

# 3V0-24.25 guide torrent & testking 3V0-24.25 test & 3V0-24.25 pass king

P.S. Free 2026 VMware 3V0-24.25 dumps are available on Google Drive shared by PracticeDump:  
<https://drive.google.com/open?id=1PcxBLQBpJu5EQn-9GyH3gVAkJveRRM0X>

Moreover, 3V0-24.25 exam questions have been expanded capabilities through partnership with a network of reliable local companies in distribution, software and product referencing for a better development. That helping you pass the 3V0-24.25 exam with our 3V0-24.25 latest question successfully has been given priority to our agenda. The 3V0-24.25 Test Guide offer a variety of learning modes for users to choose from, which can be used for multiple clients of computers and mobile phones to study online, as well as to print and print data for offline consolidation. We sincere hope that our 3V0-24.25 exam questions can live up to your expectation.

Are you looking for the best study materials for the Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service exam? PracticeDump is the only place to go! You may be fully prepared to pass the Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service (3V0-24.25) test with their comprehensive VMware 3V0-24.25 exam questions. PracticeDump provides the Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service (3V0-24.25) Exam Questions and answers guide in PDF format, making it simple to download and use on any device. You can study at your own pace and convenience with the VMware 3V0-24.25 PDF Questions, without having to attend any in-person seminars. This means you may study for the 3V0-24.25 exam from the comfort of your own home whenever you want.

## Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service Free Valid Torrent & 3V0-24.25 Actual Practice Pdf & Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service Exam Training Pdf

We can confidently say that Our 3V0-24.25 training quiz will help you. First of all, our company is constantly improving our products according to the needs of users. If you really want a learning product to help you, our 3V0-24.25 study materials are definitely your best choice, you can't find a product more perfect than it. Second, our 3V0-24.25 learning questions have really helped a lot of people. Looking at the experiences of these seniors, I believe that you will definitely be more determined to pass the 3V0-24.25 exam.

### VMware 3V0-24.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>VMware Products and Solutions: Focuses on configuring vSphere Supervisor capabilities, networking, storage, identity, and access for Kubernetes clusters. It also covers managing Kubernetes releases, CNIs, NSX networking objects, TLS certificates, and securing VKS clusters.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• Install, Configure, Administrate the VMware Solution: Includes creating and managing Supervisor clusters, namespaces, zones, workloads, and add-on services. Also covers provisioning, scaling, updating VKS clusters, autoscalers, storage strategies, workload deployments, backup</li> <li>• restore, and editing YAML configurations.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• IT Architectures, Technologies, Standards: This section covers the differentiation between VMs and containers, helping determine the appropriate compute model. It also includes understanding Kubernetes architecture, networking, storage, service mesh, Helm, and reference architectures for VKS deployments.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Plan and Design the VMware Solution: Covers evaluating the impact of load balancer sizing, namespace network options, and vSphere namespace architecture. It includes planning processes for enabling Supervisor clusters and implementing service mesh.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Troubleshoot and optimize the VMware Solution: Focuses on diagnosing and resolving provisioning, connectivity, namespace, VM class, storage, networking, container, registry, and CA errors. It also includes recovering failed upgrades and optimizing cluster performance using monitoring and scaling tools.</li> </ul>

## VMware Advanced VMware Cloud Foundation 9.0 vSphere Kubernetes Service Sample Questions (Q73-Q78):

### NEW QUESTION # 73

An administrator is building a secure, multi-tenant container registry strategy for their vSphere Kubernetes Services deployment running on VMware Cloud Foundation. Each workload domain hosts a Supervisor Cluster, and multiple development teams require private repositories to store and distribute container images for Kubernetes clusters. The organization enforces strict image security posture due to compliance requirements. The operations team deploys Harbor as an add-on service through the Supervisor control plane, and developers push/pull images from Harbor through Kubernetes manifests.

What requirement describes the role and purpose of Harbor?

- A. Harbor is an image repository that pulls all images from GitHub.
- B. Harbor, formerly known as Bitnami, is an image catalog used for downloading verified open-source packages.
- **C. Harbor is an open-source registry that secures artifacts with policies and role-based access control, ensures images are scanned and free from vulnerabilities, and signs images as trusted.**
- D. Harbor is an image scanner used to verify that images are free from known vulnerabilities and patches as necessary.

**Answer: C**

Explanation:

Harbor is used as a private registry service to store and distribute container artifacts for Kubernetes consumption, which is exactly what's needed for a multi-tenant platform where multiple teams require isolated repositories. The VMware documentation treats Harbor as a VMware Tanzu Harbor Registry service, including governance around who can operate it and how teams are separated into projects (a key multi-tenancy boundary). For example, vSphere privileges explicitly cover the ability to create or delete a Harbor registry and to create, delete, or purge Harbor registry projects, reinforcing that Harbor is operated as a managed registry with project-scoped administration and access control.

