

High-quality Splunk SPLK-3002 Valid Test Vce and High Pass-Rate Latest SPLK-3002 Learning Materials

BTW, DOWNLOAD part of CramPDF SPLK-3002 dumps from Cloud Storage: <https://drive.google.com/open?id=1mdehHLaFGIWhGqYTurw-WmFkfYuh08Tb>

The pass rate is 98.65% for the SPLK-3002 exam torrent, and we also pass guarantee and money back guarantee if you fail to pass the exam. We have received many good feedbacks from our customers, and they think highly of our SPLK-3002 exam torrent. Besides, we provide you with free demo for you to try before purchasing. We also have free update for SPLK-3002 Exam Dumps for one year after buying. And the update version for SPLK-3002 exam torrent will send to your email automatically. If you have any other questions just contact with us through online service or by email, and we will give a reply to you as quickly as possible.

If you are worried about your exam, just choose us, we will help you pass the exam and strengthen your confidence. SPLK-3002 Soft test engine can stimulate the real exam environment, so that you can know the procedure of the exam, and your nerves will be decreased and your confidence will be increased. In addition, SPLK-3002 Training Materials are high quality, and they can help you pass the exam just one time. If you fail to pass the exam in your first attempt after using SPLK-3002 exam dumps of us, we will give you full refund.

SPLK-3002 Valid Test Vce - Realistic Quiz 2026 Splunk Latest Splunk IT Service Intelligence Certified Admin Learning Materials

Our CramPDF can help you realize your dream to pass SPLK-3002 certification exam by providing SPLK-3002 test training materials. Because it concludes all training materials you need to Pass SPLK-3002 Exam. Choosing our CramPDF can absolutely help you pass SPLK-3002 test easily, and make you become a member of elite in IT. What are you waiting for? Hurry up!

Splunk IT Service Intelligence Certified Admin Sample Questions (Q47-Q52):

NEW QUESTION # 47

In which index are active notable events stored?

- A. itsi_tracked_groups
- B. itsi_notable_audit
- C. itsi_tracked_alerts
- D. itsi_notable_archive

Answer: C

Explanation:

In Splunk IT Service Intelligence (ITSI), notable events are created and managed within the context of its Event Analytics

framework. These notable events are stored in the `itsi_tracked_alerts` index. This index is specifically designed to hold the active notable events that are generated by ITSI's correlation searches, which are based on the conditions defined for various services and their KPIs. Notable events are essentially alerts or issues that need to be investigated and resolved. The `itsi_tracked_alerts` index enables efficient storage, querying, and management of these events, facilitating the ITSI's event management and review process. The other options, such as `itsi_notable_archive` and `itsi_notable_audit`, serve different purposes, such as archiving resolved notable events and auditing changes to notable event configurations, respectively. Therefore, the correct answer for where active notable events are stored is the `itsi_tracked_alerts` index.

NEW QUESTION # 48

Which of the following is a best practice for identifying the most effective services with which to start an iterative ITSI deployment?

- **A. Analyze the business to determine the most critical services.**
- B. Define a large number of key services early.
- C. Focus on low-level services.
- D. Only include KPIs if they will be used in multiple services.

Answer: A

Explanation:

Reference: <https://docs.splunk.com/Documentation/ITSI/4.10.2/SI/MKA>

A best practice for identifying the most effective services with which to start an iterative ITSI deployment is to analyze the business to determine the most critical services that have the most impact on revenue, customer satisfaction, or other key performance indicators. You can use the Service Analyzer to prioritize and monitor these services. References: Service Analyzer

NEW QUESTION # 49

Fritz is looking at a Deep Dive with a lane showing the average percent of CPU usage across the four web servers in the web farm. Seeing a spike, he wants to add the graphs of each server on the swim lane, and selects the Lane Overlay Options to do so. No entity overlays are available for the KPI.

What is wrong with his KPI configuration?

- **A. He did not split the KPI by entity.**
- B. He configured the service with only three entities.
- C. He did not enable entity filtering.
- D. He configured the KPI to split by `pseudo#entity`.

