The three versions of our HPE7-A05 practice braindumps have their own unique characteristics. The PDF version of HPE7-A05 training materials is convenient for you to print, the software version of training guide can provide practice test for you and the online version is for you to read anywhere at any time. If you are hesitating about which version should you choose, you can download our HPE7-A05 free demo first to get a firsthand experience before you make any decision.

HP Aruba Certified Data Center Professional Exam Sample Questions (Q50-Q55):

NEW QUESTION # 50

When two different software applications can seamlessly exchange information and use each other's functions, it is known as:

- A. Fragmentation
- B. Isolation
- C. Integration
- D. Duplication

Answer: C

Explanation:

Integration allows software applications to exchange information and utilize each other's functions.

NEW QUESTION # 51

When configuring a network switch in a data center environment, which of the following is a common practice to ensure security and manageability?

- A. Disable spanning tree protocol
- B. Disable port security
- C. Implement VLANs
- D. Use default passwords

Answer: C

Explanation:

Implementing VLANs helps to segregate network traffic into different virtual networks, enhancing security and manageability in the data center environment.

NEW QUESTION # 52

Which two components are required to implement Dynamic Segmentation with Aruba switches?

- A. Aruba Mobility Controllers.
- B. ClearPass Policy Manager.
- C. Aruba Gateways.
- D. Aruba AirWave.

Answer: A,B

Explanation:

Dynamic Segmentation uses ClearPass for policy enforcement and Mobility Controllers (or switches) to apply role-based VLANs/ACLs. Gateways (C) are optional for tunneling.

NEW QUESTION # 53

When planning the low-level design of a data center network, what factors should be considered?

- A. Network traffic patterns
- B. Power and cooling requirements
- C. Backup and disaster recovery solutions
- D. Physical layout

Answer: D

Explanation:

Factors such as physical layout, power and cooling requirements, network traffic patterns, and backup and disaster recovery solutions should be considered when planning the low-level design of a data center network.

NEW QUESTION # 54

When maintaining and optimizing a data center solution, what is a common task that should be regularly performed to ensure optimal performance?

- A. Checking for software updates
- B. Powering off the equipment overnight
- C. Ignoring performance reports
- D. Changing the network topology

Answer: A

Explanation:

Regularly checking for software updates is crucial to maintain security and performance in a data center solution.

NEW QUESTION # 55

.....

Compared with those uninformed exam candidates who do not have effective preparing guide like our HPE7-A05 study braindumps, you have already won than them. Among wide array of choices, our products are absolutely perfect. Besides, from economic perspective, our HPE7-A05 Real Questions are priced reasonably so we made a balance between delivering satisfaction to customers and doing our own jobs. So in this critical moment, our HPE7-A05 prep guide will make you satisfied.