In practice for regulated environments, the registry role is not just storage—Harbor is commonly used to enforce enterprise controls like policy-driven access (RBAC), and it supports security capabilities such as image vulnerability scanning and image trust/signing, which directly address the requirement to prevent unsafe images from being promoted or deployed.

### NEW QUESTION # 74

An administrator is tasked to protect a VKS cluster at a point in time. To satisfy the request, the administrator creates a pre-provisioned snapshot of the target cluster.

Drag and drop the four configuration tasks into the correct order from "Configuration Steps" on the left and place them into the "Configuration Order" on the right. (Choose four.)

#### Configuration Steps

- |  |
|--|
| Verify that the volumeSnapshot is marked with ReadyToUse as true.        |
| Create a VolumeSnapshot object.  |
| Verify the name of the original volumeSnapshot object in the Supervisor. |
| Create a VolumeSnapshotContent object.                                   |

#### Configuration Order

**Answer:**

Explanation:

### Answer Area

Verify the name of the original VolumeSnapshot object in the Supervisor.

Create a VolumeSnapshotContent object.

Create a VolumeSnapshot object.

Verify that the VolumeSnapshot is marked with ReadyToUse as true.

- 1 - Verify the name of the original VolumeSnapshot object in the Supervisor.
- 2 - Create a VolumeSnapshotContent object.
- 3 - Create a VolumeSnapshot object.
- 4 - Verify that the VolumeSnapshot is marked with ReadyToUse as true.

#### NEW QUESTION # 75

A VI Administrator is managing the lifecycle of VM images used by the VM Service. A new corporate standard requires that all Linux VMs deployed via kubectl must use the hardened image corp-linux- v2.ova.

The administrator has uploaded the new OVA to the Corporate-Images Content Library.

How can the administrator ensure that developers can immediately begin deploying VMs using this new image name in their YAML? (Select all that apply.)

- A. Ensure the Corporate-Images Content Library is assigned to the developers' vSphere Namespace.
- B. The administrator must manually restart the wcp-vmop-controller pod on the Supervisor to recognize the new image.
- C. The developers must change the kind in their YAML to VirtualMachineImage.
- D. The administrator must create a "VM Image" custom resource object in Kubernetes mapping the OVA UUID to a name.
- E. The VM Service automatically syncs and discovers new images in assigned libraries; the developers can reference corp-linux-v2 in the spec.imageName field once the sync completes.

**Answer: A,E**

#### NEW QUESTION # 76

A Platform Engineer is optimizing resource density for a high-volume batch processing workload. The workload consists of thousands of short-lived tasks that start and stop rapidly. The overhead of reserving memory for a full Guest OS for each task is a concern.

Review the following resource profile for a single task instance:

Task Runtime: < 2 minutes

CPU: High bursts

Memory: 512 MB

OS Dependency: Generic Linux userspace

Why are vSphere Pods the architecturally superior choice over TKG cluster nodes for this specific scenario? (Select all that apply.)

- A. vSphere Pods do not consume any license capacity.
- B. vSphere Pods (via the Supervisor) can schedule pods directly onto ESXi hosts, removing the "double scheduler" latency (Kubernetes scheduler + vSphere scheduler) associated with TKG VMs.
- C. vSphere Pods support overcommitment of memory more efficiently than TKG nodes because the ESXi hypervisor has direct visibility into the pod's memory pages.
- D. vSphere Pods eliminate the memory overhead of a full Guest OS per pod, as the CRX is extremely lightweight compared to a TKG Worker Node VM.
- E. TKG clusters do not support batch processing jobs.

**Answer: B,C,D**

#### NEW QUESTION # 77

A Cloud Architect is evaluating the resource consumption of the Harbor Supervisor Service.

The requirement is to support a High Availability deployment of Harbor.

What impact does enabling HA have on the Supervisor Cluster?

- A. It requires an external database; the embedded one cannot be HA.
- B. It requires deploying 3 separate Supervisor Clusters.
- C. It has no impact; HA is a logical switch.
- D. It increases the resource reservation requirement because the Harbor operator will deploy redundant replicas of the core components (Core, Jobservice, Portal) and a clustered database/Redis, consuming more CPU/Memory/Storage from the Supervisor's resource pool.

**Answer: D**

#### NEW QUESTION # 78

.....

Our 3V0-24.25 test prep is renowned for free renewal in the whole year. As you have experienced various kinds of exams, you must have realized that renewal is invaluable to 3V0-24.25 study materials, especially to such important 3V0-24.25 exams. And there is no doubt that being acquainted with the latest trend of exams will, to a considerable extent, act as a driving force for you to pass the exams and realize your dream of living a totally different life. So if you do want to achieve your dream, buy our 3V0-24.25 practice materials.
