The SC-200 desktop-based practice software has an easy-to-use interface.

Microsoft Security Operations Analyst Sample Questions (Q126-Q131):

NEW QUESTION # 126

You have an Azure subscription named Sub1 that contains the resources shown in the following table.

Name	Type	Resource group	Description
WS1	Microsoft Sentinel workspace	RG1	Contains a scheduled query rule named Rule1
LApp1	Azure logic app	RG2	Contains a Microsoft Sentinel incident trigger

You plan to configure Rule1 to trigger Lapp1 when an incident is generated.

You need to recommend the role-based access control (RBAC) role that you should assign to WS1, and the scope at which should you assign the role. The solution must follow the principle of least privilege.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Role: Microsoft Sentinel Automation Contributor
Logic App Operator
Microsoft Sentinel Automation Contributor
Microsoft Sentinel Playbook Operator

Scope: RG2
LApp1
RG1
RG2
Sub1

Answer:

NEW QUESTION # 128

You use Azure Sentinel to monitor irregular Azure activity.

You create custom analytics rules to detect threats as shown in the following exhibit.

[Home](#) > [Azure Sentinel workspaces](#) > [Azure Sentinel](#)

Analytics rule wizard – Edit existing rule

Deploy VM

General **Set rule logic** Incident settings Automated response Review and create

Define the logic for your new analytics rule.

Rule query

Any time details set here will be within the scope defined below in the Query scheduling fields.

```
AzureActivity
| where OperationName == "Create or Update Virtual Machine"
or OperationName == "Create Deployment"
| where ActivityStatus == "Succeeded"
| make-series dcount(ResourceId) default=0
on EventSubmissionTimestamp in range(ago(7d), now(), 1d) by Caller
```

[View query results >](#)

Map entities

Map the entities recognized by Azure Sentinel to the appropriate columns available in your query results. This enables Azure Sentinel to recognize the entities that are part of the alerts for further analysis. Entity type must be a string.

Entity Type	Column
Account	<input type="text" value="Choose column"/> <input type="button" value="Add"/>
Host	<input type="text" value="Choose column"/> <input type="button" value="Add"/>
IP	<input type="text" value="Choose column"/> <input type="button" value="Add"/>
URL	<input type="text" value="Choose column"/> <input type="button" value="Add"/>
FileHash	<input type="text" value="Choose column"/> <input type="button" value="Add"/>

Query scheduling

Run query every *

Lookup data from the last *

Alert threshold

Generate alert when number of query results *

Event grouping

Configure how rule query results are grouped into alerts

- ☒ Group all events into a single alert
☐ Trigger an alert for each event

Suppression

Stop running query after alert is generated ☐

☒ On ☐ Off

Stop running query for *

[Previous](#) [Next: Incident settings >](#)

You do NOT define any incident settings as part of the rule definition.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

If a user deploys three Azure virtual machines simultaneously, how many times will you receive [answer choice] in the next five hours.

	▼
0 alerts	
1 alert	
2 alerts	
3 alerts	

If three separate users deploy one Azure virtual machine each within five minutes of each other, you will receive [answer choice].

	▼
0 alerts	
1 alert	
2 alerts	
3 alerts	

Answer:

Explanation:

If a user deploys three Azure virtual machines simultaneously, how many times will you receive [answer choice] in the next five hours.

	▼
0 alerts	
1 alert	
2 alerts	
3 alerts	

If three separate users deploy one Azure virtual machine each within five minutes of each other, you will receive [answer choice].

	▼
0 alerts	
1 alert	
2 alerts	
3 alerts

NEW QUESTION # 129

You have a Microsoft Sentinel workspace named sws1.

You plan to create an Azure logic app that will raise an incident in an on-premises IT service management system when an incident is generated in sws1.

You need to configure the Microsoft Sentinel connector credentials for the logic app. The solution must meet the following requirements:

- * Minimize administrative effort.
- * Use the principle of least privilege.

How should you configure the credentials? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Configure the connector to use: A managed identity

Role to assign to the credentials: Microsoft Sentinel Responder

Answer:

Explanation:

Answer Area

Configure the connector to use:

Role to assign to the credentials:

Explanation:
Answer Area

Microsoft

Configure the connector to use:

Role to assign to the credentials:

NEW QUESTION # 130

You have a Microsoft Sentinel workspace.

You need to configure a report visual for a custom workbook. The solution must meet the following requirements:

- * The count and usage trend of AppDisplayName must be included
- * The TrendList column must be useable in a sparkline visual,

How should you complete the KQL query? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

SigninLogs

| where ResultType == 0 and AppDisplayName != ""

| summarize count() by AppDisplayName

| (

SigninLogs

| TrendList = count() on TimeGenerated in range((TimeRange:start), (TimeRange:end), 4h) by AppDisplayName

| mv-expand

| top 10 by count_desc

SigninLogs

| TrendList = count() on TimeGenerated in range((TimeRange:start), (TimeRange:end), 4h) by AppDisplayName

| mv-expand

| render

) on AppDisplayName

| top 10 by count_desc

Answer:

Explanation:

Answer Area

```

SigninLogs
| where ResultType == 0 and AppDisplayName != ""
| summarize count() by AppDisplayName
| join (
  SigninLogs
  | let
  | lookup TrendList = count() on TimeGenerated in range((TimeRange:start), (TimeRange:end), 4h) by AppDisplayName
  | mv-expand
) on AppDisplayName
| top 10 by count_desc
SigninLogs
| make-series TrendList = count() on TimeGenerated in range((TimeRange:start), (TimeRange:end), 4h) by AppDisplayName
| make_bag()
| make-series
| mv-expand
| render
) on AppDisplayName
| top 10 by count_desc

```

Microsoft

Explanation:

Answer Area

```

SigninLogs
| where ResultType == 0 and AppDisplayName != ""
| summarize count() by AppDisplayName
| join (
  SigninLogs
  | make-series TrendList = count() on TimeGenerated in range((TimeRange:start), (TimeRange:end), 4h) by AppDisplayName
) on AppDisplayName
| top 10 by count_desc

```

NEW QUESTION # 131

.....

Based on the research results of the examination questions over the years, the experts give more detailed explanations of the contents of the frequently examined contents and difficult-to-understand contents, and made appropriate simplifications for infrequently examined contents. SC-200 test questions make it possible for students to focus on the important content which greatly shortens the students' learning time. With SC-200 Exam Torrent, you will no longer learn blindly but in a targeted way. SC-200 exam torrent will also help you count the type of the wrong question, so that you will be more targeted in the later exercises and help you achieve a real improvement. SC-200 exam guide will be the most professional and dedicated tutor you have ever met, you can download and use it with complete confidence.