Answer: A

Explanation:

In Splunk ITSI, swim lane overlays depend on a KPI being split by entity so that each entity's individual time series can be displayed separately in the Deep Dive view. When a KPI is aggregated without an entity split, it produces a single time series value at each timestamp representing the entire group (in this case, the average CPU across all web servers). Because that KPI does not contain `per#entity` values, ITSI has nothing to overlay

- therefore no entity overlays appear in the Lane Overlay Options. This configuration mistake often happens when a KPI is defined to average values across sources without specifying an entity dimension on which to split results. Entity filtering is a separate feature that enables restricting which entities are considered in display or analytics and does not control availability of swim lane overlays; `pseudo#entities` are artificial names that do not reflect actual system identities and are not relevant to this error; and having only three entities versus four would not prevent overlays from appearing if the KPI were correctly split by entity. The correct fix is to edit the KPI definition and configure it to split the metric results by the server entity field, such that each server has its own time series. This then enables Fritz to overlay the individual server CPU graphs on the swim lane as intended.

NEW QUESTION # 50

Which of the following accurately describes base searches used for KPIs in a service?

- A. All the KPIs in a service use the same base search.
- B. All the metrics in a base search are used by one service.
- C. A base search can only be used by its service and all dependent services.
- **D. Base searches can be used for multiple services.**

Answer: D

Explanation:

KPI base searches let you share a search definition across multiple KPIs in IT Service Intelligence (ITSI).

Create base searches to consolidate multiple similar KPIs, reduce search load, and improve search performance.

Reference: <https://docs.splunk.com/Documentation/ITSI/4.10.2/SI/BaseSearch> A base search is a search definition that can be shared across multiple KPIs that use the same data source.

Base searches can improve search performance and reduce search load by consolidating multiple similar KPIs. The statement that accurately describes base searches used for KPIs in a service is:

A). Base searches can be used for multiple services. This means that you can create a base search for a service and use it for other services that have similar data sources and KPIs. For example, if you have multiple services that monitor web server performance, you can create a base search that queries the web server logs and use it for all the services that need to calculate KPIs based on those logs.

NEW QUESTION # 51

Where are KPI search results stored?

- A. The `itsi_summary` index.
- B. The default index.
- C. KV Store.
- D. Output to a CSV lookup.

Answer: A

Explanation:

Search results are processed, created, and written to the `itsi_summary` index via an alert action.

Reference:

D is the correct answer because KPI search results are stored in the `itsi_summary` index in ITSI. This index is an events index that stores the results of scheduled KPI searches. Summary indexing lets you run fast searches over large data sets by spreading out the cost of a computationally expensive report over time. Reference: Overview of ITSI indexes

NEW QUESTION # 52

.....

If you are worried about your exam, just choose us, we will help you pass the exam and strengthen your confidence. SPLK-3002 Soft test engine can stimulate the real exam environment, so that you can know the procedure of the exam, and your nerves will be decreased and your confidence will be increased. In addition, SPLK-3002 Training Materials are high quality, and they can help you pass the exam just one time. If you fail to pass the exam in your first attempt after using SPLK-3002 exam dumps of us, we will give you full refund.

Latest SPLK-3002 Learning Materials: <https://www.crampdf.com/SPLK-3002-exam-prep-dumps.html>

Keep it simple by opting for the best tools for the online SPLK-3002 cbt, We have free online service which means that if you have any trouble using our Splunk SPLK-3002 learning materials or operate different versions on the platform mistakenly, we can provide help for you remotely in the shortest time, If you buy our SPLK-3002 study materials you will pass the test smoothly.

Cher's vast experience, coupled with her amazing talent SPLK-3002 for teaching, has produced a book that will be of tremendous help to you for mastering these digital tools.

I did not feel like I had a handle" on things a lot of the time, Keep it simple by opting for the best tools for the online SPLK-3002 cbt, We have free online service which means that if you have any trouble using our Splunk SPLK-3002 learning materials or operate different versions on the platform mistakenly, we can provide help for you remotely in the shortest time.

Splunk - Valid SPLK-3002 - Splunk IT Service Intelligence Certified Admin Valid Test Vce

If you buy our SPLK-3002 study materials you will pass the test smoothly, You don't worry about that how to keep up with the market trend, just follow us, Buy SPLK-3002 study guide now and we will help you.
